This volume appears now finally in English, sixty years after the death of its author, Lucien Tesnière. It has been translated from the French original into German, Spanish, Italian, and Russian, and now at long last into English as well. The volume contains a comprehensive approach to the syntax of natural languages, an approach that is foundational for an entire stream in the modern study of syntax and grammar. This stream is known today as dependency grammar (DG). Drawing examples from dozens of languages, many of which he was proficient in, Tesnière presents insightful analyses of numerous phenomena of syntax. Among the highlights are the concepts of valency and head-initial vs. head-final languages. These concepts are now taken for granted by most modern theories of syntax, even by phrase structure grammars, which represent, in a sense, the opposite sort of approach to syntax from what Tesnière was advocating. It includes a new introduction, additional images and an updated bibliography, as well as its original chapters on poetry, prose, "drum language" and drama, and an overview of the social, linguistic and historical background of oral literature in Africa. This book offers the first comprehensive description of the prosody of nine Romance languages that takes into account internal dialectal variation. Teams of experts examine the prosody of Catalan, French, Friulian, Italian, Occitan, Portuguese, Romanian, Sardinian, and Spanish using the Autosegmental Metrical framework of intonational phonology and the Tones and Breaks Indices (ToBI) transcription system. The chapters all share a common methodology, based on a common Discourse Completion Task questionnaire, and provide extensive empirical data. The authors then analyse how intonation patterns work together with other grammatical means such as syntactic constructions and discourse particles in the linguistic marking of a varied set of sentence types and pragmatic meanings across Romance languages. The ToBI prosodic systems and annotations proposed for each language are based both on a phonological analysis of the target language as well as on the shared goal of using ToBI analyses that are comparable across Romance languages. This book will pave the way for more systematic typological comparisons of prosody across both Romance and non-Romance languages.
