Ultimately, the book argues that China has sovereignty over the Nansha Islands and the surrounding waters, either on the basis of historical claims or modern realities. In recent years, the Nansha disputes have attracted considerable attention. Far from being resolved, they have instead become even more heated. The only reasonable way to solve the problem, as argued here, is on the basis of relevant history and legislation. Addressing this highly topical issue, the book also provides an English-speaking audience with access to essential content on the sovereignty, history, and legislation concerning the Nansha Islands.

This book examines what counts regarding the role and conceptualization of regions in world politics. It presents a fresh look at which narratives awake, persist, fall dormant or re-emerge amidst diverse interlocking processes of environmental, technological and global political changes. It puts forward a thorough and multidimensional conceptualization of regions as embedded in changing, overlapping environments, and requires more attention to regions' shifting materiality, temporality and technological underpinnings. Combining the approaches, questions and analyses of Critical IR and Political Geography, it calls for a renewed emphasis on the puzzle of

how the contextual environment of regions may become more (or less) multidimensional, or how some aspects of a region's contextual environment may be mutually constitutive in non-intuitive ways. Ultimately, it sheds light on the politics of regions and the regional scale in international politics in order to overcome the often-underlying territorial fixity of territory and space within IR approaches. This book will be of key interest to scholars and students of international relations, international political sociology, political geography, regionalism, geopolitics and area studies.
