

Art History Paper Rubric

Most people outside of the art world view art as something that is foreign to their experiences and everyday lives. A People's Art History of the United States places art history squarely in the rough-and-tumble of politics, social struggles, and the fight for justice from the colonial era through the present day. Author and radical artist Nicolas Lampert combines historical sweep with detailed examinations of individual artists and works in a politically charged narrative that spans the conquest of the Americas, the American Revolution, slavery and abolition, western expansion, the suffragette movement and feminism, civil rights movements, environmental movements, LGBT movements, antiglobalization movements, contemporary antiwar movements, and beyond. A People's Art History of the United States introduces us to key works of American radical art alongside dramatic retellings of the histories that inspired them. Stylishly illustrated with over two hundred images, this book is nothing less than an alternative education for anyone interested in the powerful role that art plays in our society.

A Short Guide to Writing about Art offers invaluable advice for any art course where students write papers. It addresses a wealth of fundamental matters: description versus analysis some critical approaches to art (e.g., formal analysis, cultural materialism, gender studies) getting ideas for an essay engaging in peer review developing paragraphs organizing a comparison using bibliographic tools, including the Internet quoting sources writing captions for illustrations avoiding sexist and Eurocentric language editing the final draft documenting sources, using either The Chicago Manual of Style or The Art Bulletin style preparing for essay examinations Among the new features of the sixth edition are new guidelines for using the World Wide Web and the Internet for art-historical research, five new checklist (e.g., a checklist for evaluating Web Sites), ten new illustrations, and the style guide published by The Art Bulletin. Several sample essays are also included, accompanied by analyses that show readers the particular strengths of effective writing.

Use your course's big ideas to accelerate students' growth as writers and critical thinkers The newly revised third edition of Engaging Ideas delivers a step-by-step guide for designing writing assignments and critical thinking activities that engage students with important subject-matter questions. This new edition of the celebrated book (now written by the co-author team of Bean and Melzer) uses leading and current research and theory to help you link active learning pedagogy to your courses' subject matter. You'll learn how to: Design formal and informal writing assignments that guide students toward thinking like experts in your discipline Use time-saving strategies for coaching the writing process and handling the paper load

including alternatives to traditional grading such as portfolio assessment and contract grading Help students use self-assessment and peer response to improve their work Develop better ways than the traditional research paper to teach undergraduate reading and research Integrate social media, multimodal genres, and digital technology into the classroom to promote active learning This book demonstrates how writing can easily be integrated with other critical thinking activities such as inquiry discussions, simulation games, classroom debates, and interactive lectures. The reward of this book is watching students come to class better prepared, more vested in the questions your course investigates, more apt to study purposefully, and more likely to submit high-quality work. Perfect for higher education faculty and curriculum designers across all disciplines, Engaging Ideas will also earn a place in the libraries of graduate students in higher education.

In addition, he is the author of several widely used American History and World History textbooks, as well as REA's Crash Course® test preps for European History, U.S. History, U.S. Government & Politics, and Psychology. How does museum location shape the interpretation of an art object by critics, curators, art historians, and others? To what extent is the value of a work of art determined by its location? Providing a close examination of individual works of American art in relation to gallery and museum location, this anthology presents case studies of paintings, sculpture, photographs, and other media that explore these questions about the relationship between location and the prescribed meaning of art. It takes an alternate perspective in that it provides in-depth analysis of works of art that are less well known than the usual American art suspects, and in locations outside of art museums in major urban cultural centers. By doing so, the contributors to this volume reveal that such a shift in focus yields an expanded and more complex understanding of American art. Close examinations are given to works located in small and mid-sized art museums throughout the United States, museums that generally do not benefit from the resources afforded by more powerful cultural establishments such as the Museum of Modern Art and the Metropolitan Museum of Art in New York. Works of art located at institutions other than art museums are also examined. Although the book primarily focuses on paintings, other media created from the Colonial Period to the present are considered, including material culture and craft. The volume takes an inclusive approach to American art by featuring works created by a diverse group of artists from canonical to lesser-known ones, and provides new insights by highlighting the regional and the local.

50 Techniques for Engaging Students and Assessing Learning in College Courses Do you want to: Know what and how well your students are learning? Promote active learning in ways that readily integrate assessment? Gather information that can help make grading more systematic and streamlined? Efficiently collect solid learning outcomes data for institutional assessment? Provide evidence of your teaching effectiveness for promotion and tenure review? Learning Assessment Techniques provides 50 easy-to-implement active learning techniques that gauge student learning across academic disciplines and learning environments. Using Fink's Taxonomy of Significant Learning as its organizational framework, it embeds assessment within active learning activities. Each technique features: purpose and use, key learning goals, step-by-step implementation, online adaptation, analysis and reporting, concrete examples in both on-site and online environments, and key references—all in an easy-to-follow format. The book includes an all-new Learning Goals Inventory, as well as more than 35 customizable assessment rubrics, to help teachers determine significant learning goals and appropriate techniques. Readers will also gain access to downloadable supplements, including a worksheet to guide teachers through the six steps of the Learning Assessment Techniques planning and implementation cycle. College teachers today are under increased pressure to teach effectively and provide evidence of what, and how well, students are learning. An invaluable asset for college teachers of any subject, Learning Assessment Techniques provides a practical framework for seamlessly integrating teaching, learning, and assessment.

