

## Anatomy And Physiology Past Papers

*Following the success of previous editions, Anatomy and Physiology for Nurses continues to be an excellent reference resource in anatomy and physiology for students of nursing and allied health, as well as for healthcare assistants and those studying Foundation degrees or diplomas in health studies. Its easy-to-understand approach and small size make it an excellent revision tool and invaluable to take on placements. Now enhanced with full colour illustrations throughout, this book is the perfect guide to aid learning and understanding. This new edition includes: Clear text, diagrams, images and tables to aid the learning process Learning objectives to help with learning and revision Questions to test your knowledge Clinical examples to help relate the theory to practice Full colour images for the most effective reference Clear text, diagrams, images and tables to aid the learning process Learning objectives to help with learning and revision Questions to test your knowledge Clinical examples to help relate the theory to practice Full colour images for the most effective reference Full colour artwork programme Updated questions for each chapter Updated clinical content, ensure it is up to date and relevant This book provides two thousand multiple choice questions on human anatomy and physiology, separated into 40 categories. The answer to each question is accompanied by an explanation. Each category has an introduction to set the scene for the questions to come. However not all possible information is provided within these Introductions, so an Anatomy and Physiology textbook is an indispensable aid to understanding the answers. The questions have been used in examinations for undergraduate introductory courses and as such reflect the focus of these particular courses and are pitched at the level to challenge students that are beginning their training in anatomy and physiology. The questions and answer combinations are to be used both by teachers, to select questions for their next examinations, and by students, when studying for an upcoming test. Students enrolled in the courses for which these questions were written include nursing, midwifery, paramedic, physiotherapy, occupational therapy, nutrition & dietetics, health sciences and students taking an anatomy and physiology course as an elective.*
