

Aries The Art Of Living Well And Finding Happiness According To Your Star Sign Pocket Astrology

Living the Signs: Astrology for Radiant Embodiment is a series of twelve workbooks co-created by astrologer Britten LaRue and designer Angela George. Across the scope of each, we aim to inspire your mind, nourish your heart, and enchant your spirit with ancient symbols for the modern world. Living the Signs supports the reader to gently de-program from unhelpful conditioning, grow trust in change, come home to the wild soul, and embrace radical self-love.

What are the conditions that foster true novelty and allow visionaries to set their eyes on unknown horizons? What have been the challenges that have spawned new innovations, and how have they shaped modern biology? In Dreamers, Visionaries, and Revolutionaries in the Life Sciences, editors Oren Harman and Michael R. Dietrich explore these questions through the lives of eighteen exemplary biologists who had grand and often radical ideas that went far beyond the run-of-the-mill science of their peers. From the Frenchman Jean-Baptiste Lamarck, who coined the word "biology" in the early nineteenth century, to the American James Lovelock, for whom the Earth is a living, breathing organism, these dreamers innovated in ways that forced their contemporaries to reexamine comfortable truths. With this collection readers will follow Jane Goodall into the hidden world of apes in African jungles and Francis Crick as he attacks the problem of consciousness. Join Mary Lasker on her campaign to conquer cancer and follow geneticist George Church as he dreams of bringing back woolly mammoths and Neanderthals. In these lives and the many others featured in these pages, we discover visions that were sometimes fantastical, quixotic, and even threatening and destabilizing, but always a challenge to the status quo.

Reimagining the scholarly book as living and collaborative--not as commodified and essentialized, but in all its dynamic materiality. In this book, Janneke Adema proposes that we reimagine the scholarly book as a living and collaborative project--not as linear, bound, and fixed, but as fluid, remixed, and liquid, a space for experimentation. She presents a series of cutting-edge

experiments in arts and humanities book publishing, showcasing the radical new forms that book-based scholarly work might take in the digital age. Adema's proposed alternative futures for the scholarly book go beyond such print-based assumptions as fixity, stability, the single author, originality, and copyright, reaching instead for a dynamic and emergent materiality. Adema suggests ways to unbind the book, describing experiments in scholarly book publishing with new forms of anonymous collaborative authorship, radical open access publishing, and processual, living, and remixed publications, among other practices. She doesn't cast digital as the solution and print as the problem; the problem in scholarly publishing, she argues, is not print itself, but the way print has been commodified and essentialized. Adema explores alternative, more ethical models of authorship; constructs an alternative genealogy of openness; and examines opportunities for intervention in current cultures of knowledge production. Finally, asking why it is that we cut and bind our research together at all, she examines two book publishing projects that experiment with remix and reuse and try to rethink and reperform the book-apparatus by taking responsibility for the cuts they make.

A CIA-connected labor union, an assassination attempt, a mysterious car crash, listening devices, and stolen documents--everything you'd expect from the latest thriller. Yet, this was the reality of Tony Mazzocchi, the Rachel Carson of the U.S. workplace; a dynamic labor leader whose legacy lives on in today's workplaces and ongoing alliances between labor activists and environmentalists, and those who believe in the promise of America. In The Man Who Hated Work and Loved Labor: The Life and Times of Tony Mazzocchi, author and labor expert Les Leopold recounts the life of the late Oil, Chemical, and Atomic Workers Union leader. Mazzocchi's struggle to address the unconscionable toxic exposure of tens of thousands of workers led to the passage of the Occupational Safety and Health Act and included work alongside nuclear whistleblower Karen Silkwood. His noble, high-profile efforts forever changed working conditions in American industry--and made him enemy number one to a powerful few. As early as the 1950s, when the term "environment" was nowhere on the political radar, Mazzocchi learned about

nuclear fallout and began integrating environmental concerns into his critique of capitalism and his union work. An early believer in global warming, he believed that the struggle of capital against nature was the irreconcilable contradiction that would force systemic change. Mazzocchi's story of non-stop activism parallels the rise and fall of industrial unionism. From his roots in a pro-FDR, immigrant family in Bensonhurst, Brooklyn, through McCarthyism, the Sixties, and the surge of the environmental movement, Mazzocchi took on Corporate America, the labor establishment and a complacent Democratic Party. This profound biography should be required reading for those who believe in taking risks and making the world a better place. While Mazzocchi's story is so full of peril and deception that it seems almost a work of fiction, Leopold proves that the most provocative and lasting stories in life are those of real people.
