A2-Level Biology AQA Revision Guide

AQA A Level Biology Student Book 2

The Kite Runner

Exam Board: AQA Level: AS/A-level Subject: Biology First Teaching: September 2015 First Exam: June 2017 Develop students' experimental, analytical and evaluation skills with contemporary and topical biology examples, practical assessment guidance and differentiated end of topic questions, with this AQA Year 2 student book. - Provides support for all 12 required practicals with plenty of activities and data analysis guidance - Develops understanding with engaging and contemporary examples to help students apply their knowledge, analyse data and evaluate findings - Gives detailed guidance and examples of method with a dedicated 'Maths in Biology' chapter and mathematical support throughout to consolidate learning - Offers regular opportunities to test understanding with Test Yourself Questions, Differentiated End of Topic Questions and Stretch and Challenge Questions - Supports exam preparation with synoptic questions, revision tips and skills -Develops understanding with free online access to 'Test yourself' answers and an extended glossary.

What does pleasure have to do with morality? What role, if any, should intuition have in the formation of moral theory? If something is 'simulated', can it be immoral? This accessible and wide-ranging textbook explores these questions and many more. Key ideas in the fields of normative ethics, metaethics and applied ethics are explained rigorously and systematically, with a vivid writing style that enlivens the topics with energy and wit. Individual theories are discussed in detail in the first part of the book, before these positions are applied to a wide range of contemporary situations including business ethics, sexual ethics, and the acceptability of eating animals. A wealth of real-life examples, set out with depth and care, illuminate the complexities of different ethical approaches while conveying their modern-day relevance. This concise and highly engaging resource is tailored to the Ethics components of AQA Philosophy and OCR Religious Studies, with a clear and practical layout that includes end-of-chapter summaries, key terms, and common mistakes to avoid. It should also be of practical use for those teaching Philosophy as part of the International Baccalaureate. Ethics for A-Level is of particular value to students and teachers, but Fisher and Dimmock's precise and scholarly approach will appeal to anyone seeking a rigorous and lively introduction to the challenging subject of ethics. Tailored to the Ethics components of AQA Philosophy and OCR Religious Studies.

'Official SQA Past Papers' provide perfect exam preparation. As well as delivering at least three years of actual past papers - including the 2008 exam - all papers are accompanied by examiner-approved answers to show students how to write the best responses for the most marks.

Written by renowned author Anita Tull and experienced teacher and examiner Alison Palmer, this student book covers both Units of the WJEC Vocational Award in Hospitality and Catering. It is endorsed by WJEC, providing high quality support you can trust. // Suitable for Level 1 and 2 students, the depth of coverage, language and design of the book has been carefully tailored to their learning needs. // Content is presented in a visually engaging fashion, with bite-sized chunks of information together with bulleted lists, charts, tables, spider-grams and more to help ensure students engage with the content in a meaningful way. // Plenty of practical activities together with learning features such as 'Put it into Practice' and 'Scenarios' help students translate their knowledge and understanding to the world of work. // Short and extended answer style questions throughout help prepare students for assessment. // Stretch and challenge activities encourage students to work towards achieving a higher grade.

Learning to Program in Python

Cambridge International AS and A Level Biology

Eduqas Biology for A Level Year 1 and AS

AS Level

Comprehensively revised and updated, this 2nd Edition of the Year 1 & AS Student Book is endorsed by Eduqas, offering high quality support you can trust. // It covers Component 1 and Component 2 from the Eduqas Biology for A Level Year 1 and AS specifications. // Straightforward and concise coverage of the specification, so you can be confident you are covering what's needed for exam success. // New 'Test Yourself section' at the end of each chapter reinforces knowledge with answers provided in the book. // Includes detailed explanations of the Assessment Objectives with examples of how the AOs are approached in exam questions. // New section on 'Answering exam questions' at the end of each unit gives guidance on command words and how to approach each question. // New 'Exam Practice questions' at the end of each unit are taken from actual Eduqas past papers with answers provided in the book // New 'Theory Check' feature accompanies the practical tasks in the book and helps students check their understanding of biology in relation to practical tasks. // Enhanced support for practical skills enable you to embed your understanding of practical work. // Increased maths support with maths skills and techniques regularly tested throughout. // Clear explanations and diagrams throughout.

Such is the pressure on teaching time in schools and universities that students are taught less and less of the diversity that is life on this planet. Most students, and indeed most professional biologists that these students become, know far more of cell function than of biodiversity. This text is a profusely illustrated, quick-reference guide to all types of living organisms, from the single-celled prokaryotes and eukaryotes to the multicellular fungi, plants and animals. All surviving phyla and their component classes are characterised and described, as are their lifestyles, ecology, relationships, and within-group diversity (with orders displayed in list form). Overall, the book's aim is to provide biologists and others with a clear, concise picture of the nature of all groups of organisms with which they may be unfamiliar.

