This is a unique and fascinating autobiography which tells the story of twentieth-century Germany and its black population through the eyes of a member of the first black German community, Theodor Michael.

be no way to the visible unity of the churches. It documents the ecumenical congress that took place in Osnabrück in December 2017 and the “Osnabrück theses”—meant to serve the future international and ecumenical conversation and further discussion about the questions of women in church offices—passed by the congress. The editors hope that this publication will help to set into motion a debate about ministries and services in the Church, which has been stagnant for a long time, and that it will become clear that these questions can only be answered together—by men and women—from now on.

abstract: In this work about the book Roots by Alex HALEY the author will show that the book Roots is not non-fictional, like it is said on the cover of the book (chapter 3). The analysis of dialogues and characteristics of persons in the book will prove it. For the task was to prove the fictionality of the book in comparison to the representation of the characters in the film, these two means of style of fictionality were chosen: dialogue and representation of characters. The author did actually not compare with the film because it was not clearly visible if the directors of the film were

black or white, and so the analysis could have led in a wrong way. About the importance of the race will be said more in the analysis. One important point for proving the fictionality comes from Alex HALEY himself in chapter 120: "In the years of the writing, I have also spoken before many audiences of how Roots came to be, naturally now and then someone asks, 'How much of Roots is fact and how much is fiction?' To the best of my knowledge and of my effort, every lineage statement within Roots is from either my African or my American families carefully preserved oral history, much of which I have been

Since I wasn't yet around when most of the story occurred, by far most of the dialogue and most of the incidents are of necessity a novelized amalgam of what I know took place together with what my researching led me to plausibly feel took place."1
Further on, the work will tell about Alex HALEY himself (chapter 1). For this part the Microsoft Encarta of the year 1996 was used. Further, the "Einführung in die Anglistik" from Sammlung Metzler2, the "Arbeitsbuch Literaturwissenschaft" from UTB3 and the "Einführung in die

In the two generations before World War I, Germany emerged as Europe's foremost industrial power. The basic facts of increasing industrial output, lengthening railroad lines, urbanization, and rising exports are well known.

Behind those facts, in the historical shadows, stand millions of anonymous men and women: the workers who actually put down the railroad ties, hacked out the coal, sewed the shirt collars, printed the books, or carried the bricks that made Germany a great nation. This book contains translated selections from the autobiographies of nineteen of those now-forgotten millions. The thirteen men

and six women who speak from these pages afford an intimate firsthand look at how massive social and economic changes are reflected on a personal level in the everyday lives of workers. Although some of these autobiographies are familiar to specialists in German labor history, they are virtually unknown and inaccessible to the broader audience they deserve. This book provides translations that are at once useful, interesting, and entertaining to a wide range of historians, students, and general readers.

This text assesses the importance of language technology to increasingly popular computer-assisted language learning work. The book contains writings on pronunciation, vocabulary, grammar, reading, writing, testing, distance learning and user studies. After WWII, Europe was awash in refugees. Never in modern times had so many been so destitute and displaced. No longer subjects of a single nation-state, this motley group of enemies and victims consisted of Jewish survivors of the Holocaust, ex-Soviet POWs, ex-forced laborers in the Third Reich, legions of people who fled the advancing Red

This book argues that postwar international relief operations went beyond their stated goal of civilian "rehabilitation" and contributed to the rise of a new internationalism, setting the terms on which future displaced persons would be treated by nations and NGOs.
