by Martha R. Taylor. This printed learning aid provides a concept map of each chapter, chapter summaries, word roots, chapter tests, and a variety of interactive questions including multiple-choice, short-answer essay, labeling art, and graph-interpretation questions.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

A coming-of-age memoir by a Colombian-Cuban woman about shaping lessons from home into a new, queer life In this lyrical, coming-of-age memoir, Daisy Hernández chronicles what the women in her Cuban-Colombian family taught her about love, money, and race. Her mother warns her about envidia and men who seduce you with pastries, while one tía bemoans that her niece is turning out to be “una india” instead of an American. Another auntie instructs that when two people are close, they are bound to become like uña y mugre, fingernails and dirt, and that no, Daisy’s father is not godless. He’s simply praying to a candy dish that can be traced back to Africa. These lessons—rooted in women’s experiences of migration, colonization, y cariño—define in evocative detail what it means to grow up female in an immigrant home. In one story, Daisy sets out to defy the dictates of race and class that preoccupy her mother and tías, but dating women and transmen, and coming to identify as bisexual, leads her to unexpected questions. In another piece, NAFTA shuts local factories in her hometown on the outskirts of New York City, and she begins translating unemployment forms for her parents, moving between English and Spanish, as well as private and collective fears. In prose that is both memoir and commentary, Daisy reflects on reporting for the New York Times as the paper is rocked by the biggest plagiarism scandal in its history and plunged into debates about the role of race in the newsroom. A heartfelt exploration of family, identity, and language, *A Cup of Water Under My Bed* is ultimately a daughter’s story of finding herself and her community, and of creating a new, queer life.
