Argument Papers

This volume comprises a selection of contributions to the theorizing about argumentation that have been presented at the 9th conference of the International Society for the Study of

Get Free Argument Papers

Argumentation (ISSA), held in Amsterdam in July 2018. The chapters included provide a general theoretical perspective on central topics in argumentation theory, such as argument schemes and the fallacies. Some contributions concentrate on the

treatment of the concept of conductive argument. Other contributions are dedicated to specific issues such as the justification of questions, the occurrence of mining relations, the role of exclamatives, argumentative abduction,

Get Free Argument Papers

eudaimonistic argumentation and a typology of logical ways to counter an argument. In a number of cases the theoretical problems addressed are related to a specific type of context, such as the burden of proof in philosophical argumentation, the charge of

committing a genetic fallacy in strategic manoeuvring in philosophy, the necessity of community argument, and connection adequacy for arguments with institutional warrants. The volume offers a great deal of diversity in its

How does one help undergraduate students learn quickly how to produce effectively organized, persuasive, well-reasoned essays? This book offers a straightforward, systematic introduction to some of the key elements of the construction of arguments in essay form. The focus here is on practical advice that

will prove immediately useful to students—recommended procedures are emphasized, and detailed examples of academic and student writing are provided throughout. The book introduces the basics of argumentation before moving on to the structure and organization of essays. Planning and

narratives and argumentative discourse. It focuses on their functional and structural similarities or dissimilarities, and offers diverse perspectives and conceptual tools for analyzing the narratives'

potential power for justification, explanation and persuasion.

Divided into two sections, the first Part, under the title “Narratives as Sources of Knowledge and Argument”, includes five chapters

addressing rather general, theoretical and characteristically philosophical issues related to the argumentative analysis and understanding of narratives. We may perceive here how

scholars in Argumentation Theory have recently approached certain topics that have a close connection with mainstream discussions in epistemology and the cognitive sciences about the justificatory

potential of narratives. The second Part, entitled “Argumentative Narratives in Context”, brings us six more chapters that concentrate on either particular functions played by argumentatively-

The investigation of computational models of argument is a rich and fascinating interdisciplinary research field with two ultimate aims: the theoretical goal of understanding argumentation as a cognitive phenomenon by modeling it in computer programs, and the practical goal of supporting the development of

Get Free Argument Papers

computer-based systems able to engage in argumentation-related activities with human users or among themselves. The biennial International Conferences on Computational Models of Argument (COMMA) provide a dedicated forum for the presentation and discussion of the latest advancements in the field, and cover

both basic research and innovative applications. This book presents the proceedings of COMMA 2020. Due to the Covid-19 pandemic, COMMA 2020 was held as an online event on the originally scheduled dates of 8 -11 September 2020, organised by the University of Perugia, Italy. The book includes 28 full papers and

Get Free Argument Papers

13 short papers selected from a total of 78 submissions, the abstracts of 3 invited talks and 13 demonstration abstracts. The interdisciplinary nature of the field is reflected, and contributions cover both theory and practice. Theoretical contributions include new formal models, the study of formal or computational

properties of models, designs for implemented systems and experimental research. Practical papers include applications to medicine, law and criminal investigation, chatbots and online product reviews. The argument-mining trend from previous COMMA's is continued, while an emerging trend this year is the use of

argumentation for explainable AI. The book provided an overview of the latest work on computational models of argument, and will be of interest to all those working in the field.

This book contains 14 articles by Teun Hoekstra (1953-1998) on core issues in syntactic theory. Some articles focus on the structure of DP, others on the structure of the sentence as a whole, while others

Get Free Argument Papers

still deal explicitly with the parallels between the two. The papers are distributed over four sections: "Argument structure", "T-chains", "The morphology of verbal and nominal projections" and "Small clauses". More than half of the articles in this book are published here for the first time or appear for the first time in

Get Free Argument Papers

English. Hoekstra's work is characterized by a fundamental interest in the central questions of syntactic theory, most notably the relation between argument structure and X-bar structure. This concentrated interest led to a deep understanding of the notion of transitivity, with respect to both the status of the external argument and

Get Free Argument Papers

that of the internal argument, where "status" refers to both the content and the licensing. In this collection of papers, Hoekstra reports on his insights in these matters. As far as content and licensing of the external argument is concerned, this collection contains papers on the relation between passives and their active

Get Free Argument Papers

counterparts, the parallels between possessives and transitives and the differences and similarities between past participles and infinitives. As to the internal argument, we find papers addressing sentential complementation, verbal affixation and resultatives. And there is a whole section on tense, and its

Get Free Argument Papers

role in keeping the sentence together. One of the papers in this collection is Hoekstra's classic, but hitherto unpublished "Small clauses everywhere" (more than 70 pages), which summarizes Hoekstra's views on such issues as resultatives, particle verbs and double object constructions.

This book provides a detailed study of Icelandic argument structure alternations within a syntactic theory of argument structure.

