Essad Bey, the sickly son of an oil millionaire from Baku, Azerbaijan, receives permission from his father to spend the summer with his "milk brother" Ali Khan, passing the holiday in his home village in the wild Caucasus. So the two set out, under the custody of a wise attendant, into an archaic world in which chivalry counted more than buying power and poets were more highly regarded than princes – into a country in which, as a kind of curiosity shop of world history, all that is outlived and forgotten was loyally preserved. This is Essad Bey's second book, which was first published in 1930. In it the author draws upon his Oriental imaginative powers, conjuring a vast panorama of the Caucasus, its people and customs. The result is a fresh and densely atmospheric work, even if not always laying claim to scientific accuracy. Often adding a touch of imagination, the author succeeds in bringing the heart and soul of this archaic world to life, which he had himself experienced and learned to love as a child.

Columbus Discovered America . . . But Who Discovered Europe? Were the ancient Egyptians black? Did Egyptian explorers land in Greece some 4,000 years ago? Did they plant colonies, establish royal houses, and bring civilization to Europe's savage tribes? Did the secret rites of their temple cults later resurface among the Knights Templar and the Freemasons? In *Black Spark, White Fire*, Richard Poe provides startling answers to these questions and more. "Brilliant. . . . Poe has produced a classic volume . . . splendid in its conception and powerful in its execution—a major work."—Molefi Kete Asante, author of *The Afrocentric Idea* "Superb. . . . I am convinced that within 20 years Richard Poe's views will be seen as closer to the historical truth than those of the present defenders of the status quo. The book is clear, well-written, and hard to put down. While we disagree on a number of issues, *Black Spark, White Fire* is the popular book that I am incapable of writing."—Martin Bernal, author of *Black Athena* "It is refreshing to hear the Afrocentric theory of ancient Egypt argued so persuasively, from a viewpoint that is neither liberal nor conservative, black nor white."—Armstrong Williams, syndicated columnist and TV talk show host

In *Nature Knows No Color-Line*, originally published in 1952, historian Joel Augustus Rogers examines the origins of racial hierarchy and the color problem. Rogers was a humanist who believed that there were no scientifically evident racial divisions—all humans belong to one "race." He believed that color prejudice generally evolved from issues of domination and power between two physiologically different groups. According to Rogers, color prejudice was then used as a rationale for domination, subjugation and warfare. Societies developed myths and prejudices in order to pursue their own interests at the expense of other groups. This book argues that many instances of the contributions of black people had been left out of the books, and gives many examples.

David MacRitchie (16 April 1851 – 14 January 1925) was a Scottish folklorist and antiquarian. He argued that "the un-identified builders of our stone-circles, cairns, and dolmens, were skinned people."

Who were the first Britons, and what sort of world did they occupy? In A History of Ancient Britain, much-loved historian Neil Oliver turns a spotlight on the very beginnings of the story of Britain; on the first people to occupy these islands and their battle for survival. There has been human habitation in Britain, regularly interrupted by Ice Ages, for the best part of a million years. The last retreat of the glaciers 12,000 years ago brought a new and warmer age and with it, one of the greatest tsunamis recorded on Earth which struck the north-east of Britain, devastating the population and flooding the low-lying plains of what is now the North Sea. The resulting island became, in time, home to a diverse range of cultures and peoples who have left behind them some of the most extraordinary and enigmatic monuments in the world. Through what is revealed by the artefacts of the past, Neil Oliver weaves the epic story - half a million years of human history up to the departure of the Roman Empire in the Fifth Century AD. It was a

period which accounts for more than ninety-nine per cent of humankind's presence on these islands. It is the real story of Britain and of her people.

Named a Best Book of the Year by NPR and Science Friday A quest to explore some of the most spectacular ancient cities in human history—and figure out why people abandoned them. In Four Lost Cities, acclaimed science journalist Annalee Newitz takes readers on an entertaining and mind-bending adventure into the deep history of urban life. Investigating across the centuries and around the world, Newitz explores the rise and fall of four ancient cities, each the center of a sophisticated civilization: the Neolithic site of Çatalhöyük in Central Turkey, the Roman vacation town of Pompeii on Italy's southern coast, the medieval megacity of Angkor in Cambodia, and the indigenous metropolis Cahokia, which stood beside the Mississippi River where East St. Louis is today. Newitz travels to all four sites and investigates the cutting-edge research in archaeology, revealing the mix of environmental changes and political turmoil that doomed these ancient settlements. Tracing the early development of urban planning, Newitz also introduces us to the often anonymous workers—slaves, women, immigrants, and manual laborers—who built these cities and created monuments that lasted millennia. Four Lost Cities is a journey into the forgotten past, but, foreseeing a future in which the majority of people on Earth will be living in cities, it may also reveal something of our own fate.

