ASQ components include - 19 questionnaires and corresponding scoring sheets. Parents complete the 30-item photocopiable questionnaires at designated intervals. Professionals convert parents' responses of yes, sometimes, and not yet to the scoring sheets, enabling them to quickly determine a child's progress in each of 5 key developmental areas--communication, gross motor, fine motor, problem solving, and personal-social. Each questionnaire takes 10-20 minutes to complete and 2-3 minutes to score. Programs can use all 19 questionnaires or select the age intervals most useful to them. Available in paper format or on CD-ROM. - ASQ CD-ROM. All 19 questionnaires and scoring sheets and all of the intervention activity sheets for parents and caregivers are available on one convenient CD-ROM. This informative video provides an overview of ASQ and shows how to score the questionnaires accurately and make informed decisions about referrals. - Coming Soon! ASQ Manager. This computer database program helps centers and agencies use ASQ more efficiently. It creates an individual file for each child that includes contact information, demographic information, ASQ screening results, and notes. After users enter answers to ASQ questions into the child's record, the program tabulates scores, identifies areas in which the child needs further assessment, formats questionnaire information into a printable document for sharing with parents, and generates a letter to the parents explaining the results. The program can also generate reports of all children in the center, helping users identify which children need to be screened on a month-by-month basis, which children need follow-up assessment, and more. The ASQ Manager comes with a detailed user's guide and a brief, simply worded guidebook on developmental screening.

The assessment of young children's development and learning has recently taken on new importance. Private and government organizations are developing programs to enhance the school readiness of all young children, especially children from economically disadvantaged homes and communities and children with special needs. Well-planned and effective assessment can inform teaching and program improvement, and contribute to better outcomes for children. This book affirms that assessments can make crucial contributions to the improvement of children's well-being, but only if they are well designed, implemented effectively, developed in the context of systematic planning, and are interpreted and used appropriately. Otherwise, assessment of children and programs can have negative consequences for both. The value of assessments therefore requires fundamental attention to their purpose and the design of the larger systems in which they are used. Early Childhood Assessment addresses these issues by identifying the important outcomes for children from birth to age 5 and the quality and purposes of different techniques and instruments for developmental assessments.

For decades, this book has served as a guide to organizations that document their continuous improvement efforts using Baldrige Award-type management systems. This book provides a valuable, step-by-step approach to help identify and put in place properly focused continuous improvement systems. Seven types of information are provided in this book for each of the Items in Categories 1 through 7 of the 2021–2022 Baldrige Framework and Performance Excellence Criteria: 1. The actual language of each Item, including Notes 2. A plain-English explanation of the requirements and rationale for each Item 3. A table showing the similar requirements of the Criteria 4. A summary of the requirements of each Item in flowchart form 5. The key linkages between each Item and other Items 6. An explanation of some potential adverse consequences 7. Examples of effective practices Features of this edition include: • A stakeholder matrix table of contents that identifies relevant material within the book for key stakeholder groups: senior leaders, examiners, performance excellence initiative leaders, application writers, and program administrators • Tables for each Criteria Item showing the similar expectations of the Criteria award (and award program administrators) presented only once at the scoring level where the expectation first appears to help examiners determine at what level an expectation belongs • Online resources, including scoring calibration guides for education, healthcare, and business/nonprofit/government organizations, a guide to self-assessment of organizations and management systems, and a guide to the alignment of Baldrige, Six Sigma, Lean, and Balanced Scorecard • A new crosswalk between Baldrige and ISO standards and a set of global performance excellence best practices • Information on other award programs throughout the world such as the European Foundation for Quality Management (EFQM), which has undergone significant changes in the 2020 model, and the China Association for Quality

In this important, entertaining book, one of the world's most celebrated psychologists, Martin Seligman, asserts that happiness can be learned and cultivated, and that everyone has the power to inject real joy into their lives. In Authentic Happiness, he describes the 24 strengths and virtues unique to the human psyche. Each of us, it seems, has at least five of these attributes, and can build on them to identify and develop to our maximum potential. By incorporating these strengths - which include kindness, originality, humour, optimism, curiosity, enthusiasm and generosity -- into our everyday lives, he tells us, we can reach new levels of optimism, happiness and productivity. Authentic Happiness provides a variety of tests and unique assessment tools to enable readers to discover and deploy those strengths at work, in love and in raising children. By accessing the very best in ourselves, we can improve the world around us and achieve new and lasting levels of authentic contentment and joy.

These creative, photocopiable learning activities address the same five developmental areas as ASQ (see page 42)--communication, gross motor, fine motor, problem solving, and personal-social. Besides helping children develop early language and literacy skills, these activities encourage close parent-child interactions. Parents and children will have a new set of games and interactions every 4 months between 1 month and 5 years, each set complete with a description of typical development and five to eight activities that help children progress in the key developmental areas. Fun, age-appropriate, and inexpensive, these learning activities are perfect for sharing with parents of children who are developing typically or need nonintensive support in one or more areas.

