Bringing together theory, research, and practice to dismantle Anti-Black Linguistic Racism and white linguistic supremacy, this book provides ethnographic snapshots of how Black students navigate and negotiate their linguistic and racial identities across multiple contexts. By highlighting the counterstories of Black students, Baker-Bell demonstrates how traditional approaches to language education do not account for the emotional harm, internalized linguistic racism, or consequences these approaches have on Black students' sense of self and identity. This book presents Anti-Black Linguistic Racism as a framework that explicitly names and richly captures the linguistic violence, persecution, dehumanization, and marginalization Black Language-speakers endure when using their language in schools and in everyday life. To move toward Black linguistic liberation, Baker-Bell introduces a new way forward through Antiracist Black Language Pedagogy, a pedagogical approach that intentionally and unapologetically centers the linguistic, cultural, racial, intellectual, and self-confidence needs of Black students. This volume captures what Antiracist Black Language Pedagogy looks like in classrooms while simultaneously illustrating how theory, research, and practice can operate in tandem in pursuit of linguistic and racial justice. A crucial resource for educators, researchers, professors, and graduate students in language and literacy education, writing studies, sociology of education, sociolinguistics, and critical pedagogy, this book features a range of multimodal examples and practices through instructional maps, charts, artwork, and stories that reflect the urgent need for antiracist language pedagogies in our current social and political climate.

The Decline of America offers a carefully documented analysis of the last seventeen U.S. presidents. These men, eight Democrats and nine Republicans, have shaped the last 100 years, not only for America, but for the world. Each president is profiled with unsparing scrutiny so we can see where it's all gone wrong. David Schein follows these critiques by proposing ways to improve America's outlook for the next 100 years—before it's too late. Surveying a representative sample of Americans, this study considers the state of morals in America today

In Species of Origins, Karl W. Giberson and Donald A. Yerxa examine America's controversial conversation about creation and evolution. While noting that part of the discord stems from the growing cultural and religious diversity of the United States, they argue powerfully that the real issue is the headlong confrontation between two seemingly incompatible worldviews upon which millions of Americans rely: modern naturalistic science and traditional Judeo-Christian religions. Best Review at the Catholic Press Association Convention Studies of young American Catholics over the last three decades suggest a growing crisis in the Catholic Church: compared to their elders, young Catholics are looking to the Church less as they form their identities, and fewer of them can even explain what it means to be Catholic and why that matters. Young Catholic America, the latest book based on the groundbreaking National Study of Youth and Religion, explores a crucial stage in the life of Catholics. Drawing on in-depth surveys and interviews of Catholics and ex-Catholics ages 18 to 23--a demographic commonly known as early "emerging adulthood"--leading sociologist Christian Smith and his colleagues offer a wealth of insight into the wide variety of religious practices and beliefs among young Catholics today, the early influences and life-altering events that lead them to embrace the Church or abandon it, and how being Catholic affects them as they become full-fledged adults. Beyond its rich collection of statistical data, the book includes vivid case studies of individuals spanning a full decade, as well as insight into the twentieth-century events that helped to shape the Church and its members in America. An innovative contribution to what we know about religion in the United States and the evolving Catholic Church, Young Catholic America is the definitive source for anyone seeking to understand what it means to be young and Catholic in America today.

National Book Award-winner Timothy Egan turns his historian's eye to the largest-ever forest fire in America and offers an epic, cautionary tale for our time. On the afternoon of August 20, 1910, a battering ram of wind moved through the drought-stricken national forests of Washington, Idaho, and Montana, whipping the hundreds of small blazes burning across the forest floor into a roaring inferno that jumped from treetop to ridge as it raged, destroying towns and timber in the blink of an eye. Forest rangers had assembled nearly ten thousand men to fight the fires, but no living person had seen anything like those flames, and neither the rangers nor anyone else knew how to subdue them. Egan recreates the struggles of the overmatched rangers against the implacable fire with unstoppable dramatic force, and the larger story of outsized president Teddy

Roosevelt and his chief forester, Gifford Pinchot, that follows is equally resonant. Pioneering the notion of conservation, Roosevelt and Pinchot did nothing less than create the idea of public land as our national treasure, owned by every citizen. Even as TR's national forests were smoldering they were saved: The heroism shown by his rangers turned public opinion permanently in favor of the forests, though it changed the mission of the forest service in ways we can still witness today. A rich and riveting record of both literary and social value. Frank Sargeson is one of New Zealand's best-loved and most important writers. Besides the ground-breaking short stories, he wrote memoirs, novels, and plays. He encouraged at least three generations of younger writers and, for most of his adult life, the famous bach behind the hedge at 14 Esmonde Road was at the heart of New Zealand's artistic and literary world. Sargeson was also a prolific letter writer, and this selection of 500 of the most fascinating ranges over half a century, from 1927 to 1981. The letters are immensely readable, vividly capturing his life

and times, his milieu and his personality. Frank loved gossip, could be bitchy and peevish, but also kind, affectionate, funny, ribald, astute. This collection, selected, edited and annotated by Sarah Shieff, is a document of extraordinary significance for all those interested in New Zealand's literary and social history.

