Softbound Interactive Student Text is divided into a two-volume set that is perfed and 3-hole punched for easy organization for middle school students. This is volume two.

With an accessible approach, the third European edition of Principles of Economics provides students with the tools to analyze current economic issues. The book is underpinned by a focus on seven Core Principles, which help students to make the link between economic theory and practice. The 'economic naturalist' approach, supported by exercises, problems and examples, encourages

students to employ economics principles to understand and explain the world around them. Developed from the well-regarded US textbook by Frank and Bernanke, it presents an intuitive approach to economics and is suitable for all students taking a Principles of Economics course. The Glencoe Math Student Edition is an interactive text that engages students and assist with learning and organization. It personalizes the learning experience for every student. The write-in text, 3-hole punched, perfed pages allow students to organize while they are learning.

The third edition of Vis-À-vis continues the excitement of the innovative second edition with a fully integrated and revised multimedia package and updated cultural information presented in the "Correspondance" feature (chapter opening letter, postcard, or e-mail, which is answered in the mid-lesson "Correspondance" cultural spread) and in the new "Bienvenue dans le monde francophone" feature that recurs after every four chapters in the text. The overall goal of the revision remains the same as that of the second edition: to promote a balanced four-skills approach to learning French through a wide variety of listening, speaking, reading, and writing activities, while introducing students to the richness and diversity of the Francophone world.

It's All Connected Math Connectsis intended for use in all elementary math classes as a balanced basal approach to

teaching mathematics. Math Connects is the elementary

portion of the vertically aligned PreK to 8 Math Connects program from Macmillan/McGraw-Hill and Glencoe. This

program is designed to excite your students about learning mathematics while at the same time providing you, the

teacher, with all the tools and materials you will need to teach the program. Your students will be motivated as they

solve real-world problems such as creatures under the sea; emperors of the ice; and roller coaster physics. A variety of

teacher materials are available to meets the needs of all your students, from early finisher to English learner

FitWell empowers students to become active participants in

their own health through a first-of-its-kind student-centered approach. McGraw-Hill conducted extensive market

research with over 4,000 students to gain insight into their studying and buying behavior. Students told us they wanted more portability with innovative visual appeal and content that is designed according to the way they learn. Instructors we surveyed told us they wanted a way to engage their students without compromising on high quality content. Our findings concluded that students who actively participated in their own learning actually retained more information and were able to apply it more often to their every day lives. How could we build a program for students that would promote active learning while providing visual appeal, portability, and relevance? We are excited to introduce to you the first-of-its kind program for Fitness and Wellness. FitWell delivers the serious content you want in both a magazine-style format that's fun to read and an online learning space that commands active learning. We began by collecting over 1,000 Fitness and Wellness questions asked by real students. Questions like, "How can I improve my self-esteem?" or "Do I really need 8 glasses of water a day?" introduce each section of material throughout the program. With its series of assignable videos that debunk common health and fitness myths ("Sit Ups Make Your Stomach Flatter" or "Marijuana gives you munchies"), FitWell grabs hold of students' attention and doesn't let go. The real-life behavior change case study videos found online provide students with unmatched relevance. Students click, watch, and learn: these videos follow real college students attempting to change their behavior for an entire semester, and hopefully for life. With its online Fitness assessments,

assignable interactive animations, and online labs, FitWell engages students like no other fitness and wellness program. The Right Conversations: To make our program relevant, we wanted to understand what students care about when it comes to their health and well-being. It turned out, when it comes to Fitness and Wellness, students had a lot of questions! We compiled over 1,000 questions that students asked our authors. These real student questions like, “Can colds really come from stress?” or “What’s the best exercise for me?” introduce each section of material, ensuring the content that follows is always research-based and relevant. Instead of passively reading, your students actively engage in questions, answers, and conversations that are of interest to them. The Right Instruction: Assign your students a series of short video clips throughout the semester that track the progress of real students making behavior changes in their lives. Follow Greg on his quest to begin exercising and watch him document his challenges on camera. Will he be able to make lasting, healthy choices? Your students will have to tune in and find out for themselves! Captivate your students by assigning “Myth/Fact” videos that explore common myths, like “Oily Foods Give You Acne”, and separate the fact from fiction. Students actively work through the FitWell system online and in their magazine-style text, completing fitness assessments, interactive animations, and labs. Not only does this format produce measurable results that are documented online, but the focus on active learning is the first step towards inspiring more active students. The Right Time: The time is right for a flexible hybrid print-digital learning

system that meets students online, where they already work, play, and live.

