*The Cosmic Clock has been written for traders and investors who are seeking to understand the cosmic forces that influence emotion and the financial markets. This book will acquaint you with an extensive range of astrological and mathematical phenomena. From the Golden Mean and Fibonacci Sequence through planetary transit lines, quantum lines, the McWhirter method, planetary conjunctions and market cycles, the numerous illustrated examples in this book will show you how these unique phenomena can deepen your understanding of the financial markets and make you a better trader and investor. You'll Be Perfect When You're Dead*

This book presents a large collection of problems in Quantum Mechanics that are solvable within a limited time and using simple mathematics. The problems test both the student's understanding of each topic and their ability to apply this understanding to the problems. The problems are provided in detail, eliminating only the simplest steps. No problem has been included that requires knowledge of mathematical methods not covered in standard courses, such as Fuchsian differential equations. The book is in particular design for students who are preparing for written examinations in Quantum Mechanics, but will also be very useful for teachers who have to pose problems to their students in lessons and examinations.
