“Slow violence” from climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war takes place gradually and often invisibly. Rob Nixon focuses on the inattention we have paid to the lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today.

High-stakes public examinations exert a dominant influence in most education systems. They affect both teacher and student behavior, especially at the middle and upper levels of secondary education. The content of past examinations tends to dictate what is taught and how it is taught and, more important, what is learned and how it is learned. By changing aspects of these examinations, especially their content and format, education systems can have a strong positive impact on teacher behavior and student learning, help raise student achievement levels, and better prepare students for tertiary-level education and for employment. Examination agencies, many of which have followed the same procedures over decades, can learn from the successes and failures of other systems. This book addresses current issues related to the development, administration, scoring, and

usage of these high-stakes public examinations, identifying key issues and problems related to examinations in many emerging market economies as well as in advanced economies. The book's primary audience consists of public examination officials on national, regional, and state examination boards, but the book should also be of interest to senior education policy makers concerned with certification and learning achievement standards, to academics and researchers interested in educational assessment, to governmental and education agencies responsible for student selection, and to professionals at development organizations. "This extremely well-written and comprehensive book offers a timely review of the diversity of public examination practices worldwide; of the tensions between examinations and learning; and of the technical expertise involved in the creation of valid, reliable, and fair assessments. It reminds us that as "the diploma disease" takes hold with an ever-greater intensity at every stage of education worldwide, and the commercial business of testing flourishes, those concerned with educational quality and meaningful learning must be on guard to prevent the assessment tail wagging the educational dog." Angela W. Little, Professor Emerita, Institute of Education, University College London "This book is very well structured and written and draws on the authors' remarkable global knowledge across

It will be a great asset both to administrators responsible for examinations and to academics and other professionals who seek to understand the nature and impact of examinations of different types and in different settings.†? Mark Bray, UNESCO Chair Professor of Comparative Education, University of Hong Kong; and former Director, UNESCO International Institute for Educational Planning “I am sure that Public Examinations Examined, which thoroughly analyzes the practice of public examinations in different countries and makes profound and well-grounded conclusions, will arouse very great interest and will serve to further improve public examinations.†? "As nations struggling to heal wounds of civil war and atrocity turn toward the model of reconciliation, Reconciliation in Divided Societies takes a systematic look at the political dimensions of this international phenomenon. . . . The book shows us how this transformation happens so that we can all gain a better understanding of how, and why, reconciliation really works. It is an almost indispensable tool for those who want to engage in reconciliation"—from the foreword by Archbishop Emeritus Desmond Tutu As societies emerge from oppression, war, or genocide, their most important task is to create a civil society strong and stable enough to support democratic governance. More and more conflict-torn countries throughout the world are promoting reconciliation as central to their new social order as they move toward peace and stability. Scores of truth and reconciliation commissions are helping bring people together and heal the wounds of deeply

divided societies. Since the South African transition, countries as diverse as Timor Leste, Sierra Leone, Fiji, Morocco, and Peru have placed reconciliation at the center of their reconstruction and development programs. Other efforts to promote reconciliation—including trials and governmental programs—are also becoming more prominent in transitional times. But until now there has been no real effort to understand exactly what reconciliation could mean in these different situations. What does true reconciliation entail? How can it be achieved? How can its achievement be assessed? This book digs beneath the surface to answer these questions and explain what the concepts of truth, justice, forgiveness, and reconciliation really involve in societies that are recovering from internecine strife. Looking to the future as much as to the past, Erin Daly and Jeremy Sarkin maintain that reconciliation requires fundamental political and economic reform along with personal healing if it is to be effective in establishing lasting peace and stability. Reconciliation, they argue, is best thought of as a means for transformation. It is the engine that enables victims to become survivors and divided societies to transform themselves into communities where people work together to raise children and live productive, hopeful lives. Reconciliation in Divided Societies shows us how this transformation happens so that we can all gain a better understanding of how and why reconciliation is actually accomplished.

An award-winning play about the relationship between brothers. Nothing but the Truth is the story of two brothers, of sibling rivalry, of exile, of memory and reconciliation, and the ambiguities of freedom. The play was John Kani's debut as sole playwright and was first performed in the Market Theatre in Johannesburg. It won the 2003 Fleur du Cap Award for best actor and best new South African play. In the same year Kani was also awarded a special Obie award for his extraordinary

Tor Sellström profiles the independent island states and the European dependencies in the African part of the Indian Ocean, their contemporary social, political and economic challenges, the wider international context and their relations with, in particular, Africa and the African Union.

