This book has evolved by processes of selection and expansion from its predecessor, Practical Scanning Electron Microscopy (PSEM), published by Plenum Press in 1975. The interaction of the authors with students at the Short Course on Scanning Electron Microscopy and X-Ray Microanalysis held annually at Lehigh University has helped greatly in developing this textbook. The material has been chosen to provide a student with a general introduction to the techniques of scanning

The central question becomes: How much 'power to tax' would the citizen voluntarily grant to government as a party to some initial social contract devising a fiscal constitution? Those in office are assumed to exploit the power assigned to them to the maximum possible extent: government is modelled as 'revenue-maximizing