Social Problems in the UK: An Introduction is the first textbook on contemporary social issues to contextualise social problems within the disciplines of sociology, social policy, criminology and applied social science. Drawing on the research and teaching experience of academics in these areas, this much-needed textbook brings together a comprehensive range of expertise. Social Problems in the UK discusses the strengthening and changing character of social construction, providing a new and invigorated way of studying the issues for all social science students. This clear, accessible textbook guides students in approaching the methodology, theory and research of social problems, and introduces the key topics in the area: migration and 'race' work and unemployment poverty drugs, violence and policing youth, sub-culture and gangs childhood and education Social Problems in the UK provides a number of helpful pedagogical features for ease of teaching and learning, including: case studies; links to data sources; textboxes highlighting examples, key figures etc.; study questions, and tips on how to undertake literature reviews and use journals and databases.

Amir, haunted by his betrayal of his childhood friend, a son of his father's servant, returns to Kabul as an adult after learning Hassan has been killed. Describes Afghanistan's rich culture and beauty. For mature readers.

Aufgabenkultur in zentralen Abschlussprüfungen

Madness, sexuality, power, knowledge—are these facts of life or simply parts of speech? In a series of works of astonishing brilliance, historian Michel Foucault excavated the hidden assumptions that govern the way we live and the way we think. The Archaeology of Knowledge begins at the level of "things aid" and moves quickly to illuminate the connections between knowledge, language, and action in a style at once profound and personal. A summing up of Foucault's own methadological assumptions, this book is also a first step toward a genealogy of the way we live now. Challenging, at times infuriating, it is an absolutley indispensable guide to one of hte most innovative thinkers of our time.

A new series of bespoke, full-coverage resources developed for the 2015 A Level English qualifications. Endorsed for the AQA A/AS Level English Literature B specifications for first teaching from 2015, this print Student Book is suitable for all abilities, providing stretch opportunities for the more able and additional scaffolding for those who need it. Helping bridge the gap between GCSE and A Level, the unique three-part structure focuses on texts within a particular time period and supports students in interpreting texts and reflecting on how writers make meaning. An enhanced digital version and free Teacher's Resource are also available.

A new series of bespoke, full-coverage resources developed for the 2015 GCSE English qualifications. Approved for the AQA 2015 GCSE English Literature specification, this print Student Book is designed to help students develop whole text understanding and written response skills for their closed-book exam. The resource provides scene-by-scene coverage of Priestley's play as well as a synoptic overview of the text and its themes. Short, memorable quotations and striking images throughout the book aid learning, while in-depth exam preparation includes practice questions and sample responses. See also our An Inspector Calls print and digital pack, which comprises the print Student Book, the enhanced digital edition and a free Teacher's Resource.

A new series of bespoke, full-coverage resources developed for the 2015 GCSE English qualifications. Written for the AQA GCSE English Literature specification for first teaching from 2015, this print Student Book provides specific set text coverage for the modern British fiction aspect of the specification. AQA AS/A2 Biology Student Unit Guide New Edition: Units 3 & 6 Investigative and Practical Skills in BiologyPhilip Allan

This practical write-in workbook is the perfect companion for the coursebook. It contains step-by-step guided investigations and practice questions for Cambridge International AS & A Level Biology teachers and students. Through practical investigation, it provides opportunities to develop skills- planning, identifying equipment, creating hypotheses, recording results, analysing data, and evaluating. The workbook is ideal for teachers who find running practical experiments difficult due to lack of time, resources or support. Sample data- if students can't do the experiments themselves - and answers to the questions are in the teacher's resource.

Covering A-level Year 2 for the 2015 AQA specification, this Student Book combines the most comprehensive explanation with features that build skills in practical work, maths and evaluation. With a clear path of progress, it prepares students for the demands of A-level and beyond.

This title is endorsed by Cambridge Assessment International Education to support the full syllabus for examination from 2022. Confidently navigate the updated Cambridge International AS & A Level Biology (9700) syllabus with a structured approach ensuring that the link between theory and practice is consolidated, scientific skills are applied, and analytical skills developed. - Enable students to monitor and build progress with short 'self-assessment' questions throughout the student text, with answers at the back of the book, so students can check their understanding as they work their way through the chapters. - Build scientific communication skills and vocabulary in written responses with a variety of exam-style questions. - Encourage understanding of historical context and scientific applications with extension boxes in the student text. - Have confidence that lessons cover the syllabus completely with a free Scheme of Work available online. - Provide additional practice with the accompanying write-in Practical Skills Workbooks, which once completed, can also be used to recap learning for revision.
