Your Hands-On Guide to SAP Business Information Warehouse Give your company the competitive edge by delivering up-to-date, pertinent business reports to users inside and outside your enterprise. SAP Business Information Warehouse Reporting shows you how to construct Enterprise Data Warehouses, create workbooks and queries, analyze and format results, and supply meaningful reports. Learn how to use the BEx and Web Analyzers, Web Application Designer, Visual Composer, and Information Broadcaster. You will also find out how to forecast future business trends, build enterprise portals and websites, and tune performance. Group data into InfoCubes and DataStore Objects and generate reports using queries and workbooks Work with the BEx Analyzer, Web Analyzer, and Query Designer Build queries and reports using the Business Administration Workbench Add attachments and drill-through using Document Integration and RRI Format and distribute results using Report Designer and Information Broadcaster Extend functionality with Enterprise Portal, Data Modeling, and Visual Composer Deploy charts, maps, diagrams, and unit of measure conversions Predict trends and possible outcomes using SBC and Integrated Planning Generate HTML pages using Enterprise Reporting and Web Application Designer Create BI-based corporate Web and intranet sites using SAP Enterprise Portal Modelling and Reporting with SAP BW> Detailed introduction > Practical functions> Comprehensive, step by step case studyPeter Lehmann, Klaus Freyburger, Andreas Seufert, Wolfgang Zirn, Sven Grasse, Christian SuhlThe SAP Business Information Warehouse becomes progressively more important as the infrastructure for corporate analysis and management. What we aim at with this book, is to provide a general understanding for the terms in the data warehouse area. Based on this, we will teach the functionality and applications of SAP BW together with its analysis and reporting aspects. In this respect, we'll be focusing on the Administrator Workbench as a tool for modelling multidimensional information structures, together with the potential to analyse data from the end-users' perspective as well as identifying some of the key functions to create web-based companywide reports. With a case study for the analysis of key sales figures, the functions of SAP BW are introduced step by step and explained in detail. This book is addressed to everybody who wants to read up quickly, comprehensively and practically on SAP BW and therefore especially to decision makers, consultants and project collaborators. Last but not least, it is especially suitable for lecturers and university students. The SAP Business Information Warehouse becomes progressively more important as the infrastructure for corporate analysis and management. "SAP R/3 Reporting" shows how to deliver effective reports for every area of the enterprise. It's the first book to focus specifically on SAP R/3 reporting. Curran begins by introducing SAP R/3's key information systems, data resources, and business processes. Next, he reviews specific reports for financials, logistics, HR, asset management, and shows how to build reports that are readable, accurate, and timely. Finally, Curran introduces ActiveSheets, third-party software that streamlines reporting by working through Microsoft Excel. A working ActiveSheets demo is included on CD-ROM.

This tightly-focused guide zeroes in on the crucial reporting options available in SAP for Fixed Assets Accounting, teaching readers how to manage and supervise fixed assets with the SAP ERP Financials Asset Accounting (FI-AA) component. Based on ECC 6.0, the author sheds light on the complete reporting solution for the Asset Accounting sub-module of SAP. You will learn about standard SAP ERP-delivered asset reports, including balance-based reports and transaction-based reports. You will also expand your knowledge of asset-specific reporting tools such as sort versions, simulation versions, currency translations, plus how to effectively use all the Asset Accounting reporting options at your disposal. - Basic Asset Accounting Reporting Features - Balance Reports - Transaction Reports - Asset History Sheet Report - Specialty Reports - US Tax Reporting - Reporting Tools

The definitive reference for building actionable business intelligence—completely revised for SAP BusinessObjects BI 4.0. Unleash the full potential of business intelligence with fact-based decisions, aligned to business goals, using reports and dashboards that lead from insight to action. SAP BusinessObjects BI 4.0: The Complete Reference offers completely updated coverage of the latest BI platform. Find out how to work with the new Information Design Tool to create universes that access multiple data sources and SAP BW. See how to translate complex business questions into highly efficient Web Intelligence queries and publish your results to the BI Launchpad. Learn how to create dashboards from data sourced through a universe or spreadsheet. The most important concepts for universe designers, report and dashboard authors, and business analysts are fully explained and illustrated by screenshots, diagrams, and step-by-step instructions. Establish and evolve BI goals Maximize your BI investments by offering the right module to the right user Create robust universes with the Information Design Tool, leveraging multiple data sources, derived tables, aggregate awareness, and parameters Develop a security plan that is scalable and flexible Design Web Intelligence reports from basic to advanced Create sophisticated calculations and advanced formatting to highlight critical business trends Build powerful dashboards to embed in PowerPoint or the BI Launchpad Use Explorer to visually navigate large data sets and uncover patterns

