The Sierra Nevada Adventure Guide

One afternoon in 1987, two renegade climbers in Berkeley, California, hatched an ambitious plan: under the cover of darkness, they would rappel down from a carefully scouted highway on-ramp, gluing artificial handholds onto the load-bearing concrete pillars underneath. Equipped with ingenuity, strong adhesive, and an urban guerilla attitude, Jim Thornburg and Scott Frye created a serviceable climbing wall. But what they were part of was a greater development: the expansion and reimagining of a sport now slated for a highly anticipated Olympic debut in 2020. High Drama explores rock climbing's transformation from a pursuit of select anti-establishment vagabonds to a sport embraced by competitors of all ages, social classes, and backgrounds. Climbing magazine's John Burgman weaves a multi-layered story of traditionalists and opportunists, grassroots organizers and business-minded developers, free-spirited rebels and rigorously coached athletes.

• A fresh perspective on a famous father and a legacy forged on the icy slopes of Mount Everest, the world's highest peak In 1963, the world followed the first American Mount Everest Expedition, and watched as "Big Jim" Whittaker became the first American to stand on top of the world. He returned home a hero. My Old Man and the Mountain is Leif Whittaker's engaging and humorous story of what it was like to "grow up Whittaker"—the youngest son of Jim Whittaker and Dianne Roberts, in an extended family of accomplished climbers. He shares glimpses of his upbringing and how the pressure to climb started early on. Readers learn of his first adventures with family in the Olympic Mountains and on Mount Rainier; his close yet at times competitive relationship with his brother Joss; his battle with a serious back injury; and his efforts to stand apart from his father's legacy. With wry honesty he depicts being a recent college grad, still living in his parents' home and trying to find a purpose in life—digging ditches, building houses, selling t-shirts to tourists—until a chance encounter leads to the opportunity to climb Everest, just like his father did. Leif heads to Nepal with all the excitement, irony, boredom, and trepidation that are part of high-altitude climbing. Well-known guides Dave Hahn and Melissa Arnot figure prominently in his story, as does "Big Jim." But Leif's story is not his father's story. It's a unique coming of age tale on the steep slopes of Everest and a climbing adventure that lights the imagination and fills an emotional human endeavor with universal meaning.

Christopher Columbus needed a sponsor for a dangerous expedition, but the king of Portugal wasn't interested. He repackaged his proposal for the queen of Spain. She put Columbus on retainer, and the rest is history. Columbus may not have been the first to discover America, but he had a great publicist. That's where Jeff Blumenfeld comes in. For many years, using a PR specialty called adventure marketing, Jeff has connected explorers and their projects with corporate sponsors looking to demonstrate product performance in extreme conditions. His book takes the reader from Erik Weihenmayer's expedition to be the first blind man to summit Mount Everest, to the first confirmed dogsled expedition of the North Pole, to Audrey Mestre's deadly free dive expedition off Bayahibe beach in the Dominican Republic. You Want to Go Where? is the only book that not only takes you behind the scenes of some of the most dangerous adventure expeditions in recent years, but also shows how you can fund and arrange your own trip, including details on everything from grants to sponsorships. For anyone who's ever had a dream to scale the tallest mountain or cross the largest ocean, You Want to Go Where? is your ticket. Full of fascinating stories and practical advice, it's ideal for armchair explorers and budding adventurers alike.

The 'outdoors' is a physical and ideological space in which people engage with their environment, but it is also an important vehicle for learning and for leisure. The Routledge Handbook of Outdoor Studies is the first book to attempt to define and survey the multi-disciplinary set of approaches that constitute the broad field of outdoor studies, including outdoor recreation, outdoor education, adventure education, environmental studies, physical culture studies and leisure studies. It reflects upon the often haphazard development of outdoor studies as a discipline, critically assesses current knowledge in outdoor studies, and identifies further opportunities for future research in this area. With a broader sweep than any other book yet published on the topic, this handbook traces the philosophical and conceptual contours of the discipline, as well as exploring key contemporary topics and debates, and identifying important issues in education and professional practice. It examines the cultural, social and political contexts in which people experience the outdoors, including perspectives on outdoor studies from a wide range of countries, providing the perfect foundation for any student, researcher, educator or outdoors practitioner looking to deepen their professional knowledge of the outdoors and our engagement with the world around us.

* For climbers who know the basics and are ready to venture at higher altitudes* Written by longtime guides and climbing instructors certified by the American Mountain Guide Association (AMGA)* Teaches situational thinking and learning as well as techniqueThis intermediate-level guide addresses tools, skills, and techniques used in alpine terrain including rock, snow, ice, and glaciers at moderate altitude - approximately 5000 meters (16,000 feet) and lower. The technical protection systems are covered, of course. But 30 years of alpine climbing experience has convinced the authors that mastery - and safety - lie in the far more difficult task of knowing exactly which techniques to use, where and when. Therefore, they teach step-by-step decision-making skills, providing scenarios, checklists, and self-posed questions to inform the decision process.

Alpine Climbing assumes some prior knowledge, primarily in rock climbing skills and techniques. Basic knots, belaying,rappelling, building rock anchors, leading, placing rock protection, and movement skills on rock: variations of these skills that are of particular value in the alpine environment are addressed in this book.
