A new and chilling study of lethal human exploitation in the Soviet forced labor camps, one of the pillars of Stalinist terror In a shocking new study of life and death in Stalin's Gulag, historian Golfo Alexopoulos suggests that Soviet forced labor camps were driven by brutal exploitation and often administered as death camps. The first study to examine the Gulag penal system through the lens of health, medicine, and human exploitation, this extraordinary work draws from previously inaccessible archives to offer a chilling new view of one of the pillars of Stalinist terror.

In the early 19th century, most of New York's farmland was controlled by a few families. In 1839, some tenants created a movement to destroy the estates and to redistribute the land. This work brings to life the voices of antebellum northern farmers as they debated social and political issues.

Drawing on new archaeological evidence, an authoritative history of Rome's Great Fire—and how it inflicted lasting harm on the Roman Empire According to legend, the Roman emperor Nero set fire to his majestic imperial capital on the night of July 19, AD 64 and fiddled while the city burned. It's a story that has been told for more than two millennia—and it's likely that almost none of it is true. In *Rome Is Burning*, distinguished Roman historian Anthony Barrett sets the record straight, providing a comprehensive and authoritative account of the Great Fire of Rome, its immediate aftermath, and its damaging longterm consequences for the Roman world. Drawing on remarkable new archaeological discoveries and sifting through all the literary evidence, he tells what is known about what actually happened—and argues that the disaster was a turning point in Roman history, one that ultimately led to the fall of Nero and the end of the dynasty that began with Julius Caesar. *Rome Is Burning* tells how the fire destroyed much of the city and

## Access Free Antique Maps 180201 Media Illustration

threw the population into panic. It describes how it also destroyed Nero's golden image and provoked a financial crisis and currency devaluation that made a permanent impact on the Roman economy. Most importantly, the book surveys, and includes many photographs of, recent archaeological evidence that shows visible traces of the fire's destruction. Finally, the book describes the fire's continuing afterlife in literature, opera, ballet, and film. A richly detailed and scrupulously factual narrative of an event that has always been shrouded in myth, *Rome Is Burning* promises to become the standard account of the Great Fire of Rome for our time.

The Bicentennial of the United States of America

As media environments and communication practices evolve over time, so do theoretical concepts. This book analyzes some of the most well-known and fiercely discussed concepts of the digital age from a historical perspective, showing how many of them have pre-digital roots and how they have changed and still are constantly changing in the digital era. Written by leading authors in media and communication studies, the chapters historicize 16 concepts that have become central in the digital media literature, focusing on three main areas. The first part, *Technologies and Connections*, historicises concepts like network, media convergence, multimedia, interactivity and artificial intelligence. The second one is related to Agency

and Politics and explores global governance, datafication, fake news, echo chambers, digital media activism. The last one, Users and Practices, is finally devoted to telepresence, digital loneliness, amateurism, user generated content, fandom and authenticity. The book aims to shed light on how concepts emerge and are co-shaped, circulated, used and reappropriated in different contexts. It argues for the need for a conceptual media and communication history that will reveal new developments without concealing continuities and it demonstrates how the analogue/digital dichotomy is often a misleading one.

**Lunar Science: A Post-Apollo View: Scientific Results and Insights from the Lunar Samples** explains the scientific results and discoveries of the manned Apollo lunar missions as they are understood. The emphasis is less on sample description and data and more on the interpretative aspects of the study, with the aim of providing a coherent story of the evolution of the moon and its origin as revealed by the lunar samples and the Apollo missions.

This text has seven chapters; the first of which provides a historical background of efforts to study the moon prior to the Apollo missions, including lunar photogeologic mapping and direct exploration by spacecraft. Attention then turns to the Apollo missions and the lunar samples collected, beginning with Apollo 11 that landed on the moon on July 20, 1969 and followed by more missions. The next chapter describes the geology of the moon, with emphasis on craters, central peaks and peak rings, the large ringed basins, rilles, and maria lava flows. The reader is

## Access Free Antique Maps 180201 Media Illustration

also introduced to the nature of the lunar surface material, the maria basalts, the highlands, and the moon's interior. This book concludes with a discussion on the evidence that has been gathered by the Apollo missions that offers insights into the origin and evolution of the moon. An epilogue reflects on the usefulness of manned space flight. This book will appeal to lunar scientists as well as to those with an interest in astronomy and space exploration.

