

## Ark Royal

*If you wish for peace, prepare for war. -Royal Navy Motto*
*Seventy years ago, the interstellar supercarrier Ark Royal was the pride of the Royal Navy. But now, her weapons are outdated and her solid-state armour nothing more than a burden on her colossal hull. She floats in permanent orbit near Earth, a dumping ground for the officers and crew the Royal Navy wishes to keep out of the public eye. But when a deadly alien threat appears, the modern starships built by humanity are no match for the powerful alien weapons. Ark Royal and her mismatched crew must go on the offensive, buying time with their lives And yet, with a drunkard for a Captain, an over-ambitious first officer and a crew composed of reservists and the dregs of the service, do they have even the faintest hope of surviving ... .. And returning to an Earth which may no longer be there?*

*HMS Lion and HMS Unicorn have made it home from their first mission against the alien virus, opening the way for humanity to take the offensive. Now, a major fleet is readying itself to depart into enemy space, intent on smashing the virus's ability to wage war and destroy the threat once and for all. And Captains Hammond and Campbell will take the lead.But humanity itself is buckling under the strain of endless war. The stresses of fighting are tearing the fleet apart. And a very personal betrayal threatens to plunge the captains and their crews into a bitter feud, deep in alien territory. The stakes could not be higher ..... And the risk of total defeat has never been so great.*

Description: A pencil sketch of two ships set against the Gallipoli coastline. Below this is another sketch of a ship, which is shown from the starboard side.

Britain's Greatest Warship recounts the story of Ark Royal and her 'people', from the laying down of her keel in 1943 and her first commission in 1955, through to her decommissioning in 1979 and her scrapping in 1980. Ark Royal played a pivotal role in the development of Royal Naval fixed-wing aviation and pioneered the concept of carrier-borne VSTOL aircraft. She saw extensive service during the 1960s and '70s, a time that witnessed many significant changes not only in Navy life, but also in the way sea power was projecting national influence worldwide.Painting a vivid picture of life on board a class of Royal Navy warship that has now gone forever, the author brings the story of the 'Ark' alive using interviews and first-hand accounts. These range from the experiences of including admirals, captains and ship's company, to aircrew of the embarked Fleet Air Arm squadrons and the shipyard workers who built the 'Ark'.Fully illustrated with a rich selection of rare photographs, this book is sure to appeal to all warship enthusiasts and its warships.

Excerpt: HMS Ark Royal (pennant number 91) was an aircraft carrier of the Royal Navy that served during the Second World War. Designed in 1934 to fit the restrictions of the Washington Naval Treaty, Ark Royal was built by Cammell Laird and Company, Ltd. at Birkenhead, England, and completed in November 1938. Her design differed from previous aircraft carriers. Ark Royal was the first ship on which the hangars and flight deck were an integral part of the hull, instead of an add-on or part of the superstructure. Designed to carry a large number of aircraft, she had two hangar deck levels. She served during a period that first saw the extensive use of naval air power; a number of carrier tactics were developed and refined aboard Ark Royal. Ark Royal served in some of the most active naval theatres of the Second World War. She was involved in the first aerial and U-boat kills of the war, operations off Norway, the search for the German battleship Bismarck, and the Malta Convoys. Ark Royal survived several near misses and gained a reputation as a 'lucky ship'. The Germans incorrectly reported her as...

The Life of an Aircraft Carrier at War 1939-41

Ark Royal 1939-1941

Royal Ark Mariner - Ritual

**From the first incarnation of the Ark Royal - a ship that spearheaded the attack on the Spanish Armada in 1588 - to the aircraft carrier that was the Royal Navy's flagship until its decommissioning in 2011, this book tells the story of all five ships to bear the famous name.**

**Ark Royal is the most powerful starcarrier ever built. A massive 440m long behemoth that carries vast numbers of starfighters onboard. Commanded by the rising star in the Confederate Navy, the renowned Admiral Churchill, and crewed by experienced officers. She's capable of tackling an entire flotilla on her own. No enemy would dare stand against her...until the Great Uprising. In an instant her entire battle group is engulfed in violence as friends turn on each other in one of the most infamous engagements of the war. A battle that would shape the future of humanity for generations to come. This is the story of the Confederacy's most famous starcarrier, CCS Ark Royal.Star Crusades: War Stories a thrilling science fiction series of short novels that follow many of the famous heroes, villains, ships and events throughout the epic Star Crusades universe. They can be read in any order, and complement the main series of books.**

