The simple memory technique in the book has never been explored fully before. Please be surprised that you will be much better than your peers after using the technique. There are two main advantages of the memory technique: 1) To help you to memorize the meaning of a word. For example, ego [oneself] -- The first letter of the linked word 'oneself' is 'o' which is the same as the last letter of 'ego'. The connection should tell you the meaning of 'ego'. See more examples as below. imp [infant] -- check the link between the letters 'i'; notion [idea] -- check the link between the letters 'i'; cerebral [brain] -- check the link between the letters 'b'; 2) To help you to distinguish easily confused words migrate [move] -- check the link between the letters 'm'; immigrate [in] -- check the link between the letters 'i'; emigrate [exit] -- check the link between the letters 'e'; stationary [abiding] check the link between the letters 'a'; stationery [envelope] check the link between the letters 'e'; Very simple and easy indeed!
