2021 Reprint of the 1925 Edition. The Man Nobody Knows is the second book by the American author and advertising executive Bruce Fairchild Barton. In it, Barton presents Jesus as "The Founder of Modern Business," in an effort to make the Christian story accessible to businessmen of the time. When published in 1925, the book topped the nonfiction bestseller list, and was one of the best-selling non-fiction books of the 20th century. Since its publication, The Man Nobody Knows has divided readers. Some welcome the portrayal of Jesus as a strong character, whom no one dared oppose, and praise the use of familiar stereotypes to stimulate interest in religion, whilst others ridicule the suggestion that Jesus was a salesman. Critics have suggested that The Man Nobody Knows is a prime example of the materialism and "glorified Rotarianism" of the Protestant churches in the 1920s.

This book is a guide on roughing it by expert woodsman George Washington Sears. It has been performed on stage, film, and television since 1935 and was the basis for the opera *Assassinio nella Cattedrale* by the Italian composer Ildebrando Pizzetti.

This book condemns slavery, by appealing to whites' rational self-interest, rather than any altruism towards blacks. Helper claimed that slavery hurt the Southern economy by preventing economic development and industrialization, and that it was the main reason why the South had progressed so much less than the North since the late 18th century.

Words of wisdom from American philanthropist Andrew Carnegie
Focusing on Carnegie's most famous essay, "The Gospel of Wealth," this book of his writings, published here together for the first time, demonstrates the late steel magnate's beliefs on wealth, poverty, the public good, and capitalism. Carnegie's commitment to ensuring and promoting the welfare of his fellow human beings through philanthropic deeds ranged from donations to universities and museums to

establishing more than 2,500 public libraries in the English-speaking world, and he gave away more than \$350 million toward those efforts during his lifetime. The Gospel of Wealth is an eloquent testament to the importance of charitable giving for the public good. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. This work offers a fresh approach to understanding how emotions and stress influence health. Zautra presents a convincing case for understanding our emotions in two dimensions - the pursuit of the positive and defense against the negative.

This book examines the 'preventive counter-revolution,' a programme of reforms and repression that transformed the face of Russian politics during Vladimir Putin's second term as president. Kremlin propagandists hailed this programme as a defence of national sovereignty against Western attempts to foment a 'velvet revolution' in Russia. But this book shows that the Putin regime was reacting to a real domestic threat: opposition leaders and youth activists who had begun to employ 'velvet' revolutionary methods in a campaign to harness popular grievances and to challenge Putin in the streets and at the ballot box. It traces the formulation and implementation of the regime's two-track response, which was based on a careful analysis of the lessons of the recent 'velvet' (or 'coloured') revolutions in Georgia and Ukraine. The first track was repressive: the imposition

of controls on NGOs, restrictions on electoral competition, and a crackdown on opposition demonstrations. The second was the mobilisation of supporters in 'patriotic' youth organisations that employed both gang violence and 'velvet' revolutionary techniques. Drawing on a wide range of Russian-language sources, including opposition activists' blogs, this book charts the end of Russia's experiment with liberal democracy and the emergence of a new type of authoritarian order.

A New York Times Notable Book: A psychologist's "gripping and thought-provoking" look at how and why our brains sometimes fail us (Steven Pinker, author of How the Mind Works). In this intriguing study, Harvard psychologist Daniel L. Schacter explores the memory miscues that occur in everyday life, placing them into seven categories: absent-mindedness, transience, blocking, misattribution, suggestibility, bias, and persistence. Illustrating these concepts with vivid examples—case studies, literary excerpts, experimental evidence, and accounts of highly visible news events such as the O. J. Simpson verdict, Bill Clinton's grand jury testimony, and the search for the Oklahoma City bomber—he also delves into striking new scientific research, giving us a glimpse of the fascinating neurology of memory and offering "insight into common malfunctions of the mind" (USA Today). "Though memory failure can amount to little more than a mild annoyance, the consequences of misattribution in eyewitness testimony can be devastating, as can the consequences of suggestibility among pre-school children and among adults with 'false memory syndrome' . . . Drawing upon recent neuroimaging research that allows a glimpse of the brain as it learns and remembers, Schacter guides his readers on a fascinating journey of the human mind." —Library Journal "Clear, entertaining and provocative . . . Encourages a new appreciation of the complexity and fragility of memory." —The Seattle Times

“Should be required reading for police, lawyers, psychologists, and anyone else who wants to understand how memory can go terribly wrong.” –The Atlanta Journal-Constitution “A fascinating journey through paths of memory, its open avenues and blind alleys . . . Lucid, engaging, and enjoyable.” –Jerome Groopman, MD “Compelling in its science and its probing examination of everyday life, The Seven Sins of Memory is also a delightful book, lively and clear.” –Chicago Tribune Winner of the William James Book Award