Start making better business decisions backed by data About This Book Predict new opportunities and risks in a few mouse clicks Eliminate complexity with tools that let you plan, analyze, and collaborate in context—in real time Discover, visualize, plan, and predict in a single product with agile BI tools Who This Book Is For This book targets IT professionals, business analysts, BI developers, managers, newcomers to SAP Analytics Cloud, and ultimately anyone who wants to learn from self-paced, professional guidance and needs a solid foundation in SAP Analytics Cloud. What You Will Learn A clear understanding of SAP Analytics Cloud platform Create data models using different data sources, including Excel and text files . Present professional analyses using different types of charts, tables, geo maps, and more Using stories, drill up and down instantly to analyze data from various angles Share completed stories with other team members or compile them in SAP Digital Boardroom agendas for presentation to major stakeholders Export the results of a story to a PDF file Save time by planning, analyzing, predicting, and collaborating in context Discover, visualize, plan, and predict in one product as opposed to separate solutions In Detail The book starts with the basics of SAP Analytics Cloud (formerly known as SAP BusinessObjects Cloud) and exposes almost every significant feature a beginner needs to master. Packed with illustrations and short, essential, to-the-point descriptions, the book provides a unique learning experience. Your journey of exploration starts with a basic introduction to the SAP Analytics Cloud platform. You will then learn about different segments of the product, such as Models, Stories, Digital Boardroom, and so on. Then, you are introduced to the

product's interface: the Home screen, the main menu, and more. Then comes the hands-on aspect of the book, which starts with model creation. Next, you learn how to utilize a model to prepare different types of stories(reports) with the help of charts, tables, Geo Maps, and more. In the final chapters of this book, you will learn about Digital Boardroom, Collaboration, and Administration. Style and approach The easy-to-follow visual instructions provided in this book help business users and report developers create simple and complex stories (reports) quickly

SAP BW Reporting Made Easy

SAP Analysis for Microsoft Office--Practical Guide

HR Reporting with SAP

SAP S/4HANA Central Finance and Group Reporting

If you are a business analyst, BI developer, or an IT professional who wants to learn the A to Z of how to work with Web Intelligence reporting tools and different types of data, then this book is for you. The only thing you need is a basic understanding of what Business Intelligence is and data concepts.

This book is written for SAP Controlling (CO) professionals who want to learn expert tips to optimize their system performance for configuration, reconciliation, and reporting. Using a fictional chocolate manufacturing case study, each tip provides detailed information on aspects of the functionality, how it can help you, why you should use it, and how to use it including SAP configuration steps. Obtain best practices for optimizing cost allocation methods, expediting material ledger close, and utilizing cost center overhead charges. Troubleshoot product costing messages and find out how to prevent GL account overrides during inventory posting transactions. Walk through best practices for effectively maintaining master data and standard costing methods. By using an integrated practical example and screenshots, the author informs readers on how to get the most out of their SAP ERP system. - Optimize SAP ERP Controlling configuration, reconciliation, and reporting - Transaction processing tips to ensure accurate data capture - Instructions for avoiding common month-end close pain points - Reporting and reconciliation best practices

Work smarter with SAP Crystal Reports!Have you ever spent hours on a report only to discover that you could have saved time with a simple tip? Here you go: SAP PRESS equips you with “100 Things” that unlock the secrets of reporting with SAP Crystal Reports.With this book, users of all levels will:• Save timeWith the shortcuts and workarounds provided, you will learn how to complete your daily SAP Crystal Reports tasks faster and more elegantly.• Learn quicklyFull of screenshots and instructions, this book will help you pick up new tips and tricks in no time, such as effective formatting options or performance boosters.• Develop new skillsYou'll discover new ways of doing your work and find yourself saying, "I wish I'd known how to do this a long time ago!"Tip #75You can find and delete stubborn parameters in a report!When creating

reports that have parameters, it's easy to lose track of everywhere that they are used. As such, when it comes time to delete a specific parameter, you may struggle to find all the places it's referenced. With this tip, you'll learn how to effectively locate and delete these stubborn parameters. Find out more on page 250!

Perform financial consolidation in your SAP S/4HANA system! With this guide to SAP S/4HANA Finance for group reporting, learn about the new group reporting architecture and data model. Configure your master data and integrate transactional data for consolidation using the Data Monitor. Walk through your key consolidation tasks, including currency translation, intercompany elimination, financial close, reporting, and more. This is your comprehensive group reporting resource! In this book, you'll learn about: a. Configuration Set up master data elements and global settings to align with your exact specifications. Configure the Data Monitor dashboard to perform transactional data tasks such as data integration, balance carryforward, and data validation. b. Consolidation Follow step-by-step instructions to run your required consolidation processes. Translate currencies, perform intercompany elimination and matrix consolidation, manage consolidation entries, and execute financial close. c. Reporting Walk through the reporting architecture with CDS views and learn about available reporting tools. Use predefined local and group reports, drill-through functionality, and ad-hoc reporting. Highlights include: 1) Architecture 2) Master data 3) Transactional data 4) Data Monitor 5) Consolidation Monitor 6) Currency translation 7) Intercompany elimination 8)

