The research is in: students make sense of mathematical problems best when they work in small groups, with hands-on experiences that echo real-world situations. That's why **Algebra 1 Station Activities for Common Core Standards** has proven so popular. Students learn to apply algebra concepts, employ problem-solving strategies, communicate with one another, and reason through to the answers while working together. This book contains 26 sets of activities focusing on Number and Quantity, Algebra, Functions and Statistics and Probability taught in Algebra I courses. Each set consists of four different stations where students work in small groups, moving from station to station once their activities are complete. :: The research is in: students make sense of mathematical problems best when they work in small groups, with hands-on experiences that echo real-world situations. Algebra 1 Station Activities for Common Core Standards

Common Core Algebra I

An important feature of the new edition is the alignment of the activities with the Common Core Math Standards for algebra for grades six through high school. Every standard is supported by at least one activity, and many are supported by two or more. The rest of the activities address prerequisite skills related to the standards. The number and diversity of the activities in this resource will help teachers to meet the needs of the various abilities and learning styles of their students. The book is designed for easy use. Each section is divided into two parts: a summary of the activities, which includes teaching notes and answers, followed by the reproducibles of the section. The activities stand alone and can be used to supplement instruction and reinforce skills and concepts. Many are self-correcting, a feature that adds interest for students and saves time for teachers. The nine sections of the book are: Section 1: The Language of Algebra (Using Whole Numbers) Section 2: Integers, Variables, and Expressions Section 3: Linear Equations and Inequalities Section 4: Graphing Linear Equations and Inequalities Section 5: Basic Operations with Monomials and Polynomials Section 6: Factors of Monomials and Polynomials Section 7: Complex Numbers Section 8: Polynomial, Exponential, and Logarithmic Functions and Equations Section 9: Potpourri

Softbound Interactive Student Text is divided into a two-volume set that is perforated and 3-hole punched for easy organization for middle school students. This is volume 1.