Hesiod's 'Works and Days' was often performed in its entirety, but was also relentlessly excerpted, quoted, and reapplied. This volume situates the poem within these two modes of reading and argues that the text itself, through Hesiod's complex mechanism of rendering elements detachable whilst tethering them to their context for the purposes of the poem, sustains both treatments.

That Tyrant, Persuasion

Robert Louis Stevenson and the Pictorial Text explores the genesis, production and the critical appreciation of the illustrations to the fiction of Robert Louis Stevenson. Stevenson is one of the most copied and interpreted authors of the late nineteenth century,

## Access Free Antique Maps 180201 Media Illustration

especially his novels *Treasure Island* and *Strange Case of Dr Jekyll and Mr Hyde*. These interpretations began with the illustration of his texts in their early editions, often with Stevenson's express consent, and this book traces Stevenson's understanding and critical responses to the artists employed to illustrate his texts. In doing so, it attempts to position Stevenson as an important thinker and writer on the subject of illustrated literature, and on the marriage of literature and visual arts, at a moment preceding the dawn of cinema, and the rejection of such popular tropes by modernist writers of the early twentieth century. The "Vínland Map" first surfaced on the antiquarian market in 1957 and the map's authenticity has been hotly debated ever since—in controversies ranging from the anomalous composition of the ink and the map's lack of provenance to a plethora of historical and cartographical riddles. *Maps, Myths, and Men* is the first work to address the full range of this debate. Focusing closely on what the map in fact shows, the book contains a critique of the 1965 work *The Vinland Map and the Tartar Relation*; scrutinizes the marketing strategies used in 1957; and covers many aspects of the map that demonstrate it is a modern fake, such as literary evidence and several scientific ink analyses performed between 1967 and 2002. The author explains a number of the riddles and provides evidence for both the identity of the mapmaker and the source of the parchment used, and she applies current knowledge of medieval Norse culture and exploration to counter widespread misinformation

about Norse voyages to North America and about the Norse world picture.

Engaging Minds: Cultures of Education and Practices of Teaching explores the diverse beliefs and practices that define the current landscape of formal education. The 3rd edition of this introduction to interdisciplinary studies of teaching and learning to teach is restructured around four prominent historical moments in formal education: Standardized Education, Authentic Education, Democratic Citizenship Education, Systemic Sustainability Education. These moments serve as the foci of the four sections of the book, each with three chapters dealing respectively with history, epistemology, and pedagogy within the moment. This structure makes it possible to read the book in two ways - either "horizontally" through the four in-depth treatments of the moments or "vertically" through coherent threads of history, epistemology, and pedagogy. Pedagogical features include suggestions for delving deeper to get at subtleties that can't be simply stated or appreciated through reading alone, several strategies to highlight and distinguish important vocabulary in the text, and more than 150 key theorists and researchers included among the search terms and in the Influences section rather than a formal reference list.

Fantasy Roleplaying Game Starter Set  
How Rhetoric Shaped the Roman World  
Lunar Science: A Post - Apollo View

*Innovation is about change, and media products and services are changing. The processes of production and distribution of media are changing. The ownership and financing of media are changing. The roles of users are changing. And our ideas about media are changing. This book argues that innovation theory provides better tools for media researchers who wish to understand and explain current developments in the media landscape ? tools that not only allow them to see completely new things, but also to investigate aspects of new media that would otherwise not be as accessible. The various chapters of the book present selected studies that together illustrate how a more explicit focus on innovation and innovation theory can provide new insights into and generates knowledge about how media innovations develop, the sociocultural conditions of such innovations, the role of technology, and power relations in media developments. Everything you need to start playing the world's greatest roleplaying game. "I recommend [the D&D Starter Set] for anyone who's curious and wants to learn D&D."*—Ed

reviews the main objects and monuments of the ancient Greek world, emphasizing the context and function of these artefacts in their particular place and time. Students are led to a rich understanding of how objects were meant to be perceived, what 'messages' they transmitted and how the surrounding environment shaped their meaning. The book contains nearly five hundred illustrations (with over four hundred in colour), including specially commissioned photographs, maps, floorplans and reconstructions. Judith M. Barringer examines a variety of media, including marble and bronze sculpture, public and domestic architecture, painted vases, coins, mosaics, terracotta figurines, reliefs, jewellery and wall paintings. Numerous text boxes, chapter summaries and timelines, complemented by a detailed glossary, support student learning.