Consolidation of investments 9) Consolidation journal entries 10) Matrix consolidation 11) Financial close 12) Reporting

Companies are required to implement a new accounting standard in January 2018 - the IFRS 15 standard for revenue from contracts with customers. In the process, they have the unique chance to do more than just fulfill a regulation: The implementation is an opportunity to critically assess processes for revenue accounting and improve inefficient "business-as-usual" processes. When the standard is implemented together with process improvements and powerful software, your company can gain a competitive advantage and significantly lower the cost of becoming compliant. Those companies that drag their feet and have to comply on a manual basis each month after January 2018 will be at a disadvantage, due to the high cost of manually reconciling accounts and creating reports. In this book, you will learn the regulatory background of IFRS 15 and how to best meet the challenges associated with implementation, based on examples from the telecommunications and software industries. "IFRS 15: Revenue from contracts with customers, with SAP Revenue Accounting and Reporting" prepares organizations for the impact of the standard on processes throughout the company that are related to revenue recognition. The authors explore: - How the most important IFRS 15 framework, the 5-step model, works - How different areas of your company will be affected by IFRS 15 - How IFRS 15 implementation works with the solution from one vendor, SAP's Revenue Accounting and Reporting (SAP RAR) module.

This expertly written guide provides business users, IT users, and SAP consultants with an overview of key closing concepts and detailed insights into how to implement SAP S/4HANA Cloud for advanced financial closing (AFC) utilizing the capabilities of SAP Business Technology Platform (BTP) to meet month-end closing requirements. Explore SAP S/4HANA closing concepts for advanced financial closing (AFC), focusing on three key aspects—the “What”, the “Why” and the “How”—of month-end closing activities. Take a look at key functionality and learn how to use different AFC Fiori apps on SAP BTP to define a global template, execute closing activities, and monitor and analyze the entire closing cycle in real-time using a Fiori-based dashboard and reports. Explore how to use configuration apps to enable user roles, authorizations, system access, and end-to-end orchestration of closing activities between AFC and financial backend systems such as SAP S/4HANA. Examine some key points to consider during an AFC implementation, including examples and a roadmap for the future. Using screenshots and examples from the field, the author covers: - Global template design and setup - Analytics and reporting - Configuration and user management - AFC Implementation at a glance

Your Guide to Data Warehousing and BW

- Understand and implement strategies for optimizing financials reporting capabilities
- Master the best practices for simplifying, streamlining, and automating financial and management reporting
- Learn how to integrate Financials reporting with SAP ERP, SAP NetWeaver BW, and SAP BusinessObjects

This book provides finance and IT teams with best practices for delivering financial reports faster, more accurately, and in compliance with various international accounting standards. Featuring step-by-step coverage of all major FI reporting functions (including Sub-Ledger, Corporate Finance Management, and Governance, Risk & Compliance), this book will help you streamline and simplify financial business processes and automate financial

and management reporting in SAP ERP Financials. This new edition includes updated content on statutory reporting, segment reporting, AP and AR reports in SAP ERP, Consolidated Financial Reporting, as well as the most recent reporting tools in SAP ERP, SAP BusinessObjects.

This must-have guide teaches you how to efficiently implement, apply, and extend HR reporting using SAP. First, you'll uncover best practices for conceptualizing your reporting strategy and methods, including the basic usage principles for logical databases and how to carry out authorization checks. Next, you'll learn about the strengths and weaknesses of the various reporting tools, as well as the critical success factors to consider for successful reporting. Then, you'll explore standard evaluations and their uses in individual HCM components, as well as the BI standard content. Finally, you'll review all of the tools used for presenting reports and analysis, including standard SAP reports, queries, and SAP NetWeaver BI. Drawing from the authors' extensive experience, this book is essential for understanding HR reporting. Fully up-to-date for SAP ERP 6.0, it is also compatible with R/3 Enterprise and SAP ERP 2004.

Highlights Include: \* Enterprise SOA \* SAP MDM \* Value Proposition \* ABAP and XML \* As-Is Assessment Scorecard \* MDM Maturity Model \* Quality and Governance \* Deployment \* Requirements and Tools \* Integrating with SAP NetWeaver XI, SAP Solution Manager, and ARIS

Enhance your SAP HANA skills using this step-by-step guide to creating and reporting data models for real-time analytics

About This Book This book will help you to process analytical and transactional data in real time with the help of SAP HANA. Walk through the steps of the data modeling process and build various data models and artifacts in SAP HANA Studio. Packed with rich examples and use cases that are closely focused on developing real-time applications.

