With a complete, approachable presentation, CRITICAL THINKING: THE ART OF ARGUMENT, 2nd Edition, is an accessible yet rigorous introduction to critical thinking. The text emphasizes immediate application of critical thinking in everyday life and helps students apply the skills they are studying. The relevance of these skills is shown throughout the text by highlighting the advantages of basing one's decisions on a thoughtful understanding of arguments and presenting the overarching commonalities across arguments. With its conversational writing style and carefully selected examples, the book employs a consistent and unified treatment of logical form and an innovative semiformal method of standardizing arguments that illustrates the concept of logical form while maintaining a visible connection to ordinary speech. Without sacrificing accuracy or detail, the authors clearly present the material, with appropriate study tools and exercises that emphasize application rather than memorization. MODERN BUSINESS STATISTICS, 5E allows students to gain a strong conceptual understanding of statistics with a balance of real-world applications and a focus on the integrated strengths of Microsoft Excel 2013. To ensure student understanding, this best-selling, comprehensive text carefully discusses and clearly develops each statistical technique in a solid application setting.Microsoft Excel 2013 instruction, which is integrated in each chapter, plays an integral part in strengthening this edition's applications orientation. Immediately after each easy-to-follow presentation of a statistical procedure, a subsection discusses how to use Excel to perform the procedure. This integrated approach emphasizes the applications of Excel while focusing on the statistical methodology. Step-by-step instructions and screen captures further clarify student learning.A wealth of timely business examples, proven methods, and additional exercises throughout this edition demonstrate how statistical results provide insights into business decisions and present solutions to contemporary business problems. High-quality problems noted for their unwavering accuracy and the authors' signature problem-scenario approach clearly show how to apply statistical methods to practical business situations. New case problems and self-tests allow students to challenge their personal understanding. Eleven short stories of the Cuban immigrant experience as characters adjust to life in the United States, from an award-winning author. From the prize-winning title story—a masterpiece of humor and heartbreak—unfolds a collection of tales that illuminate the landscape of an exiled community rich in heritage, memory, and longing for the past. In Cuba I Was a German Shepherd is at once "tender and sharp-fanged" as Ana Menéndez evocatively charts the territory from Havana to Coral Gables, Florida, and explores whether any of us are capable, or even truly desirous, of outrunning our origins (LA Weekly). "With the grace of Margaret Atwood and the sensuality of Laura Esquivel," Menéndez makes an unforgettable debut "rich in metaphor, wisdom, and delicious subtlety" (St. Petersburg Times).

Seasoned counselors and professors Ron Hawkins and Tim Clinton offer a comprehensive guide that empowers Christian counselors by clarifying their task: to help people take possession of their souls...through the power of the Spirit; under the authority of the Word; in a supportive community of accountability...that they may be like Christ. The authors address head-on today's enticing new imitations of true peace and tantalizing opportunities for people in pain to anesthetize themselves. But they also highlight the foundation of hope: God loves, he empowers, and he refuses to abandon his passion for connection with his children. Case studies illustrate how to help people take possession of the thinking self, the feeling self, the decision-making self, the physical self, and the relational self. This comprehensive plan for effective intervention is perfect for lay counselors, students, and professionals looking for ways to integrate their faith and practice.

Personality Theories: A Global View by leading scholar Eric Shiraev takes a dynamic, integrated, and cross-cultural approach to the study of personality. The text is organized around three general questions: Where did personality theories come from? How did the theorists study facts? How do we apply personality theories now? These questions provide a consistent focus on social context, interdisciplinary science, and applications. Going beyond traditional research from the Western tradition, the book also covers theories and studies rooted in the experiences of other countries and cultures.

As tomorrow's manager, you will be confronted with challenges and opportunities that are more dynamic and complex than ever before. In this fresh new offering to the Intro Psychology course, authors John Cacioppo and Laura Freberg portray psychology as being an integrative science in two ways. First, they have written a text that reflects psychology's rightful place as a hub science that draws from and is cited by research in many other fields. Second, this text presents psychology as a unified science that seeks a complete understanding of the human mind, rather than as a loosely organized set of autonomous subspecialties. As psychology moves rapidly toward maturity as an integrative, multidisciplinary field, the introductory course offers an opportunity to teach all of psychology in one place and at one time. This text reflects that evolution--and the authors' excitement about it. **Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.**
