

## Adobe Pagemaker 7 0 User Guide

*Eight years after its publication, CJKV Information Processing remains the ultimate English-language source of information for information on processing text in Chinese, Japanese, Korean, and Vietnamese. While its pre-eminence has not been challenged, its contents have aged. Unicode is becoming much more important, and the mix of technologies, encodings, and of course fonts continues to evolve. In this update, Ken Lunde re-examines the challenges of working with these languages, showing developers in a wide range of fields the latest tools for sharing information that can reach East Asia directly. Here is a complete look at all the new features of Adobe PageMaker 6.0 for Windows. Featuring the successful "Classroom in a Book" format, the book provides a comprehensive tutorial for maximizing the power and sophistication of Adobe PageMaker. The CD-ROM contains the tutorial lessons.*