In many schools and higher education institutions it has become common practice to share assessment criteria with students. Sometimes it is required for accountability purposes, at other times criteria are used as a means to communicate expectations to students. However, the idea that explicit assessment criteria should be shared with students has been contested. On the one hand, research has shown that explicit criteria may positively affect student performance, reduce their anxiety, as well as support students' use of self-regulated learning strategies. On the other hand, there are fears that explicit criteria may have a restraining influence on students' learning, as well as limiting their autonomy and creativity. There are also indications of students becoming more performance oriented, as opposed to learning oriented, when being provided with explicit assessment criteria. Taken together, it is not fully understood under which circumstances it is productive for student learning to share explicit assessment criteria, and under which circumstances it is not. In particular, empirical research on the proposed negative effects of sharing criteria with learners is limited and most fears voiced in the literature are based on individual experiences and anecdotal evidence. In this book, we therefore bring different perspectives on transparency in assessment together, in order to further our understanding of how students are influenced by the use of explicit assessment criteria. A deeper understanding of the influence of explicit assessment criteria on students' understanding of criteria, motivation, and learning is equally imperative for future research and

educational practice, both of which need to go beyond individual opinions and convictions.

history

History is not a mere chronicle of facts, but a dialogue between competing interpretations of the past; it should be taught as such.

Teaching history in this way makes it both intellectually demanding and more interesting, while at the same time helps students acquire

the knowledge and skills necessary to become functioning citizens in a democracy. The opening chapters provide the rationale for the

study of history, its epistemological basis, and the logic of the discipline. The bulk of the book deals with practical ways to help students

acquire, process, and apply information. In particular, it addresses the specific thinking skills required by the discipline, with many effective techniques for helping students to master them. The implications of this approach for teacher evaluation of student work are also addressed.

International Yearbook for Research in Arts Education 3/2015

Cracking the AP European History Exam 2018

This book takes a developmental perspective at the use of scoring rubrics to assess student work. Citing developmental characteristics of each age, the author presents examples and adaptations of assessment rubrics on a variety of subjects for teachers from kindergarten through adult/college. After a presentation of foundation information on rubrics, separate chapters are devoted to each grade level from primary through adult. Written so that each chapter can be addressed independently, the book provides additional chapters devoted to assessing technological topics and using rubrics with students with special needs. The final chapters provide practical information to help teachers to create their own rubrics and to convert rubric scores to letter grades. An updated annotated listing of recommended rubric websites is included.

This yearbook will be the third in an annual series of publications by the International Network for Research in Arts Education (INREA). It will provide a comprehensive survey of contemporary research trends in arts education and will be based on the idea of constructing knowledge in the arts with the wisdom of the many. About sixty scholars from across the world will convey the zeitgeist of the key issues in research in arts education. The volume will be designed as a basic companion for every researcher, student, teacher or artist who wants to know what the recent knowledge of scholars is and what they consider significant. The key issues will reflect the images and the observations that a large body of researchers consider to be essential.

This book outlines a framework for art therapy with older adults rooted in a belief in the autonomy and self-efficacy of older adults, including those with dementia or other diseases of later life. Advocating for a more collaborative approach to art-making, the author presents approaches and directives designed to facilitate community engagement, stimulate intellectual and emotional exploration, and promote a sense of individual and collective empowerment. Relevant to community, assisted living, skilled nursing and dementia-care environments, it includes detailed case studies and ideas for using art therapy to tackle stigma around stroke symptoms and dementia, encourage increased interactions between older adults in care homes, promote resilience, and much more.

Manet, a founding father of modernism, is one of the towering figures of 19th-century art. In this volume, Carol Armstrong looks closely at Manet's works to uncover a view not only of the artist but also of modernity itself. As she places his art within frameworks of colour, the feminine Other (the Manette in Manet), and consumerism, Armstrong seeks to expand and revise our understanding of this artist as a painter of modern life.

In recent years, the emerging field of museum studies has seen rapid expansion in the critical study of museums and scholars started to question the institution and its functions. To contribute differentiated viewpoints to the currently evolving meta-discourse on the museum, this volume aims to investigate how the institution of the museum has been visualized and translated into different kinds of images and how these images have affected our perception of these institutions. In this interdisciplinary collection, scholars from a variety of academic

backgrounds, including art history, heritage, museums studies and architectural history, explore a broad range of case studies stretching across the globe. The volume opens up debate about the epistemological and historiographical significance of a variety of different images and representations of the Art Museum, including the transformation or adaptation of the image of the art museum across periods and cultures. In this context, this volume aims to develop a new theoretical framework while proposing new methodological tools and resources for the analysis of museological representations on a global scale.