This reference manual is designed to help those interested in passing the ASQ's certification exam for Six Sigma Green Belts and others who want a handy reference to the appropriate materials needed to conduct successful Green Belt projects. It is a reference handbook on running projects for those who are already knowledgeable about process improvement and variation reduction. The primary layout of the handbook follows the ASQ Body of Knowledge (BoK) for the Certified Six Sigma Green Belt (CSSGB) updated in 2015. The authors were involved with the first edition handbook, and have utilized first edition user comments, numerous Six Sigma practitioners, and their own personal knowledge gained through helping others prepare for exams to bring together a handbook that they hope will be very beneficial to anyone seeking to pass the ASQ or other Green Belt exams. In addition to the primary text, the authors have added a number of new appendixes, an expanded acronym list, new practice exam questions, and other additional materials

Clear questions help parents complete the questionnaires quickly and accurately, and open-ended questions ask about any related parental concerns. Professionals score the questionnaire in just 2-3 minutes, and then transfer a total score to a simple summary sheet along with any concerns the parent has noted. The summary sheet, a visual indicator of social emotional development and parent concerns, indicates whether any followup should be considered. Total scores that fall in the grapha s range of Risk (dark shaded zone) indicate the child may need further evaluation. NEW A total score in the new a monitoringa zone (light shaded area) helps identify children that may require followup actions based on items of concern. Professionals can work with parents to address behaviors of concern and provide social-emotional development information sheets and activities to help their child make progress before the next screening. Scores outside the shaded zones mean the childa s social-emotional development appears to be developing on schedule. Part II provides a description of how the measures were organized and quick-view tables that provide easy access to measures with enough information to allow for an estimate of the likelihood that reading additional information about a particular measure would prove fruitful. Measures are organized alphabetically into tables for measures of anger, aggression, or violence. Each of the tables provides the name of the measure, the purpose for which the measure was developed, and the targeted population. The tables also provide information on the method of assessment, the amount of time required to use the measure, and the page number where additional information is available. Part II also contains the review of each measure. Part III provides examples of measures that can be copied for research or clinical purposes. ?

With this in-depth, easy-to-use tool, your program can reliably assess and monitor social-emotional development in infants, toddlers, and preschoolers at risk for delays or challenges. An ideal followup to screeners such as ASQ:SE, the two-part SEAM(tm) assessment reveals detailed qualitative information on childrenâe(tm)s social-emotional competence-- and identifies their caregiversâe(tm) strengths and areas of need. Easy to learn and implement, SEAM can be used by a wide variety of early childhood professionals, including those with little or no training in mental-health or behavioral interventions. SEAM helps your program: support development of important social-emotional skills in order to minimize challenging behaviors build strong, proactive partnerships with families promote positive parentâe"child interactions in the critical first years of life assist with developing developmentally appropriate goals and intervention activities monitor child progress toward social-emotional goals SEAM is a two-part assessment; All forms are available in English and Spanish on the CD-ROM or e-book. SEAM Tool The main SEAM includes three intervals with different developmental ranges: Infant (2-18 months), Toddler (18-36 months), and Preschool (36-66 months). Each interval assesses 10 child benchmarks critical to social-emotional competence, including empathy, adaptive skills, self-image, emotional responses, and healthy interactions with others. SEAM is flexible enough to meet your specific needs--parents/caregivers can complete it independently, or you can conduct it jointly with them if they need extra guidance. The SEAM system also includes SEAM with Ages, an alternate version of the tool annotated with a helpful list of age ranges for each item. This version makes it easy to give caregivers general guidance on how social-emotional skills typically develop and where their childâe(tm)s development fits on the continuum. SEAM Family Profile The Family Profile assesses parent and caregiver strengths and helps identify areas in which they need more supports and resources to foster their childâe(tm)s social-emotional skills. Like the main SEAM, the Family Profile assessment includes three intervals--Infant, Toddler, and Preschool. Each interval measures four benchmarks key to a nurturing home environment: responding to needs, providing activities and play, providing predictable routines and an appropriate environment, and ensuring home safety. List of SEAM benchmarks Child participates in healthy interactions Child expresses a range of emotions Child regulates social-emotional responses Child begins to show empathy for others Child attends to and engages with others Child explores hands and feet and surroundings (for infants)/demonstrates independence (for toddlers/preschoolers) Child displays a positive self-image Child regulates activity level Child cooperates with daily routines and requests Child shows a range of adaptive skills View the webinar recording of Using the Social-Emotional Assessment/Evaluation Measure (SEAM(tm)) with Young Children, presented by Jane Squires, Ph.D., and Misti Waddell, M.S.
