Christopher Knowlton, author of Cattle Kingdom and former Fortune writer, takes an in-depth look at the spectacular Florida land boom of the 1920s and shows how it led directly to the Great Depression. The 1920s in Florida was a time of incredible excess and precipitous collapse. The decade there produced the largest human migration in American history, far exceeding the settlement of the West, as millions flocked to the grand hotels and the new cities that rose rapidly from the teeming wetlands. The boom was not limited to Florida, but spread to other subdivisions of the South, and to other subdivisions of civilization—and the most egregious large-scale assault on the environment in the name of “progress.” Nowhere was the glitz and froth of the Roaring Twenties more excessive than in Florida. Here was Vegas before there was a Vegas: gambling, prostitution, and so was drinking, since prohibition was not enforced. Tycoons, crooks, and celebrities arrived en masse to promote or exploit this new and dazzling American frontier in the sunshine. Yet, the import and deep impact of these historical events have never been fully appreciated until now. In Bubble in the Sun Christopher Knowlton examines the grand artistic and entrepreneurial visions behind Coral Gables, Boca Raton, Miami Beach, and other storied sites, as well as the darker side of the frenzy. For while giant fortunes were being made, the nightlfe raged more raucously than anywhere else, the pure beauty of the Everglades suffered wanton ruination and the workers, mostly black, who built and maintained the boom, endured grievous abuses. Knowlton breathes dynamic life into the forces that wrecked Florida during the decade: the real estate moguls Carl Fisher, George Merrick, and Addison Mizner, and the once-in-a-century hurricane whose aftermath triggered the stock market crash. This essential account is a revelatory—and riveting—history that sheds light on how events affects our country today.

**A finalist for the National Book Critics Circle Award and the PEN Open Book Award, and winner of the 2020 Giller Prize, this revelatory story collection honors characters struggling to find their bearings far from home, even as they do the necessary "grunt work of the world." A failed boxer painting nails at the local salon. A woman plucking feathers at a chicken processing plant. A housewife learning English from daytime soap operas. A mother teaching her daughter the art of worm harvesting. In her stunning debut story collection, O. Henry Award winner Souvankham Thammavongsa focuses on characters struggling to make a living, illuminating their hopes, disappointments, love affairs, acts of defiance, and above all their pursuit of a place to belong. In spare, intimate prose charged with emotional power and a sly wit, she paints an indelible portrait of watchful children, wounded men, and restless women caught between cultures, languages, and values. As one of Thammavongsa's characters says, "All we wanted was to live." And in these stories, they do—brightly, ferociously, unforgettably. Unsentimental yet tender, taut and visceral, How to Pronounce Knife announces Souvankham Thammavongsa as one of the most striking voices of her generation. “Tells the story of housing in all its complexity.” —NPR
Spacious and affordable homes used to be the hallmark of American prosperity. Today, however, punishing rents and the increasingly prohibitive cost of ownership have turned housing into the foremost symbol of inequality and an economy gone wrong. Nowhere is this more visible than in the San Francisco Bay Area, where fleets of private buses ferry software engineers past the tarp-and-plywood shanties of the homeless. The adage that California is a glimpse of the nation's future has become a cautionary tale. With propulsive storytelling and ground-level reporting, New York Times journalist Conor Dougherty chronicles America's housing crisis from its West Coast epicenter, peeling back the decades of history and economic forces that brought us here and taking readers inside the activist movements that have risen in tandem with housing costs.

“This is why we read fiction at all” raves the Washington Post: Family life meets historical romance in this critically acclaimed, “gorgeous, sweeping novel” (Ms Magazine) about two people who find each other when abandoned by everyone else, marking the signal American debut of an award-winning writer who richly deserves her international acclaim. On the outskirts of a small town in Bengal, a family lives in solitude in their vast new house. Here, lives intertwine and unravel. A widower struggles with his love for an unmarried cousin. Bakul, a motherless daughter, runs wild with Mukunda, an orphan of unknown caste adopted by the family. Confined in a room at the top of the house, a matriarch goes slowly mad; her husband searches for its cause as he shapes and reshapes his garden. As Mukunda and Bakul grow, their intense closeness matures into something else, and Mukunda is banished to Calcutta. He prospers in the turbulent years after Partition, but his thoughts stay with his home, with Bakul, with all that he has lost—and he knows that he must return.

**In the tradition of Silent Spring and The Sixth Extinction, an urgent, meticulously researched, and groundbreaking book about the ways in which chemicals in the modern environment are changing—and endangering—human sexuality and fertility on the grandest scale, from renowned epidemiologist Shanna Swan. In 2017, author Shanna Swan and her team of researchers completed a major study. They found that over the past four decades, sperm levels among men in Western countries have dropped by more than 50 percent. They came to this conclusion after examining 185 studies involving close to 45,000 healthy men. The result sent shockwaves around the globe—but the story didn't end there. It turns out our sexual development is changing in broader ways, for both men and women and even other species, and that the modern world is on pace to become an infertile one. How and why could this happen? What is hijacking our fertility and our health? Count Down unpacks these questions, revealing what Swan and other researchers have learned about how both lifestyle and chemical exposures are affecting our fertility, sexual development—potentially including the increase in gender fluidity—and general health as a species. Engagingly explaining the science and repercussions of these worldwide threats and providing simple and practical guidelines for effectively avoiding chemical goods (from water bottles to shaving cream) both as individuals and societies, Count Down is at once an urgent wake-up call, an illuminating read, and a vital tool for the protection of our future.**

Why have so many central and inner cities in Europe, North America and Australia been so radically revamped in the last three decades, converting urban decay into new chic? Will the process continue in the twenty-first century or has it ended? What does this mean for the people who live there? Can they do anything about it?

This book challenges conventional wisdom, which holds gentrification to be the simple outcome of new middle-class tastes and a demand for urban living. It reveals gentrification as part of a much larger shift in the political economy and culture of the late twentieth century. Documenting in gritty detail the conflicts that gentrification brings to the new urban 'frontiers', the author explores the interconnections of urban policy, patterns of investment, eviction, and homelessness. The failure of liberal urban policy and the end of the 1980s financial boom have made the end-of-the-century city a darker and more dangerous place. Public policy and the private market are conspiring against minorities, working people, the poor, and the homeless as never before. In the emerging revanchist city, gentrification has become part of this policy of revenge.
