Heartsaver First Aid Student Workbook (International English)

2015 Handbook of Emergency Cardiovascular Care for Healthcare Providers

2020 Heartsave First Aid CPR AED Student Workbook

2020 Handbook of Emergency Cardiovascular Care for Healthcare Providers (International English)

Product 15-2805

Rev. ed. of: First aid/CPR/AED for schools and the community. 3rd ed. c2006.

20-2804

This New American Red Cros CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

Advanced Cardiovascular Life Support (ACLS) Instructor Package

Literature Review from the year 2017 in the subject Medicine - Hospital Environment, Clinical Medicine, grade: 1, Egerton University, language: English, abstract: Over the years, the American Heart Association has made outstanding contributions and numerous improvements to cardiopulmonary resuscitation and advanced cardiac life support guidelines. It is due to adequate use of resources and continuous research that millions of lives are saved in the United States. Such guidelines serve health care providers and other members of the healthcare team as a resource to ensure adequate and timely response to those individuals who experience cardiac or respiratory arrest. However, according to AHA statistics, "More than 326,000 people in the US suffer out-of-hospital cardiac arrests each year. Statistics prove that if more people knew CPR, more lives could be saved" (American Heart Association, 2016). In other words, dissemination of knowledge on the matter has direct outcomes on increasing survival rates. Therefore, the guidelines and the implementation methods are on continuous review based on new evidence. It is important to provide those who suffer cardiac or respiratory arrest with timely services because delays could end up affecting the outcome of those who experience reversible damage. Healthcare providers around the world have become informed on the benefits of updated competence and direct patient outcomes and quality of care. The American Heart Association has published the new

2015 cardiopulmonary resuscitation guidelines, where changes and updates are reflected in an effort to put the best available evidence in practice. The purpose of this review is to compare the 2015 AHA updates with historical evidence in an attempt to explicate the implications and limitations of pharmacology in advanced cardiac life support.

Instructor CD contents include: Precourse materials -- Course materials -- Evaluation materials -- Resources.

The first official book adapted from the hit NBC show, American Ninja Warrior—published to coincide with the 10th anniversary. Every week, millions of viewers tune in to NBC's American Ninja Warrior, to watch as ninjas from every walk of life attempt to complete a series of iconic obstacles of increasing difficulty in the hope of becoming an American Ninja Warrior. Now, for the first time, readers get a never before seen look at the phenomenon that has taken the world by storm. With stories from the show 's hosts, creators, and top contestants about preparing, training, and becoming an American Ninja Warrior, the book is packed with essential info about the legendary obstacle courses along with key fitness and training tips for viewers of all fitness levels. Readers will find amazing insights on how American Ninja Warrior contestants do their best, reach higher, and achieve their spectacular feats. Full of vibrant color photos, sidebars, boxes, and lists, the first official book of American Ninja Warrior will not only be a thrilling and instructive read, it will be a beautiful inside look at the show and the perfect gift for every fan.

*Now published in partnership with the National Association of EMTs, the Second Edition of this national continuing education curriculum is the most credible and complete source of prehospital medical information for the older population. Geriatric Education for Emergency Medical Services (GEMS), Second Edition builds off the previous edition and includes expanded content that will cover new areas addressed in the National EMS Education Standards, including mobile integrated healthcare and disasters. The GEMS course is an innovative, comprehensive, and highly interactive 1-day course for both BLS and ALS providers with: *Online Precourse Modules*Case-based lectures*Live action video*Hands-on skill stations*Small group scenarios New to the Second Edition: A 2-day ALS course option is also available, featuring 8 hours of interactive online modules. The online courseware provides more advanced, in-depth content for ALS providers and explores the role of mobile integrated healthcare in improving the quality of life for older patients.*

Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

Product 15-2849

Basic Life Support (BLS) Provider Manual - The content in this handbook is in compliance with the 2020 guidelines for CPR and ECC (Emergency Cardiac Care), recently released by the American Heart Association - therefore, all the protocols illustrated in this book are based on up-to-date evidence. These guidelines are updated every 5 years. The BLS Provider Manual is a complete guide and reference that covers all the information students need to know in order to successfully complete the BLS course. For easier learning, multiple-cl

questions can be found at the end of each chapter. The answers to these exercises are found at the very end of the book. Basic Life Support (BLS) refers to a set of procedures that can be learned to prolong survival in life-threatening situations until more professional help is available. Any individual can become certified in basic life support protocols. These protocols are frequently updated, based on the latest evidence available, and every individual who undergoes BLS certification may need to refresh their knowledge every two years. Medical professionals usually have a sound understanding of basic life support protocols. Even then, it is essential for them to frequently undergo certifications to update their knowledge regarding the latest evidence-based protocols. This handbook is designed for both medical professionals and non-healthcare individuals. It aims to establish a sound understanding of the mechanisms underlying basic life support. The intended audience is healthcare students and personnel who need to learn how to perform CPR and other basic cardiovascular life support skills in a wide variety of both clinical and prehospital settings. The required student text for the classroom-based Advanced Cardiovascular Life Support for Experienced Providers (ACLS EP) course, an important reference for Instructors. Full-color softcover, 480 pages, 8 1/2" x 11," plus the ACLS EP Systematic Approach Pocket Reference Card and the 2-card Advanced Cardiovascular Life Support (ACLS) Pocket Reference Card Set (90- 1012). Based on 2010 American Heart Association Guidelines for CPR and ECC.

BLS Reference Card

Family and Friends CPR Student Manual (Spanish)

CPR/AED for the Professional Rescuer

Heartsaver Pediatric First Aid CPR AED Student Workbook

Family & Friends CPR

Discusses the history and techniques of swimming and diving, safety rescue techniques, and skills for a variety of aquatic activities.

The student workbook for the credentialed Heartsaver Pediatric First Aid course. Provides information on how to manage illness and injuries in a child during the first few minutes of an emergency until professional help arrives. Includes four core modules: First Aid Basics, Injuries and Illnesses, Life-Threatening Emergencies and the Chain of Survival, and CPR and AED. Also includes optional modules, such as Use of a Nebulizer, to meet regulations for day-care centers in certain states. Workbook comes shrink-wrapped with the Heartsaver Pediatric First Aid Quick Reference Guide (#80-1002), the Adult CPR And AED Reminder Card, the Child And Infant CPR And AED Reminder Card, and a CD containing supplemental information and video clips on CPR and AED skills. An ideal resource for first responders, child-care workers, teachers, foster-care workers, camp counselors, youth organizations, coaches/Little League organizations, as well as parents, grandparents, and baby sitters.

Mastering ACLS.

2020 Handbook of Emergency Cardiovascular Care for Healthcare Providers (International English)

Pediatric Resuscitation is reviewed in this issue of Pediatric Clinics of North America, guest edited by Drs. Steve Schein and Arno Zaritsky. Authorities in the field have come together to pen articles on Background and Epidemiology; CPR - Why Emphasis?; Airway Management; Arrhythmias, Cardioversion, and Defibrillation; Vascular Access and Medications; Medication Administration; Emergency Teams; Teamwork in Resuscitation; Resuscitation Education; Outcome Following Cardiac Arrest; Extracorporeal Life Support during CPR; Post-resuscitation Care; and Future Directions.

Mastering ACLS, Second Edition will help health care professionals successfully complete the American Heart Association Advanced Cardiac Life Support course and certification exam. This quick-review outline-format study guide covers the knowledge and skills needed for ACLS—including detailed, illustrated life support techniques, core case studies, arrhythmia and defibrillation procedures, I.V. techniques, cardiovascular pharmacology, myocardial infarction, and special resuscitation techniques. Now in full color, this edition features 200 illustrations and algorithms, expanded chapter quizzes, a comprehensive text, and information on automated external defibrillators, and additional case scenarios in the Megacode and other chapters. This book also reviews Basic Cardiac Life Support guidelines.
