This classic introduction to the study of history invites the reader to stand back and consider some of its most fundamental questions – what is the point of studying history? How do we know about the past? Does an objective historical truth exist and can we ever access it? In answering these central questions, John Tosh argues that, despite the impression of fragmentation created by Postmodernism in recent years, history is a coherent discipline which still bears the imprint of its nineteenth-century origins. Consistently clear-sighted, he provides a lively and compelling guide to a complex and sometimes controversial subject, while making his readers vividly aware of just how far our historical knowledge is conditioned by the character of the sources and the methods of the historians who work on them. History does not stand still, and this updated seventh edition deals with complex and wide-ranging material in a clear and accessible way that is up-to-date with current historiographical trends. A fuller treatment is given to the importance of digitization both in the section on source criticism and in relation to public history, reflecting its growing importance within historical study. Both the text and references have been expanded to include a fuller range of both American and global scholarship, and the book concludes with a forthright reminder that historical perspective illuminates major problems in the present. Lucid and engaging, this edition retains the user-friendly features that make it a favourite with both students and lecturers, including marginal glosses, illustrations and suggestions for further reading. Along with its companion website, this is an essential guide to the theory and practice of history.

Over a lifetime of studying Cuban Santería and other religions related to Orisha worship—practices also found among the Yoruba in West Africa—Stephan Palmié has grown progressively uneasy with the assumptions inherent in the very term Afro-Cuban religion. In The Cooking of History he provides a comprehensive analysis of these assumptions, in the process offering an incisive critique both of the anthropology of religion and of scholarship on the cultural history of the Afro-Atlantic World. Understood largely through its rituals and ceremonies, Santería and related religions have been a challenge for anthropologists to link to a hypothetical African past. But, Palmié argues, precisely by relying on the notion of an aboriginal African past, and by claiming to authenticate these religions via their findings, anthropologists—some of whom have converted to these religions—have exerted considerable influence upon contemporary practices. Critiquing widespread and damaging simplifications that posit religious practices as stable and self-contained, Palmié calls for a drastic new approach that properly situates cultural origins within the complex social environments and scholarly fields in which they are investigated.

Stories Without End is a testament to nearly 40 years of groundbreaking historical research by one of New Zealand's leading scholars. Sitting alongside her major works – including the 2010 Book of the Year, Encircled Lands – these essays explore sidepaths and previously unexamined histories. They notably delve into the lives of powerful early Māori figures, including the prophets Rua Kenana and Te Kooti, their wives and their descendants, and the leaders of the Urewera. Binney brings figures out of the shadows, explores place and revives memory, ensuring that the histories that matter do indeed become stories without end.

In the summer of 1900, hundreds of peasant youths from the villages of north China streamed into Beijing to besiege the foreign legations, attracting the attention of the entire world. War is often described as an extension of politics by violent means. With contributions from twenty-eight eminent historians, Volume 2 of The Cambridge History of the Second World War examines the relationship between ideology and politics in the war's origins, dynamics and consequences. Part I examines the ideologies of the combatants and shows how the war can be understood as a struggle of wiles, ideas and values with the rival powers expressing divergent claims to justice and controlling news from the front in order to sustain moral and influence international opinion. Part II looks at politics from the perspective of pre-war and wartime diplomacy as well as examining the way in which neutrals were treated and behaved. The volume concludes by assessing the impact of states, politics and ideology on the fate of individuals as occupied and liberated peoples, collaborators and resisters, and as British and French colonial subjects.

The work of contemporary Italian thinkers, what Roberto Esposito refers to as Italian Theory, is attracting increasing attention around the world. This book explores the reasons for its growing popularity, its distinguishing traits, and why people are turning to these authors for answers to real-world issues and problems. The approach he takes, in line with the keen historical consciousness of Italian thinkers themselves, is a historical one. He offers insights into the great "unphilosophical" philosophers of life—poets, painters, politicians and revolutionaries, film-makers and literary critics—who have made Italian thought, from its beginnings, an "impure" thought. People like Machiavelli, Croce, Gentile, and Gramsci were all compelled to fulfill important political roles in the societies of their times. No wonder they felt that the abstract vocabulary and concepts of pure philosophy were inadequate to express themselves. Similarly, artists such as Dante, Leonardo Da Vinci, Leopardi, or Pasolini all had to turn to other disciplines outside philosophy in order to discuss and grapple with the messy, constantly changing realities of their lives. For this very reason, says Esposito, because Italian thinkers have always been deeply engaged with the concrete reality of life (rather than closed up in the introspective pursuits of traditional continental philosophy) and because they have looked for the answers of today in the origins of their own historical roots, Italian theory is a "living thought." Hence the relevance or actuality that it holds for us today. Continuing in this tradition, the work of Roberto Esposito is distinguished by its interdisciplinary breadth. In this book, he passes effortlessly from literary criticism to art history, through political history and philosophy, in an expository style that welcomes non-philosophers to engage in the most pressing problems of our times. As in all his works, Esposito is inclusive rather than exclusive; in being so, he celebrates the affirmative potency of life.

Dale L. Morgan (1914–1971) remains one of the most respected historians of the American West—and his career, one of the least understood. Among today's scholars his reputation rests largely on his studies of the fur trade and overland trails, yet throughout his life, Morgan's primary interest was the history of the Latter Day Saints. In this volume—the first of a two-part set—Morgan's writings on the Mormons finally receive the attention and analysis they merit. Dale Morgan on the Mormons is a far-reaching compilation of the historian's published and unpublished writings, edited and annotated by Richard L.

Saunders, the collection includes not only essays but also book reviews and bibliographic studies, many published here for the first time. This first volume includes key extracts from Morgan's contribution to the WPA guide to Utah (1941), which remains an excellent introduction to the complex history of the Beehive State. It further provides a new historiographic introduction to his seminal work The State of Deseret and presents important previously unpublished works on the Kingdom of God, the Deseret Alphabet, and the origins of the infamous Danite society. In addition, the volume illuminates Morgan's legacy as a bibliographer and the significance of that contribution to Latter Day Saint studies. Throughout, Saunders provides informative introductions that place each of the writings or groups of writings into biographical and historical context.
