Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and

promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration.

Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Bits and Pieces I Understanding Rational Numbers

In this report the Competition Commission (CC) confirmed that it would introduce a remedies package based around a point-of-sale prohibition for all forms of payment protection insurance (PPI) (with the exception of retail PPI) after detailing how it will benefit customers. The point-of-sale prohibition would stop the completion of sales of PPI during the sale of the associated credit product such as a personal loan. It was one of a package of measures the CC planned to introduce following its investigation into PPI (2009, ISBN 9780117067363), which concluded that businesses that offer

PPI alongside credit face little or no competition when selling PPI to their credit customers. The report and in particular the proposed point-of-sale prohibition were the subject of a legal challenge to the Competition Appeal Tribunal (CAT) by Barclays, supported by Lloyds Banking Group and Shop Direct Group Financial Services Ltd. Whilst upholding the CC's conclusions as to the competition problems in this market, the CAT ruled that it must in particular consider further the role and importance of a potential drawback to the prohibition, namely that it might inconvenience customers. Following the CAT's judgment, the CC carried out a detailed analysis of the likely effects of such a prohibition and concluded that the benefits of a package of remedies including the prohibition, by introducing greater competition and choice and lower prices to the market, would outweigh the disadvantages, in particular the