**How rhetorical training influenced deeds**

## Access Free Antique Maps 180201 Media Illustration

as well as words in the Roman Empire The assassins of Julius Caesar cried out that they had killed a tyrant, and days later their colleagues in the Senate proposed rewards for this act of tyrannicide. The killers and their supporters spoke as if they were following a well-known script. They were. Their education was chiefly in rhetoric and as boys they would all have heard and given speeches on a ubiquitous set of themes—including one asserting that “he who kills a tyrant shall receive a reward from the city.” In *That Tyrant, Persuasion*, J. E. Lendon explores how rhetorical education in the Roman world influenced not only the words of literature but also momentous deeds: the killing of Julius Caesar, what civic buildings and monuments were built, what laws were made, and, ultimately, how the empire itself should be run. Presenting a new account of Roman rhetorical education and its surprising practical consequences, *That Tyrant, Persuasion* shows how rhetoric created a grandiose imaginary world for the Roman ruling elite—and how they struggled to force the real world to conform to it. Without rhetorical education, the Roman world would have been unimaginably different.

*Tangata Whenua: An Illustrated History*

## Access Free Antique Maps 180201 Media Illustration

*charts the sweep of M?ori history from ancient origins through to the twenty-first century. Through narrative and images, it offers a striking overview of the past, grounded in specific localities and histories. The story begins with the migration of ancestral peoples out of South China, some 5,000 years ago. Moving through the Pacific, these early voyagers arrived in Aotearoa early in the second millennium AD, establishing themselves as tangata whenua in the place that would become New Zealand. By the nineteenth century, another wave of settlers brought new technology, ideas and trading opportunities - and a struggle for control of the land. Survival and resilience shape the history as it extends into the twentieth century, through two world wars, the growth of an urban culture, rising protest, and Treaty settlements. Today, at the beginning of the twenty-first century, M?ori are drawing on both international connections and their ancestral place in Aotearoa. Fifteen stunning chapters bring together scholarship in history, archaeology, traditional narratives and oral sources. A parallel commentary is offered through more than 500 images, ranging from the elegant shapes of ancient taonga and artefacts to impressions of*

*M?ori in the sketchbooks and paintings of early European observers, through the shifting focus of the photographer's lens to the response of contemporary M?ori artists to all that has gone before. The many threads of history are entwined in this compelling narrative of the people and the land, the story of a rich past that illuminates the present and will inform the future.*

*For thousands of years, people have used nature to justify their political, moral, and social judgments. Such appeals to the moral authority of nature are still very much with us today, as heated debates over genetically modified organisms and human cloning testify. The Moral Authority of Nature offers a wide-ranging account of how people have used nature to think about what counts as good, beautiful, just, or valuable. The eighteen essays cover a diverse array of topics, including the connection of cosmic and human orders in ancient Greece, medieval notions of sexual disorder, early modern contexts for categorizing individuals and judging acts as "against nature," race and the origin of humans, ecological economics, and radical feminism. The essays also range widely in time and place, from archaic Greece to early twentieth-century China,*

A comprehensive and richly illustrated history of one of the most important athletic, religious, and political sites in the ancient Greek and Roman world The memory of ancient Olympia lives on in the form of the modern Olympic Games. But in the ancient era, Olympia was renowned for far more than its athletic contests. In Olympia, Judith Barringer provides a comprehensive and richly illustrated history of one of the most important sites in the ancient Greek and Roman

## Access Free Antique Maps 180201 Media Illustration

world, where athletic competitions took place alongside—and were closely connected with—crucial religious and political activities. Barringer describes the development of the Altis, the most sacred area of Olympia, where monuments to athletes successful in the games joined those erected to the gods and battlefield victories. Rival city-states and rulers built monuments to establish eminence, tout alliances, and join this illustrious company in a rich intergenerational dialogue. The political importance of Olympia was matched by its place as the largest sanctuary dedicated to Zeus, king of the gods. Befitting Zeus ' s role as god of warfare, the Olympian oracle was consulted to ensure good omens for war, and the athletic games embodied the fierce competition of battle. Other gods and heroes were worshipped at Olympia too, Hera, Artemis, and Herakles among them. Drawing on a comprehensive knowledge of the archaeological record, Barringer describes the full span of Olympia ' s history, from the first monumental building around 600 BC to the site ' s gradual eclipse in the late Christianized Roman empire. Extensively illustrated with maps and diagrams, Olympia brings the development of Olympia vividly to life for modern readers.