This anthology surveys the emergence of Anglo-American cultures in the first dramatic period of the European empires. It includes Francis Bacon, Adam Smith, Andrew Marvell, Alexander Pope as well as Wheatley and Edwards.

With a groundbreaking intersectional approach framed around social spheres, *Race in America* gives students the tools to think critically about race, racism, and white privilege. In this thoroughly updated Second Edition, students will find relevant examples drawn from the headlines and their own experiences. New features in the text and online help students see the "big picture"--and how they can participate in the fight for racial equality.

In the wake of Election 2000 and the Ralph Nader factor, this collection of original essays by leading political scientists examines the possibilities for and performance of minor parties in the American political system.

Looking at the rise and fall of the Reform Party and the seeming upsurge in Green Party prospects, the authors present evidence and opinion about the viability of a multiparty system in the United States. New York party politics and Congressional and state legislative elections add depth to our understanding of multiparty politics in action. A unique public opinion survey shows surprising variation in citizen's attitudes toward minor parties and multiparty politics nationwide. Will minor parties flourish or flounder in the 2004 election season? This volume offers a variety of views that every voter should consider. Visit our website for sample chapters!

Popular Representations of America in Non-American Media

Much of what the world knows about the United States of America is constructed and spread through global media. One can hardly find a country where news events involving the U.S.A. do not attract media attention, controversy, or at least invoke some level of critical thought. *Popular Representations of America in Non-American Media* provides emerging research exploring how non-American media covers and represents the U.S.A. through a critical review that demonstrates how foreign media representations of the country have varied according to periods in history, political leadership, and current ideological and socio-cultural affinities. The publication also conversely examines Americans' perceptions of foreign media representations of their country. Featuring coverage on a broad range of topics such as neocolonialism, political science, and popular culture, this book is ideally designed for students, scholars, media specialists, policymakers, international relation experts, politicians, and other professionals seeking

The Encyclopedia of Immigration and Migration in the American West provides much more than ethnic groups crossing the plains, landing at ports, or crossing borders; this two-volume work makes the history of the American West an important part of the American experience. Through sweeping entries, focused biographies, community histories, economic enterprise analysis, and demographic studies, this Encyclopedia presents the tapestry of the West and its population during various periods of migration. The two volumes examine the settling of the West and include coverage of movements

of American Indians, African Americans, and the often-forgotten role of women in the West's development.

The Career Mystique examines taken-for-granted rules of the career game--that continuous, full-time, hard work pays off--deeply embedded in the American Dream. Possibilities of fulfilling the career mystique are dwindling, given insecurities and risks of a global economy, strains and double demands on the job and at home, uncertainties and ambiguities around retirement. This outdated myth stands in the way of fashioning innovative policies more in keeping with life in 21st century America. Visit our website for sample chapters!

Broadband is the great infrastructure challenge of the early 21st century. Broadband is a foundation for economic growth, job creation, global competitiveness and a better way of life. The number of Americans who have broadband at home has grown from 8 million in 2000 to nearly 200 million last year. But, 100 million Americans do not have broadband at home. In early 2009, Congress directed the FCC to develop a National Broadband Plan to ensure that every American has ¿ access to broadband capability.¿ This plan must also include a strategy for achieving affordability and maximizing use of broadband. The plan presented here ensures that the entire broadband ecosystem ¿ networks, devices, content and applications¿ is healthy. Illus.

Lexical acculturation refers to the accommodation of languages to new objects and concepts encountered as the result of culture contact. This unique study analyzes a survey of words for 77 items of European culture (e.g. chicken, horse, apple, rice, scissors, soap, and Saturday) in the vocabularies of 292 Amerindian languages and dialects spoken from the Arctic Circle to Tierra del Fuego. The first book ever to undertake such a large and systematic cross-language investigation, Brown's work provides fresh insights into general processes of lexical change and development, including those involving language universals and diffusion.