Building on recent theorizing within the Minimalist Program and

Get Free Argument Papers

Distributed Morphology, the author proposes that much of what is traditionally attributed to syntax should be relegated to the interfaces, and adapts the late insertion theory of morphology to semantics. The resulting system

Get Free Argument Papers

forms sound-meaning pairs by generating hierarchical structures that can be translated into morphological representations, on the one hand, and semantic representations, on the other. The syntactic primitives, however,

Get Free Argument Papers

underdetermine both morphophonology and semantics. Without appealing to special stipulations, the theory derives constraints on the external argument of causative-alternation verbs, interpretive restrictions on

Get Free Argument Papers

nominative objects, and the optionally agentive interpretation of verbs denoting self-directed motion. From the best-selling authors of the most successful reader in America comes Practical Argument. No one writes for the introductory

Get Free Argument Papers

focused, step-by-step approach to get to the heart of what students need to understand argument. In clear, concise, no-nonsense language, Practical Argument focuses on basic principles of classical argument and introduces

alternative methods of argumentation. Practical Argument forgoes the technical terminology that confuses students and instead explains concepts in understandable, everyday language, illustrating them with examples that

Argumentative Writing in a Second Language is a collection on teaching argumentative writing, offering multiple vantage points drawn from the

Page 79/162

contributors' own experiences. The value of argumentative writing cannot be overstated and yet, very little attention is spent on training teachers how to teach it. Additionally,

Get Free Argument Papers

the term argumentative is often confused with "persuasive" and other terms that add to students' confusion as to what type of writing they are supposed to do. The volume

Get Free Argument Papers

distinguishes between "learning to argue" and "arguing to learn" theories and practices. Part I of the volume is discussion-oriented while Part II shares classroom-based research

on practices that account for L2 writers' characteristics and specific needs. Included are chapters on online teacher resources, assessment of argumentative writing,

Get Free Argument Papers

specific challenges for Chinese writers, source-based writing, and approaches for learner autonomy.

edition of “The Federalist Papers”, a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence

Get Free Argument Papers

in 1776, the governing doctrines and policies of the States lacked cohesion. “The Federalist”, as it was previously known, was constructed by American statesman Alexander

Get Free Argument Papers

Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the

Get Free Argument Papers

compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly

Get Free Argument Papers

influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's

finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Get Free Argument Papers

The ideas presented by the contributions in this volume originated in a workshop on Burzio's generalization. Burzio's Generalization (BG) states that a verb which does not assign an external

Get Free Argument Papers

theta-role to its subject does not assign structural accusative Case to an object and conversely. It connects cross-linguistic similarities between e.g. passives, raising verbs, and

Get Free Argument Papers

unaccusatives. However, it does so by linking very different properties of a predicate. This raises fundamental questions about its theoretical status. The contributions in this

Get Free Argument Papers

volume explore BG's theoretical basis. A consensus emerges that BG is, in fact, an epiphenomenon, due to the interaction of different principles of grammar.

Get Free Argument Papers

Moreover, the contributions show a striking convergence as to how BG is ultimately derived. The results obtained make a significant contribution to the further development of theories of

resources. The Paths Writing Units, Argument Writing, Informative Writing, and Narrative Writing, complement the full instructional program and can also be used independently, providing in-

Get Free Argument Papers

depth writing instruction to support all students in grades 9 12 in meeting grade level standards. To emphasize the relationship between reading and writing, each Writing Unit includes accessible model

Get Free Argument Papers

texts that exemplify key elements of each text type, and source texts that provide a topic for the unit writing assignment. Individual lessons guide students through the writing process,

Get Free Argument Papers

providing instruction on grammar and conventions and highlighting collaboration and reflection as key elements of effective writing. Students' final essays are assessed using a checklist developed by

Get Free Argument Papers

the class over the course of the unit. The organization and distinctive content of the model and source texts in each unit afford teachers the flexibility to implement each unit independently of the

Get Free Argument Papers

others, and at any point during the curriculum. For example, a unit may be implemented to assess students' writing prior to implementation of the standard curriculum, to scaffold writing instruction

Get Free Argument Papers

leading into a writing assessment, or to support struggling writers by addressing gaps in skills as demonstrated in previous assessments. The Paths Writing Units provide teachers

Get Free Argument Papers

with invaluable opportunities to engage students as active participants in their own learning at every stage of the writing process, and to customize instruction to meet the varying needs of all

Get Free Argument Papers

students. ABOUT PUBLIC CONSULTING GROUP Public Consulting Group, works with schools, districts, and state education agencies to build their capacity for instructional and programmatic

This book is about one of the most baffling of all

Get Free Argument Papers

paradoxes--the famous Liar paradox. Suppose we say: "We are lying now." Then if we are lying, we are telling the truth; and if we are telling the truth we are lying. This paradox is more than an

Get Free Argument Papers

intriguing puzzle, since it involves the concept of truth. Thus any coherent theory of truth must deal with the Liar. Keith Simmons discusses the solutions proposed by medieval philosophers and

Get Free Argument Papers

offers his own solutions and in the process assesses other contemporary attempts to solve the paradox. Unlike such attempts, Simmons' "singularity" solution does not abandon classical semantics

Get Free Argument Papers

and does not appeal to the kind of hierarchical view found in Barwise's and Etchemendy's *The Liar*. Moreover, Simmons' solution resolves the vexing problem of semantic universality--the

problem of whether there are semantic concepts beyond the expressive reach of a natural language such as English.
