My Anaconda Don't!

This isn't just any other body positivity book on the market - My Anaconda Don't!has got plenty of sass, and most importantly, plenty of ASS. With a mixture of tongue in cheek humour and earnest tips and information, My Anaconda Don't! will teach you how to celebrate and love your backside the way it is. The content is humorous, but also political, and surprisingly comprehensive. We journey back to the origin of BC (butt culture) to discover how butts have influenced our favourite music, we go on a deep dive into gluteus health and discuss plastic surgery, body positivity, and we round off with self-care and pampering for your bum. Why not give your ass a facial using coffee scrub and oil? My Anaconda Don't! has it all, including inspirational quotes from butt idols and people known for championing body positivity, such as Nicky Minaj, Lizzo, the Kardashians, Ariana Grande, Laverne Cox and more. The title My Anaconda Don't!is inspired by

Nikki Minaj's song Anaconda and of course Sir Mix-a-lots 90's hit I Like Big Butts. This book is entertaining, educational and will have you laughing out loud. Complete with colourful and sassy full-colour illustrations by Iliana Galvez (@growmija).

While Excel remains ubiquitous in the business world, recent Microsoft feedback forums are full of requests to include Python as an Excel scripting language. In fact, it's the top feature requested. What makes this combination so compelling? In this hands-on guide, Felix Zornstein—creator of xlwings, a popular open source package for automating Excel with Python—shows experienced Excel users how to integrate these two worlds

efficiently. Excel has added quite a few new capabilities over the past couple of years, but its automation language, VBA, stopped evolving a long time ago. Many Excel power users have already adopted Python for daily automation tasks. This guide gets you started. Use Python without extensive programming knowledge Get started with modern tools, including Jupyter notebooks and Visual Studio code Use pandas to acquire, clean, and analyze data and replace typical Excel calculations Automate tedious tasks like consolidation of Excel workbooks and production of Excel reports Use xlwings to build interactive Excel tools that use Python as a calculation engine Connect Excel to databases and CSV files and fetch data from the Internet using Python code Use Python as a single tool to replace VBA, Power Query, and Power Pivot

CompTIA Linux+ Study Guide with Online Labs

Develop, deploy, and streamline your data science projects with the most popular end-to-end platform, Anaconda Key Features -Use Anaconda to find solutions for clustering, classification, and linear regression -Analyze your data efficiently with the most powerful data science stack -Use the Anaconda cloud to store, share, and discover projects and libraries Book Description Anaconda is an open source platform that brings together the best tools for data science professionals with more than 100 popular packages supporting Python, Scala, and R languages. Hands-On Data Science with Anaconda gets you started with Anaconda and demonstrates how you can use it to perform data science operations in the real world. The book begins with setting up the environment for Anaconda platform in order to make it accessible for tools and frameworks such as Jupyter, pandas, matplotlib, Python, R, Julia, and more. You'll walk through package manager Conda, through which you can automatically manage all packages including cross-language dependencies, and work across Linux, macOS, and Windows. You'll explore all the essentials of data science and linear algebra to perform data science tasks using packages such as SciPy, contrastive, scikit-learn, Rattle, and Rmixmod. Once you're accustomed to all this, you'll start with operations in data science such as cleaning, sorting, and data classification. You'll move on to learning how to perform tasks such as clustering, regression, prediction, and building machine learning models and optimizing them. In addition to this, you'll learn how to visualize data using the packages available for Julia, Python, and R. What you will learn Perform cleaning, sorting, classification, clustering, regression, and dataset modeling using Anaconda Use the package manager conda and discover, install, and use functionally efficient and scalable packages Get comfortable with heterogeneous data exploration using multiple languages within a project Perform distributed computing and use Anaconda Accelerate to optimize computational powers Discover and share packages, notebooks, and environments, and use shared project drives on Anaconda Cloud Tackle advanced data prediction problems Who this book is for Hands-On Data Science with Anaconda is for you if you are a developer who is looking for the best tools in the market to perform data science. It's also ideal for data analysts and data science professionals who want to improve the efficiency of their data science applications by using the best libraries in multiple languages. Basic programming knowledge with R or Python and introductory knowledge of linear algebra is expected.