Intermediate Accounting, 3e, by Spiceland/Sepe/Tomassini will gain support in traditional and technology-driven accounting departments, especially those looking for a more concise, decision-making text that reinforces challenging concepts via CD-ROM. The revision of this text is based around a "Learning System." The revision of this "Learning System" was built on improving the clarity of the chapters, emphasizing more decision-making in order to prepare students for the changes taking place on the CPA exam, acknowledging the diversity of students and their learning styles by creating supplemental materials to assure the success of every student, and creating a consistent text and supplemental package for both students and instructor's giving us the best possible intermediate text on the market. Returning to the Third edition is the award winning "Coach" CD-ROM. The Coach CD-ROM is a multimedia product integrating audio and video clips, animated illustrations, cases, and alternative reading material that helps students comprehend some of the more difficult topics associated with intermediate accounting. Designed specifically for the Spiceland text, instructors and students will find these learning tools placed strategically throughout the text. This is the most comprehensive Learning System in Intermediate Accounting. At only 1120 pages (300 pages less than the average intermediate accounting text), Spiceland/S/T has not sacrificed content for pages. Instead, the authors have created a very flexible text with a student friendly writing

style that focuses on explaining not just how to apply a procedure, but why it's applied.

We are pleased to present this Global Edition, which has been developed specifically to acquaint students of business with the fundamental tools of managerial accounting and to promote their understanding of the dramatic ways in which business is changing. The emphasis is on teaching students to use accounting information to best manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. There is significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing while also including traditional topics such as job-order costing, budgeting, and performance evaluation. Many of the real-world examples in the Management Accounting Practice boxes have been revised and updated to make them more current and several new examples have been

added. This Global Edition has been adapted to meet the needs of courses outside the United States and does not align with the instructor and student resources available with the U.S. edition.

The approach used by Hoyle, Schaefer, and Doupnik in the new edition allows students to think critically about accounting, just as they will do while preparing for the CPA exam and in their future careers. With this text,

students gain a well-balanced appreciation of the Accounting profession. As Hoyle 12e introduces them to the field's many aspects, it often focuses on past controversies and present resolutions. The text continues to show the development of financial reporting as a product of intense and considered debate that continues today and into the future. The writing style of the eleven previous editions has been highly praised. Students easily comprehend chapter concepts because of the conversational tone used throughout the book. The authors have made every effort to ensure that the writing style remains engaging, lively, and consistent which has made this text the market leading text in the Advanced Accounting market. The 12th edition includes an increased integration of IFRS as well as updated accounting standards.

Serious Science with an Approach Built for Today's Students Smith's Organic Chemistry continues to breathe new life into the organic chemistry world. This new fourth edition retains its popular delivery of organic chemistry content in a student-friendly format. Janice Smith draws on her extensive teaching background to deliver organic chemistry in a way in which students learn: with limited use of text paragraphs, and through concisely written bulleted lists and highly detailed, well-labeled "teaching" illustrations. Don't make your text decision without seeing Organic Chemistry, 4th edition by Janice Gorzynski Smith!

Communication Research: Asking Questions, Finding Answers covers basic research issues

and processes, both quantitative and qualitative, appropriate for communication students with little or no previous research methods experience. The text's guiding principle is that methodological choices are made from one's research questions or hypotheses. This avoids the pitfall in which students learn one methodology or one methodological skill and then force that method to answer all types of questions. Instead of working with one methodology to answer all types of questions, students come away understanding a variety of methods and how to apply them appropriately.
