Europe’s second Thirty Years’ War—an epoch of blood and ashes Fire and Blood looks at the European crisis of the two world wars as a single historical sequence: the age of the European Civil War (1914–1945). Its overture was played out in the trenches of the Great War; its coda on a ruined continent. It opened with conventional declarations of war and finished with “unconditional surrender.” Proclamations of national unity led to eventual devastation, with entire countries torn to pieces. During these three decades of deepening conflicts, a classical interstate conflict morphed into a global civil war, abandoning rules of engagement and fought by irreducible enemies rather than legitimate adversaries, each seeking the annihilation of its opponents. It was a time of both unchained passions and industrial, rationalized massacre. Utilizing multiple sources, Enzo Traverso depicts the dialectic of this era of wars, revolutions and genocides. Rejecting commonplace notions of “totalitarian evil,” he rediscovers the feelings and reinterprets the ideas of an age of intellectual and political commitment when Europe shaped world history with its own collapse.

Robin McKinley’s mesmerizing history of Damar is the stuff that legends are made of. The Hero and the Crown is a dazzling “prequel” to The Blue Sword. Aerin is the only child of the king of Damar, and should be his rightful heir. But she is also the daughter of a witchwoman of the North, who died when she was born, and the Damarians cannot trust her. But Aerin’s destiny is greater than her father’s people know, for it leads her to battle with Maur, the Black Dragon, and into the wilder Damarian Hills, where she meets the wizard Luthé. It is he who at last tells her the truth about her mother, and he also gives over to her hand the Blue Sword, Gonturan. But such gifts as these bear a great price, a price Aerin only begins to realize when she faces the evil mage, Agsded, who has seized the Hero’s Crown, greatest treasure and secret strength of Damar.

"Published by OpenStax College, American Government is designed to meet the scope and sequence requirements of the single-semester American Government course. This title includes innovative features designed to enhance student learning, including Insider Perspective features and a Get Connected module that shows students how they can get engaged in the political process. The book provides an important opportunity for students to learn the core concepts of American Government and understand how those concepts apply to their lives and the world around them. Our American Government textbook adheres to the scope and sequence of introductory American government courses nationwide. We have endeavored to make the workings of American Government interesting and accessible to students while maintaining the conceptual coverage and rigor inherent in the subject at the college level. With this objective in mind, the content of this textbook has been developed and arranged to provide a logical progression from the fundamental principles of institutional design at the founding, to avenues of political participation, to thorough coverage of the political structures that constitute American government. The book builds upon what students have already learned and emphasizes connections between topics as well as between theory and applications. The goal of each section is to enable students not just to recognize concepts, but to work with them in ways that will be useful in later courses, future careers, and as engaged citizens. The organization and pedagogical features were developed and vetted with feedback from American government instructors dedicated to the project."--BC Campus website.

As the twentieth century closed, Fred Adams and Greg Laughlin captured the attention of the world by identifying the five ages of time. In The Five Ages of the Universe, Adams and Laughlin demonstrate that we can now understand the complete life story of the cosmos from beginning to end. Adams and Laughlin have been hailed as the creators of the definitive long-term projection of the evolution of the universe. Their achievement is awesome in its scale and profound in its scientific breadth. But The Five Ages of the Universe is more than a handbook of the physical processes that guided our past and will shape our future; it is a truly epic story. Without leaving earth, here is a fantastic voyage to the physics of eternity. It is the only biography of the universe you will ever need.

Everyone tracing a family’s history faces a dilemma. We strive to reconstruct relationships and lives of people we cannot see, but if we cannot see them, how do we know we have portrayed them accurately? The genealogical proof standard aims to help researchers, students, and new family historians address this dilemma and apply respected standards for acceptable conclusions.

This book examines the discourses on nation-building, civic identity, minorities, and the formation of religious identities in school textbooks worldwide. It offers up-to-date, practical, and scholarly information on qualitative and mixed-method textbook analysis, as well as the broader context of critical comparative textbook and curriculum analyses in and across selected countries. The volume offers unique and empirical research on how internal educational policies and ideological goals of dominant social, political, and economic groups affect textbook production and the curricular aims in different educational systems worldwide. Chapters address the role of school textbooks in developing nationhood, the creation of citizenship through school textbooks, the complexity of gender in normative discourses, and the intersection of religion and culture in school textbooks.

'Outline of U.S. History' is a publication of the U.S. Department of State. The first edition (1949-50) was produced under the editorship of Francis Whitney, first of the State Department Office of International Information and later of the U.S. Information Agency. Richard Hofstadter, professor of history at Columbia University, and Wood Gray, professor of American history at The George Washington University, served as academic consultants. D. Steven Endsley of Berkeley, California, prepared additional material. It has been updated and revised extensively over the years by, among others, Keith W. Olsen, professor of American history at the University of Maryland, and Nathan Glick, writer and former editor of the USIA journal, Dialogue. Alan Winkler, professor of history at Miami University (Ohio), wrote the post-World War II chapters for previous editions. This new edition has been completely revised and updated by Alonzo L. Hamby, Distinguished Professor of History at Ohio University. Professor Hamby has written extensively on American politics and society.

How climate change will affect our political theory—for better and worse Despite all the science and summits, leading capitalist states have not managed to mitigate anything close to an adequate level of carbon emissions. There is no way the world will warm less than the critical 2C threshold. What are the likely political-economic outcomes? Where is our warming world headed? Possibilities in the struggle for climate justice depend on our capacity to anticipate where the existing global order is likely to go. Climate Leviathan provides a radical way of thinking about how environmental change will intensify existing challenges to global order, unearthing the forces for a planetary variation on existing forms of sovereignty. Drawing on a wide range of political thought, Wainwright and Mann argue that rapid climate change will transform global political economy and our world’s basic political arrangements, leading toward a capitalist planetary sovereignty. Alternative futures must be constructed in the face of these transformations.

For many Americans, capitalism is a dynamic engine of prosperity that rewards the bold, the daring, and the hardworking. But to many outside the United States, capitalism seems like an initiative that serves only to concentrate power and wealth in the hands of a few hereditary oligarchies. As A History of Corporate Governance around the World shows, neither co some of the brightest minds in the field of economics present new empirical research that suggests that each side of the debate has something to offer the other. Free enterprise and well-developed financial systems are proven to produce growth in those countries that have them. But research also suggests that in some other capitalist countries, arrangements of ownership in the hands of a few wealthy families. A History of Corporate Governance around the World provides historical studies of the patterns of corporate governance in several countries-including the large industrial economies of Canada, France, Germany, Italy, Japan, the United Kingdom, and the United States; larger developing economies like China and India; those of the Netherlands and Sweden.

The German offensives which crushed Poland in 1939 and swallowed most of Western Europe in less than two months in 1940 have been well documented and heavily studied, however, the overall picture of the remarkable Japanese offensive land campaign in 1941–42 has received less attention. In this fascinating new book, Bill Yenne documents the years when the IJA (IJA) was conducting its equally unstoppable ground campaign in the Far East, and unlike other books on this subject, he studies the campaign from the Japanese point of view. He reveals how the IJA were able to conquer huge swathes of Southeast Asia in a little over eight weeks after the attack on Pearl Harbor. Using first-hand accounts from Japanese sources, Yenne offers a unique insight into the mindset of the IJA during their offensive, detailing the capturing of Manila, the Philippines, Hong Kong, Singapore, Burma, and the Dutch East Indies. Exploring the infrastructure and technical challenges of waging war across such a huge area, Yenne delves into the hardships that faced individual Japanese soldiers in theatre and explains how the Japanese were able to establish the aura of invincibility that marked their campaign between 1941–42.