The Phoenician Origin of Britons, Scots & Anglo-Saxons

Why are we speaking English? Replenishing the Earth gives a new answer to that question, uncovering a 'settler revolution' that took place from the early nineteenth century that led to the explosive settlement of the American West and its forgotten twin, the British West, comprising the settler dominions of Canada, Australia, New Zealand, and South Africa. This book will reshape understandings of American, British, and British dominion histories in the long 19th century. It is a story that has such crucial implications for the histories of settler societies, the homelands that spawned them, and the indigenous peoples who resisted them, that their full histories cannot be written without it.

This volume work of Scottish Historian David Mac Ritchie, 1851-1925, first published in 1884 and long out of print, its impact will have as profound an impact as Gerald Massey and Godfrey Higgins. In recent years researchers, both affiliated and independent, have done exciting new research on black people in Britain in the eighteenth and early nineteenth centuries, and even earlier. This book gathers this new work on people and events into a single, exciting new volume.

Four Lost Cities: A Secret History of the Urban Age

In London Is The Place for Me, Kennetta Hammond Perry explores how Afro-Caribbean migrants navigated the politics of race and citizenship in Britain and reconfigured the boundaries of

what it meant to be both Black and British at a critical juncture in the history of Empire and twentieth century transnational race politics. She situates their experience within a broader context of Black imperial and diasporic political participation, and examines the pushback—both legal and physical—that the migrants' presence provoked. Bringing together a variety of sources including calypso music, photographs, migrant narratives, and records of grassroots Black political organizations, *London Is the Place for Me* positions Black Britons as part of wider public debates both at home and abroad about citizenship, the meaning of Britishness and the politics of race in the second half of the twentieth century.

In two volumes. Volume II: contains 130 plates, each depicting 15 family crests in b&w and a further 18 plates illustrating regalia, insignia, crowns, flags, monograms, arms of principal cities etc. also in b&w. There is a key to all the plates which, in the case of the crests, shows which families have which crest.

Ancient and Modern Britons

Ancient And Modern Britons:

Ancient and Modern Britons. A retrospect

This book investigates the ways in which ideas associated with the Celtic and the Classical have been used to construct identities (national/ethnic/regional etc.) in Britain, from the period of the Roman conquest to the present day.

Between Wales and England is an exploration of eighteenth-century anglophone Welsh writing by authors for whom English-language literature was mostly a secondary concern. In its process, the work interrogates these authors' views on the newly-emerging sense of 'Britishness', finding them in many cases to be more nuanced and less resistant than has generally been considered. It looks primarily at the English-language works of Lewis Morris, Evan Evans, and Edward Williams (Iolo Morganwg) in the context of both their Welsh- and English-language influences and time spent travelling between the two countries, considering how these authors responded to and reimagined the new national identity through their poetry and prose.

Includes selections from Xenophon, Antiphon and Euripides.

In the north of England, far from the intrusions of cities but not far from civilization, Silvie and her family are living as if they are ancient Britons, surviving by the tools and knowledge of the Iron Age. For two weeks, the length of her father's vacation, they join an anthropology course set to reenact life in simpler times. They are surrounded by forests of birch and rowan; they make stew from foraged roots and hunted rabbit. The students are fulfilling their coursework; Silvie's father is fulfilling his lifelong obsession. He has raised her on stories of early man, taken her to witness rare artifacts, recounted time and again their rituals and beliefs—particularly their sacrifices to the bog. Mixing with the students, Silvie begins to see, hear, and imagine another kind of life, one that might include going to university, traveling beyond England, choosing her own clothes and food, speaking her mind. The ancient Britons built ghost walls to ward off enemy invaders, rude barricades of stakes topped with ancestral skulls. When the group builds one of their own, they find a spiritual connection to the past. What comes next but human sacrifice? A story at once mythic and strikingly timely, Sarah Moss's Ghost Wall urges us to wonder how far we have come from the "primitive minds" of our ancestors.*
