"Aimed specifically at students and those returning to nursing, this book should dispel any fears. It informs the reader of the key facts, but the authors are mindful not to overwhelm their readers nor to over-burden with detail. ... It is an ideal book to have close by for anyone studying nursing. ... Recommended." Karen Smyth, Nursing Student, University of Ulster, THES, Feb 2010 "At last a good text adapted for the UK market. Having listened to the pronunciation guide I am happy now to recommend this text. Good points: case studies linked to UK practice, I like the combination approach, the study skills advice, the targetting of learning theory to learning A&P, including adrenaline with epinephrine in brackets, interspersing calculations as exercises, good test activities, good reading for intro to A&P (ch. 2), good references (eg ch3), good reference to child/infant for burn extimation, good clinical application (eg assessing peripheral perfusion activity -pinching nail), good to see photographs." Penny Goacher, School of Nursing and Midwifery, University of East Anglia "This fabulous book presents anatomy and physiology in a visually stimulating way, taking readers on a journey through what many view as a complex maze of systems. It embraces a variety of approaches to learning, with chapters on the body systems, sections on learning the language of anatomy, reading the body map, biochemistry, and study skills. The information is presented in a way that makes this book invaluable" Valerie McGurk, practice development facilitator, paediatrics, Northampton General Hospital NHS Trust (reviewed in Nursing Standard magazine, July 7-13 2010 edition)