In the broad history of the Cold War, the Battle of Cuito Cuanavale was the climax of a far-off, but nonetheless important African war. It was waged between the apartheid South African Defence Force (SADF) and the armed forces of the communist MPLA government in Angola and the People's Republic of Cuba. Led by Soviet generals, the MPLA embarked on a grand offensive in order to knock out the pro-Western rebel movement UNITA in southeastern Angola. As UNITA's survival was crucial to South Africa's military strategy in fighting its own counterinsurgency war against the South West African rebel movement SWAPO, the SADF stepped in with a single mechanized brigade and broke the back of the overwhelming MPLA offensive. The MPLA forces were subsequently driven back over a hundred kilometers, before the SADF advance was finally stopped just short of the town of Cuito Cuanavale. Since then, a hot war of words have been

waged about who actually won. In this book, a South African military historian and retired journalist examines the campaign, the adversaries, and their achievements on the basis of his research in SADF archives. His scrupulous attempt at objectivity results in interesting conclusions. While the MPLA lost hands down, he posits a draw between the Cubans and the SADF. Although having been a South African reservist officer himself, he has critical words for the SADF leadership. Many misunderstandings, some of which were purposefully created by Cuban dictator Fidel Castro, are put to rest. While not sharing Castro's political beliefs, he acknowledges Castro's military acumen and political savvy in extricating his country from an unwinnable war while smelling of roses. The analysis contains many lessons about mechanized warfare in the African context from which both laymen and military professionals alike may learn."

Mandela and the Revolutionaries

A Study of Ecological Conflicts and Valuation

It's South Africa 1990. Two major events are about to happen: the release of Nelson Mandela and, more importantly, it's Spud Milton's first year at an elite boys only private school. Cursed with parents from well beyond the lunatic fringe, a senile

granny, and a dormitory full of strange characters, Spud has his hands full trying to adapt to his new home. Surrounded by names such as Gecko, Rambo, Rain Man and Mad Dog, Spud takes his first tentative steps along the path to manhood. (The path, it seems, could be a rather long road.) Armed with only his wits and his diary, Spud takes us from illegal night swimming to the red-hot furnace of the cricket pitch, from ghostbusting to a catastrophic family vacation. He also invites us into the mind of a boy struggling to come to terms with a strange new world; a boy whose eyes are being opened to love, friendship and complete insanity.

The search for a means to an end to apartheid erupts into conflict between a black township youth and his "old-fashioned" black teacher.

This edited book provides a global view on evolution education. It describes the state of evolution education in different countries that are representative of geographical regions around the globe such as Eastern Europe, Western Europe, North Africa, South Africa, North America, South America, Middle East, Far East, South East Asia, Australia, and New Zealand. Studies in evolution education literature can be

divided into three main categories: (a) understanding the interrelationships among cognitive, affective, epistemological, and religious factors that are related to peoples' views about evolution, (b) designing, implementing, evaluating evolution education curriculum that reflects contemporary evolution understanding, and (c) reducing antievolutionary attitudes. This volume systematically summarizes the evolution education literature across these three categories for each country or geographical region. The individual chapters thus include common elements that facilitate a cross-cultural meta-analysis. Written for a primarily academic audience, this book provides a much-needed common background for future evolution education research across the globe.

Cry, the Beloved Country

The Collection

For the first time, the 92-metre frieze of the Voortrekker Monument in Pretoria, one of the largest historical

narratives in marble, has been made the subject of a book. The pictorial narrative of the Boer pioneers who conquered South Africa's interior during the 'Great Trek' (1835-52) represents a crucial period of South Africa's past. Conceptualising the frieze both reflected on and contributed to the country's socio-political debates in the 1930s and 1940s when it was made. The book considers the active role the Monument played in the rise of Afrikaner nationalism and the development of apartheid, as well as its place in post-apartheid heritage. The frieze is unique in that it provides rare evidence of the complex processes followed in creating a major monument. Based on unpublished documents, drawings and models, these processes are unfolded step by step, from the earliest discussions of the purpose and content of the frieze, through all the stages of its design, to its shipping to post-war Italy to be copied into marble from Monte Altissimo, up to its final installation in the Monument. The book examines how visual representation transforms historical memory in what it chooses to recount, and the forms in which it is depicted. The second volume expands on the first, by investigating each of the twenty-seven scenes of the frieze in depth, providing new insights into not only the frieze, but also South Africa's history. François van Schalkwyk of African Minds, co-publisher with De Gruyter writes: *From Memory to Marble* is an open access monograph in the true sense of the word. Both volumes of the digital version of the book are available in full and free of charge from the date of publication. globe. At the same time, a book such as *From Memory to Marble*, with its unique and exquisite photographs of the frieze as well as its wealth of reproduced archival materials, demands reception of a more traditional kind, that is, on the printed page. For this reason, the book is likewise available in print as two separate volumes. The printed and digital books should not be seen as separate incarnations; each brings its own advantages, working together to extend the reach and utility of *From Memory to Marble* to a range of interested readers.