**HMS Ark Royal - The Ship and Her Men**

The four QUIZZER personnel are assigned to complete the preparation of a seed asteroid capable of translating into the ylem with a complement of 50,000 crew and settlers and set forth on a journey which will take them completely across the galaxy on a journey which will require roughly 4,500 years of shipboard time before coming to an end some 80,000 light years from Earth. QUIZZER's people learn that the autodocs routinely placed in combat vessels are capable of being modified to rejuvenate humans to their point of optimum point of physical maturity when the replacement of dead cells is exactly offset by the creation of replacement cells and all minor debris and poisons which may have accumulated over the years are purged. This moment of optimum maturity differs from person to person but it generally centers around 30 years. The treatment is not a zip-zap affair and requires roughly two days of induced sleep in the autodoc to restore a year of youth so in order to restore a 70 year-old to his 30 year-old persona requires nearly three months in an autodoc induced coma. This ability of an enhanced autodoc must be kept secret at all costs since releasing it to the public inevitably leads to the extinct of the human species. Even without the immortality idea the then current population of Earth hovered around the 69 billion mark and mass starvation was an ever-present threat. So QUIZZER's people were sent to a remote asteroid drifting in orbit around the galaxy some 80 light years distant where preliminary work is already in progress. They are in mufti and are ostensibly mid-grade navy officers who will be replaced once the ARK ROYAL is completed. As ever, this is not a routine 'presto-changeo' affair and there are plenty of surprises in store for the unwary reader. This is a story which is all too likely to occur but no one likes to think about it.

Autumn 1941 In the Mediterranean, the war has reached its decisive phase. In North Africa Rommel, the 'Desert Fox', is preparing to start his victory march on Cairo. Nothing will stop him. The British 8th Army is exhausted and demoralized. There is only one faint hope on the horizon - the British-held island of Malta. From Malta, the Royal Navy and RAF have constantly destroyed Rommel's vital supply convoys. But having been under constant attack from German dive-bombers since the summer, the island is virtually at the end of its resources: Malta needs fuel and planes. In London, Churchill decides on a desperate measure. He will send in one last convoy carrying fuel and planes. But the despairing PM knows that there is only one ship available to protect that vital cargo - Britain's most modern aircraft carrier, the Ark Royal. For two years the Germans have been trying to sink the Ark; by far their most prestigious target. So the Arksets off on its last fateful mission, manned by a crew of young sailors straight from the training schools. Will she make it? If she does not, will the Med indeed become 'Germany's Lake', as the Führer has boasted?

*Britain's Greatest Warship*

*Fighting For The Crown*

*H.M.S. Ark Royal*

The British aircraft carrier HMS Ark Royal was one of the most famous and recognizable Royal Navy vessels of the Second World War. Built as the first large and modern aircraft carrier she was a true pride of Albion's fleet, equal to the mightiest warship of her time - the battlecruiser HMS Hood. Moreover, her design and construction introduced entirely new standards in construction of aircraft carriers for the Royal Navy, giving her a specific place in shipbuilding history.

In June 1941 the Ark Royal won one of Britain's most famous naval victories. The German destroyer, Bismarck, had been ravaging the British fleet in the Atlantic. Sailing through a ferocious storm the Ark Royal tracked the Bismarck. A dozen swordfish bombers took off from her deck and pounded shell after shell into the German battleship, sending her to the ocean floor. It was a signal victory that resonated around the world. Hitler, furious at the loss of the German fleet's flagship, demanded that the Ark Royal be destroyed at whatever cost. HMS Ark Royal is one of the Royal Navy's most iconic ships. When she was launched in 1938 she was one of the most sophisticated weapons at the disposal of British military command. The aircraft carrier was the latest, and soon to be one of the most feared, developments in naval warfare. In her first two years of operation the Ark Royal survived countless attacks, and was considered one of the luckiest ships in the Navy. But her air of invincibility was to prove wishful thinking. Within one month of sinking the Bismarck, the Ark Royal too was destroyed while sailing off the coast of Gibraltar. And there she has rested, one kilometre below the surface of the Mediterranean, until her wreck was discovered by Mike Rossiter in 2004. In gripping detail, and using the testimony of survivors of the sinking and men who lived, flew and fought on the Ark Royal, Mike Rossiter tells the remarkable story of the life and legend of this most iconic of ships. Also, and for the first time, he reveals the story of the quest to discover the wreck of this naval legend.