Who This Book Is For If you are a SAP HANA data modeler, developer, implementation/migration consultant, project manager, or architect who is responsible for implementing/migrating to SAP HANA, then this book is for you.

What You Will Learn Get to grips with the basic building blocks of Analytics/Data models in the SAP HANA environment. Discover various schemas, modeling principles, Joins, and the architecture of the SAP HANA engine. Build data models and artifacts in Sap HANA Studio. Design decision tables and understand the concept of transport management in the SAP HANA landscape. Work with the different views in SAP HANA Studio. Explore full-text search and fuzzy search in SAP HANA. Create your own scenarios and use cases using sample data and code.

In Detail SAP HANA is an in-memory database created by SAP. SAP HANA breaks traditional database barriers to simplify IT landscapes, eliminating data preparation, pre-

aggregation, and tuning. SAP HANA and in-memory computing allow you to instantly access huge volumes of structured and unstructured data, including text data, from different sources. Starting with data modeling, this fast-paced guide shows you how to add a system to SAP HANA Studio, create a schema, packages, and delivery unit. Moving on, you'll get an understanding of real-time replication via SLT and learn how to use SAP HANA Studio to perform this. We'll also have a quick look at SAP Business Object DATA service and SAP Direct Extractor for Data Load. After that, you will learn to create HANA artifacts—Analytical Privileges and Calculation View. At the end of the book, we will explore the SMART DATA access option and AFL library, and finally deliver pre-packaged functionality that can be used to build information models faster and easier. Style and approach This is an easy-to-follow, step-by-step, rapid guide to help you learn analytics in SAP HANA through ample hands-on exercises and use case scenarios.

Modelling and Reporting With SAP Business Information Warehouse 3.5

Preparing consolidated financial statements for an enterprise with a parent and one or more subsidiaries requires a detailed review of underlying transactions in order to properly reflect results and financial position. For large, integrated, and multinational organizations, likely with millions of transactions, it is imperative that the financial accounting software facilitate this process. This expertly written guide focuses on leveraging SAP S/4HANA Finance for group reporting. Explore key functionality and how the universal journal has led to the evolution of the group reporting solution. Using a detailed case study, the author discusses configuration and master data and walks the reader through the period-end process for consolidation and explores reports using financial transactions that have already been entered into SAP S/4HANA Finance for group reporting. Explore reports delivered with SAP S/4HANA Finance for group reporting. This book is targeted at both finance professionals and the functional consultants who perform the configuration and execution of processes for preparing consolidated financial statements. By using practical examples, tips, and screenshots, this book covers:

- SAP S/4HANA Finance for group reporting and the universal journal
- Configuration and master data
- Period-end process for consolidation
- Reporting and analysis

SAP BI Edge is a powerful business intelligence (BI) solution for midsize companies. This book offers a comprehensive overview of what to expect and where you should start building your reporting framework. You'll get detailed information on reporting tools, like Information Designer, Universe Designer, BI Launchpad, Crystal Reports,

and Dashboards (formerly XCelsius). Get tips for creating an InfoSet strategy and leverage it to run reports. Learn how to use the Information Design Tool (IDT) to design data models and layer your data to create universes. Identify the common queries you will need to get started and walk through how to publish SAP reporting data in a web format and create practical management dashboards. By using practical examples, tips, screenshots, and a case study the author brings readers new to SAP BI Edge up to speed on the fundamentals. - Installation and setup tips for SAP BI Edge with SAP ERP - Query and reporting tools best practices - How to build a dynamic SAP ERP data model based on your configuration - Step-by-step instructions on how to create a SAP BI universe

Managing your SAP data in Microsoft Excel? This is your guide to using SAP Analysis for Microsoft Office! Get started with the basics, from creating your first workbook to navigating through reports. Then, follow step-by-step instructions to process data, analyze data, develop planning applications, customize reports, and work with tools such as formulas and macros. Including details on troubleshooting, UI customization, and more, this book is your all-in-one resource! In this book, you'll learn about: a. Reporting and Data Analysis Learn to work with reports in SAP Analysis for Microsoft Office: define parameters with prompts, adjust formatting and styles, and extend reports with local data. Filter, sort, and display your data using hierarchies, and refine data analysis with simple and advanced calculations. b. Planning Use your SAP data to develop planning workbooks. Plan your data both manually and with functions and sequences. Understand key settings for cell locking, the planning model, and more. c. Advanced Features Take your skills to the next level. Write formulas to use in your reports, and create and use macros in your workbooks, including steps to use API methods, callbacks, and design rules. Highlights include: 1) Workbook creation 2) Report navigation 3) Prompts 4) Data processing, organization, and analysis 5) Planning applications 6) Report customization and formatting 7) Formulas 8) Macros 9) Configuration 10) Troubleshooting
