*The History of Telemedicine provides a comprehensive and in-depth analysis of the evolution of telemedicine from ancient Greece to the present time. It places the development of this field in the context of the never ending quest for providing equitable access to health care and re-casting the medical care landscape, while trying to assure quality and contain cost. The book describes the origin of modern telemedicine in experiments such as those by Willem Einthoven's 1905 long distance transfer of electrocardiograms through the pioneering era of teleradiology and telepsychiatry of the 1950s, its coming of age in the 1970s, its maturation in the 1990s, and finally the recent transformation and adoption by the mainstream. The authors delve into the rich history of telemedicine and tell the story from its genesis to the present time, reporting its continuity and evolution, its various adaptations, and the context that sustained interest and development in this modality of care and continues to guide its transformation into the future. The authors' central theme throughout the book is telemedicine's potential role in improving human health.*

*This book is an in-depth analysis of three of the most crucial years in twentieth-century Italian history, the years 1943-46. After more than two decades of a Fascist regime and a disastrous war experience during which Italy changed sides, these years saw the laying of the political and cultural foundations for what has since become known as Italy's First Republic.*

*Drawing on texts from the literature, film, journalism, and political debate of the period, Antifascisms offers a thorough survey of the personalities and positions that informed the decisions taken in this crucial phase of modern Italian history.*

*Describes America's shameful neglect of one out of every six of her citizens who has a physical, mental, or emotional disability and discusses the right of the disabled to jobs, transportation, and full participation in the democracy.*

*A fascinating portrait of the man who invented the erector set focuses on the life and times of A. C. Gilbert, the Yale graduate and marketing genius who created a toy that would radically change the market, and successive generations of boys. Reprint.*

*Player Piano*

*The previously untold story of the Zenith Trans-Oceanic, the world's most romantic and expensive series of portable radios. Long a companion of kings, presidents, transoceanic yachtsmen and world explorers, the Trans-Oceanic was also carried into battle by American troops in three wars. Its great popularity in spite of a very high price can be laid at the feet of several generations of armchair travelers who used the shortwave capabilities of the Trans-Oceanic as a window on the world. With access to the Zenith corporate archives and their long experience as radio enthusiasts and writers for both the popular and scholarly press, Professors Bryant and Cones present the engrossing stories of the development and use of the Trans-Oceanic throughout its forty year life. They present a wealth of never-before published photographs, documents and information concerning these fascinating radios, their collection, preservation and restoration.*

*Department of Education Acquisition Regulation (US Department of Education Regulation) (ED) (2018 Edition) The Law Library presents the complete text of the Department of Education Acquisition Regulation (US Department of Education Regulation) (ED) (2018 Edition). *"A funny, savage appraisal of a totally automated American society of the future."—San Francisco Chronicle Kurt Vonnegut's first novel spins the chilling tale of engineer Paul Proteus, who must find a way to live in a world dominated by a supercomputer and run completely by machines. Paul's rebellion is vintage Vonnegut—wildly funny, deadly serious, and terrifyingly close to reality. Praise for Player Piano "An exuberant, crackling style . . . Vonnegut is a black humorist, fantasist and satirist, a man disposed to deep and comic reflection on the human dilemma."—Life "His black logic . . . gives us something to laugh about and much to fear."—The New York Times Book Review*

*Share in the exciting adventures of A.C. Gilbert, the inventive genius behind AF trains and Erector Sets. This autobiography reads like an exciting adventure tale, because Gilbert led a remarkable life. Hardbound, 368 pages, 5¼ x 8½".*