Since its original landmark publication in 1980, A People's History of the United States has been chronicling American history from the bottom up, throwing out the official version of history taught in schools -- with its emphasis on great men in high places -- to focus on the street, the home, and the workplace. Known for its lively, clear prose as well as its scholarly research, A People's History is the only volume to tell America's story from the point of view of -- and in the words of -- America's women, factory workers, African-Americans, Native Americans, the working poor, and immigrant laborers. As historian Howard Zinn shows, many of our country's greatest battles -- the fights for a fair wage, an eight-hour workday, child-labor laws, health and safety standards, universal suffrage, women's rights, racial equality -- were carried out at the grassroots level, against bloody resistance. Covering Christopher Columbus's arrival through President Clinton's first term, A People's History of the United States, which was nominated for the American Book Award in 1981, features insightful analysis of the most important events in our history. Revised, updated, and featuring a new afterword by the author, this special twentieth anniversary edition continues Zinn's important contribution to a complete and balanced understanding of American history. This book presents in-depth analyses of the data gathered for 26 years by the Political Elites of Latin America project (PELA), the most comprehensive database about the topic in the world. Since 1994, PELA has conducted around

9,000 personal interviews with representative samples of the Legislative Powers of 18 Latin American countries, generating a unique resource for the study of political elites in a comparative perspective. Now, this contributed volume brings together studies that dig into the data gathered by PELA to discuss important topics related to the challenges faced by representative democracy in Latin America. After an introductory chapter that presents the potential of the PELA database, the book is structured in two parts. The first addresses in eight chapters important aspects of representative democracy such as political ambition, political trust, satisfaction with democracy, clientelism and the quality of democracy. It then discusses three relevant issues in Latin American political dynamics such as executive-legislative relations, women's participation as representatives, and the meaning of China and the United States in national politics. The second part addresses in five chapters studies of seven national cases that are representative of regional heterogeneity. These chapters aim to examine parliamentarian elites' attitudes in different political systems with regard to a variety of relevant issues such as institutional trust, satisfaction with democracy, Executive-Legislative relations, clientelism, and gender questions. Furthermore, these chapters intend to evince the evolution of such attitudes in the course of the last two decades. Politics and Political Elites in Latin America: Challenges and Trends will be of interest to scholars and students of

comparative politics in general and, more particularly, to those interested in the challenges faced by representative democracy not only in Latin America, but in many parts of the world.

#1 NEW YORK TIMES BESTSELLER Pulitzer Prize–winning historian David McCullough rediscovers an important and dramatic chapter in the American story—the settling of the Northwest Territory by dauntless pioneers who overcame incredible hardships to build a community based on ideals that would come to define our country. As part of the Treaty of Paris, in which Great Britain recognized the new United States of America, Britain ceded the land that comprised the immense Northwest Territory, a wilderness empire northwest of the Ohio River containing the future states of Ohio, Indiana, Illinois, Michigan, and Wisconsin. A Massachusetts minister named Manasseh Cutler was instrumental in opening this vast territory to veterans of the Revolutionary War and their families for settlement. Included in the Northwest Ordinance were three remarkable conditions: freedom of religion, free universal education, and most importantly, the prohibition of slavery. In 1788 the first band of pioneers set out from New England for the Northwest Territory under the leadership of Revolutionary War veteran General Rufus Putnam. They settled in what is now Marietta on the banks of the Ohio River. McCullough tells the story through five major characters: Cutler and Putnam; Cutler’s son Ephraim; and two other men,

one a carpenter turned architect, and the other a physician who became a prominent pioneer in American science. They and their families created a town in a primeval wilderness, while coping with such frontier realities as floods, fires, wolves and bears, no roads or bridges, no guarantees of any sort, all the while negotiating a contentious and sometimes hostile relationship with the native people. Like so many of McCullough's subjects, they let no obstacle deter or defeat them. Drawn in great part from a rare and all-but-unknown collection of diaries and letters by the key figures, The Pioneers is a uniquely American story of people whose ambition and courage led them to remarkable accomplishments. This is a revelatory and quintessentially American story, written with David McCullough's signature narrative energy.

This document provides the final report of a survey conducted by the 1985 National Assessment of Educational Progress (NAEP) to assess the literary skills of America's young adults. Chapter I provides the rationale for conducting a study of literacy proficiencies of young adults aged 21 to 25. The purpose and conceptual framework of the research are set against a brief discussion of prior assessment efforts. Chapter II reviews the instrumentation and methodology (focusing on the assessment design), the data collection activities, the scoring and entry of data, and the scaling of the simulation tasks. Major sections of Chapter III deal with the dimensionality of literacy skills, scaling the adult literacy tasks, and describing and anchoring the literacy scales. Chapter IV profiles proficiencies for the total group of young adults assessed

on each of three literacy scales. Chapter V compares young adults with in-school populations and describes performance at five levels of reading proficiency. Young adults are characterized in Chapter VI using three variables as a framework--race/ethnicity, parental education, and respondent's education. Chapter VII presents analyses investigating the relationship among demographic characteristics, educational variables, literacy practices and the four literacy outcome measures. The oral-language assessment is described in Chapter VIII. Appendices contain: (1) sampling, weighting, and sample error estimation; (2) scaling and scoring procedures; (3) data; (4) the background and attitude questionnaire; and (5) a list of consultants used to develop and review assessment and exercises.
