***There is a paradox about Africa: it remains a subject that attracts considerable attention yet rarely is there a full appreciation of its complexity. African historiography has typically consisted of writing Africa for Europe—instead of writing Africa for itself, as itself, from its own perspectives. The History of Africa redresses this by letting the perspectives of Africans themselves take center stage. Authoritative and comprehensive, this book provides a wide-ranging history of Africa from earliest prehistory to the present day—using the cultural, social, political, and economic lenses of Africa as instruments to illuminate the ordinary lives of Africans. The result is a fresh survey that includes a wealth of indigenous ideas, African concepts, and traditional outlooks that have escaped the writing of African history in the West. The new edition***

***includes information on the Arab Spring, the rise of FrancAfrica, the presence of the Chinese in Africa, and the birth of South Sudan. The chapters go up to the present day, addressing US President Barack Obama's policies toward Africa. A new companion website provides students and scholars of Africa with access to a wealth of supporting resources for each chapter, including images, video and audio clips, and links to sites for further research. This straightforward, illustrated, and factual text allows the reader to access the major developments, personalities, and events on the African continent. This groundbreaking survey is an indispensable guide to African history.***

Charles Robert Maturin's last novel, *The Albigenses* (1824), a historical romance of the early 13th century, is a rich tale of the conflict between the Catholic church and the Albigenses, a heretical sect centered in Languedoc. Its historical background does little to inhibit Maturin's strong penchant for extravagant scenes of violence, horror, and vivid evocations of nature at its least benign. His many characters people a well-plotted story of impressive density—the heroine, Genevieve, kind hearted, bold, true to her creed; the ruthless bishop of Toulouse; churchmen and women, of varying degrees of piety; maniacal harridans, formidable outlaws, and

knights in armor. The Albigenses received, in general, better reviews than most of his other works, mainly because of its relatively reduced emphasis on blasphemous doings, but the reputation of Melmoth the Wanderer soon overshadowed it. This new edition of The Albigenses aspires to renew interest in the Irish master's final elaborate and engrossing tale.

Night photographers have one big thing in common: a true love of the dark. Rather than looking at night photography as an extension of daytime shooting with added complications, they embrace the unique challenges of nocturnal photography for the tremendous wealth of creative opportunities it offers. That's just what this book does. But if the idea of setting out into the deep, dark night with just your camera (and maybe a cup of coffee) gets your creative juices flowing, dive right in. Lance Keimig, one of the premier experts on night photography, has put together a comprehensive reference that will show you ways to capture images you never thought possible. If you have some experience with photography and have always wanted to try shooting at night, you'll learn the basics for film or digital shooting. If you're already a seasoned pro, you'll learn to use sophisticated techniques such as light painting and drawing, stacking images to create long star trails, and more. A chapter on the history of night photography describes the materials and processes that made night photography possible, and introduces the photographers who have defined night photography as an artistic medium. A chapter on how to use popular software packages such as Lightroom and Photoshop specifically with night time shots shows you how to make the final adjustments to your nocturnal creations. In this book

A Biography

Available electronically in an open-access, full-text edition from the Texas A&M University Libraries' Digital Repository at <http://hdl.handle.net/1969.1/146844>. Frank N. McMillan Jr., a country boy steeped in the traditional culture of rural Texas, was summoned to a life-long quest for meaning by a dream lion he met in the night. On his journey, he followed the lead of the founder of analytical psychology, Carl Jung, and eventually established the world's first

professorship to advance the study of that field. McMillan, born and raised on a ranch near Calvert, was an Aggie through and through, with degrees in geology and petroleum engineering. As an adult working near Bay City, Texas, he was lunching in a country café when by chance he met abstract expressionist painter Forrest Bess, who was ecstatically waving a letter he had received from Jung himself. The artist's enthusiastic description of Jung as a master psychologist, soul doctor, and healer led McMillan to the Jung Center in Houston, where he began reading Jung's Collected Works. McMillan frequently said, "Jung saved my life." Finding Jung: Frank N. McMillan Jr., a Life in Quest of the Lion captures McMillan's journey through the words of his own journals and through reflections by his son, Frank III. David Rosen, the holder of the first endowed McMillan professorship at Texas A&M University, adds insights to the book, and the late Sir Laurens van der Post, whom the elder McMillan met at the Houston Jung Center in 1979, authored a foreword to the book before his death. This is a story that sheds light on the inner workings of the self as well as the Jungian understanding of the Self. In often lyrical language, it gives the human background to a major undertaking in the dissemination of Jungian scholarship and provides a personal account of a life lived in near-mythic dimensions.

Drawing on an annotated listing of his library, as well as his childhood books and poetry by his contemporaries, he links the books to the poet's intellectual and poetic development at each stage of his career.
