An Examination of the role of the professional school counselor in promoting school culture among school faculty, staff and administration

An Examination of the Role of Individual, Motivational, and Work Environmental Factors
Research has revealed the important role that school culture plays on student development in the social, academic, and career readiness domains. Many school districts suffer from problematic school cultures that impede their students' success. This project explores the role that professional school counselors play in promoting positive school through the professional development of teachers, and staff. It additionally explores the historical legislative policies that have impacted school culture, and delves into the implications that a positive school culture has on the teachers, students, and community members of the school district. The professional development generated by the project seeks to improve meaningful staff relationships, through self-exploration and reflection. The hope is that such

An Examination of the Role of Nursing Within the International Evidence Based Health Care Practice Movement. Discussion paper 2

This research aims to investigate the role or roles of the physical Jerusalem temple within the second temple Jewish writings in terms of whether the physical temple has any role to play in relation to the pivot point in eschatology. The pivot point or fulcrum in time refers to the end of the exile and perhaps the beginning of the eschaton. The exile may be theological, but many second temple Jewish texts address the physical gathering of the children of Israel to the land of Israel (i.e., from physical exile, even if the text also addresses a theological exile), thus, making the return a complete ingathering of the children of Israel. The passages of these ancient texts have been analysed before, but never with this lens.

Looking to see if there is any role the Jerusalem Temple performs in expected eschatological events will at least allow an answer to be given, which is better than never asking the question in the first place, which has been the case until now. This study produces results as the Jerusalem Temple has always been a place of great expectations.