A revelatory and definitive account of how Nelson Mandela and his peers led South Africa to the brink of revolution against the postwar twentieth century's most infamously racist regime. *Spear: Mandela and the Revolutionaries* brings to life the brief revolutionary period in which Nelson Mandela and his comrades fought apartheid not just with words but also with violence. After the 1960 Sharpeville police shootings of civilian protesters, Mandela and his comrades in the mass-resistance order of the African National Congress (ANC) and the Communist Party pioneered the use of force and formed Umkhonto we Sizwe (MK), or Spear of the Nation. A civilian-based militia, MK stockpiled weapons and waged a war of sabotage against the state with pipe bombs, Molotov cocktails, and dynamite. In response, the state passed draconian laws, militarized its police, and imprisoned its enemies without trial. Drawing

from several hundred first-person accounts, most of which are unpublished, Paul Landau traces Mandela's allies—and opponents—in communist, pan-Africanist, liberal, and other groups involved in escalating resistance alongside the ANC. After Mandela's capture, the Pan Africanist Congress planned to initiate street violence, and MK organized Operation Mayibuye, an uprising to be led by trained commandos. The state short-circuited those plans and subsequently jailed, exiled, tortured, and murdered revolutionaries. The era of high apartheid then began. Spear reshapes our understanding of Mandela by focusing on this intense but relatively neglected period of escalation in the movement against apartheid. Landau's book is not a biography, nor is it a history of a militia or an army; rather, it is a riveting story about ordinary civilians debating and acting together in extremis. Contextualizing Mandela and MK's activities amid anticolonial change and Black Marxism in the early 1960s, Spear also speaks to today's transnational antiracism protests and worldwide struggles against oppression.

This is a wonderful book rich in empirical detail, full of theoretical insights, offering hope in a bleak world, altogether inspiring. . . a tremendous achievement of having helped to create the disciplines of ecological

economics and political ecology, bringing them alive in this book, and making their insights available to the developing worldwide movement for environmental justice. Pat Devine, *Environmental Values* Any book by the ecological economist Joan Martinez-Alier is a Big Publishing Event. . . this is a book by a writer who loves his subject, knows it well, respects its history, and is driven by the desire to do justice. These are qualities enough to send you to the bookshop or the library in search of *The Environmentalism of the Poor*. Andrew Dobson, *Environment Politics* The book is a worthy and in-depth contribution to debates about political ecology and ecological economics. It should be read by all environmental and ecological economists who wish to make their analysis more relevant. Tim Forsyth, *Progress in Development Studies* A marvellous combination of insight, research and activism. . . A must-read for policymakers, practitioners and academics alike, and for anyone concerned with sustainable development, environmentalism or poverty alleviation. *Human Ecology Journal* . . . one of the most important environmental books to have been published recently. Martinez-Alier integrates two of the most significant areas of environmental theory political ecology and ecological economics. Eurig Scandrett, *Friends of the Earth Scotland* The book has three main strengths: its bibliography, which is extensive; the global perspective on the environmental movement and the relationship with poverty; and the general theme of this interdisciplinary work, which is not so much to provide new information, but to consider the existing information in a new light. Martinez-Alier is to be commended for taking such a step in the literature . . . the writing style is extremely approachable . . . Recommended. B.J.

Peterson, Choice [Joan] Martinez-Alier combines the honest discipline of a scholar with the passionate energy of an activist. The result, *The Environmentalism of the Poor*, is highly recommended! Herman E. Daly, University of Maryland, College Park, US

The *Environmentalism of the Poor* has the explicit intention of helping to establish two emerging fields of study political ecology and ecological economics whilst also investigating the relations between them. The book analyses several manifestations of the growing environmental justice movement , and also of popular environmentalism and the environmentalism of the poor , which will be seen in the coming decades as driving forces in the process to achieve an ecologically sustainable society. The author studies, in detail, many ecological distribution conflicts in history and at present, in urban and rural settings, showing how poor people often favour resource conservation. The environment is thus not so much a luxury of the rich as a necessity of the poor. It concludes with the fundamental questions: who has the right to impose a language of valuation and who has the power to simplify complexity?

Joan Martinez-Alier combines the study of ecological conflicts and the study of environmental valuation in a totally original approach that will appeal to a wide cross-section of academics, ecologists and environmentalists. A child wanders too far into the Knysna Forest ... he never returns. Nine years later government officials working on a census find a white child living with a Coloured family in the mountains beyond the forest. They take him away from the stricken Fiela, who has brought him up as her son, and give him back to his 'original' family. Stunned and helpless, Benjamin waits for Fiela to reclaim him. But, powerless against authority, Fiela never comes. Benjamin has to grow up before he can go in search of the truth ...

Based on extended anthropological fieldwork, this book illustrates the impact of the Truth and Reconciliation Commission in urban African communities in Johannesburg. The study deepens our understanding of post-apartheid South Africa and the use of human rights discourse.

"South Africa has eleven official languages but in reality, there are twelve. The twelfth language is sign language, part of which has been developed by millions of South Africans across townships and cities--the language of commuters. As the taxi routes expand, the hand signs develop as a logical, visual language. Susan Woolf ... has catalogued the hand signals and linked them to the relevant taxi routes in a single user-friendly booklet."--P. xxii.

Dreams are the currency of Okri's writing, particularly in this first book of poems, *An African Elegy*, but also in his books of short stories and prize-winning novel *The Famished Road*. Okri's dreams are made on the stuff of Africa's colossal economic and political problems, and reading the poems is to experience a constant succession of metaphors of resolution in both senses of the word. Virtually every poem contains an exhortation to climb out of the African miasma, and virtually every poem harvests the dream of itself with an upbeat restorative ending' - Giles Foden, *Times Literary Supplement*
