STATISTICS: LEARNING FROM DATA, by respected and successful author Roxy Peck, resolves common problems faced by both students and instructors with an innovative approach to elementary statistics. Peck tackles the areas students struggle with most--probability, hypothesis testing, and selecting an appropriate method of analysis--unlike any text on the market. Probability coverage is based on current research that shows how students best learn the subject. Two unique chapters, one on statistical inference and another on learning from experiment data, address two common areas of student confusion: choosing a particular inference method and using inference methods with experimental data. Supported by learning objectives, real-data examples and exercises, and technology notes, this brand new text guides students in gaining conceptual understanding, mechanical proficiency, and the ability to put knowledge into practice. Like no other text for the intermediate microeconomics course, Goolsbee, Levitt, and Syverson ' s Microeconomics bridges the gap between today ' s theory and practice, with a strong empirical dimension that lets students tests theory and successfully apply it. With carefully crafted features and vivid examples, Goolsbee, Levitt, and Syverson ' s text helps answer two critical questions students ask, "Do people and firms really act as theory suggests?" and "How can someone use microeconomics in a practical way?" The authors teach in economics departments and business schools and are active empirical microeconomics researchers. Their grounding in different areas of empirical research allows them to present the evidence developed in the last 20 years that has tested and refined fundamental theories. Their teaching and professional experiences are reflected in an outstanding presentation of theories and applications.

Economists make extensive use of assumptions to break down complex problems into simple, analytically manageable parts. This analytical style, while not ultimately more demanding than the styles of thinking in other disciplines, feels unfamiliar to most students and requires practice. Our experience has taught us that what first-year economics students want most from a FlexText is help in mastering course material to do well on examinations. We have developed this FlexText to respond specifically to that demand.