This bestselling text by Charles Barber recounts the history of the English language from its ancestry to the present day.

**Since the very beginnings of the digital humanities, Papyrology has been in the vanguard of the application of information technologies to its own scientific purposes, for both theoretical and practical reasons (the strong awareness towards the problems of human memory and the material ways of preserving it; the need to work with a multifarious and overwhelming amount of different data). After more than thirty years of development, we have now at our disposal the most advanced tools to make papyrological studies more and more effective, and even to create a new conception of "papyrology" and a new model of "edition" of the ancient documents. At this turning point, it is important to build an epistemological framework including all the different expressions of Digital Papyrology, to trace a historical sketch setting the background of the contemporary tools, and to provide a clear overview of the current theoretical and technological trends, so that all the possibilities currently available can be exploited following uniform pathways. The volume represents an innovative attempt to deal with such topics, usually relegated into**

**very quick and general treatments within journal articles or papyrological handbooks. This is a compelling study of the often controversial role and meaning of the new media and digital cultures in contemporary society. Three decades of societal and cultural alignment of new media yielded to a host of innovations, trials, and problems, accompanied by versatile popular and academic discourse. "New Media Studies" crystallized internationally into an established academic discipline, which begs the question: where do we stand now; which new issues have emerged now that new media are taken for granted, and which riddles remain unsolved; and, is contemporary digital culture indeed all about 'you', or do we still not really understand the digital machinery and how it constitutes us as 'you'. From desktop metaphors to Web 2.0 ecosystems, from touch screens to blogging to e-learning, from role-playing games to Cybergoth music to wireless dreams, this timely volume offers a showcase of the most up-to-date research in the field from what may be called a 'digital-materialist' perspective.**

From the 1950s 'girl junkie' to the 1990s 'crack mom', *Using Women* investigates how the cultural representations of women drug users have defined America's drug policies in this century. In analyzing the public's continued fear, horror and outrage wrought by the specter of women using drugs, Nancy Campbell demonstrates the importance that public opinion and popular culture have played in regulating women's lives. The book will chronicle the history of women and drug use, provide a critical policy analysis of the government's drug policies and offer recommendations for the direction our current drug policies should take. *Using Women* includes such chapters as 'Sex, Drugs and Race in the Age of Dope'; 'Regulating Adolescents in the Postwar US'; 'Fifties Femininity'; and 'Regulating Maternal Instinct'.

Pharaoh Akhenaten, who reigned for seventeen years in the fourteenth century B.C.E, is one of the most intriguing rulers of ancient Egypt. His odd appearance and his preoccupation with worshiping the sun disc Aten have stimulated academic discussion and controversy for more than a century. Despite the numerous books and articles about this enigmatic figure, many questions about Akhenaten and the Atenism religion remain unanswered. In *Akhenaten and the Origins of Monotheism*, James K. Hoffmeier argues that Akhenaten was not, as is often said, a radical advocating a new religion, but rather a primitivist: that is, one who reaches back to a golden age and emulates it. Akhenaten's inspiration was the Old Kingdom (2650-2400 B.C.E.), when the sun-god Re/Atum ruled as the unrivaled head of the Egyptian pantheon. Hoffmeier finds that Akhenaten was a genuine convert to the worship of Aten, the sole creator God, based on the Pharaoh's own testimony of a theophany, a divine encounter that launched his monotheistic religious odyssey. The book also explores the Atenist religion's possible relationship to Israel's religion, offering a close comparison of the hymn to the Aten to Psalm 104, which has been identified by scholars as

influenced by the Egyptian hymn. Through a careful reading of key texts, artworks, and archaeological studies, Hoffmeier provides compelling new insights into a religion that predated Moses and Hebrew monotheism, the impact of Atenism on Egyptian religion and politics, and the aftermath of Akhenaten's reign.

This book explores the process of treaty modification by subsequent practice, explaining how such practice can significantly revise treaty obligations or even create new ones, allowing evolution of the law.
