

Assessment Guide Prerequisite Skills Inventory

These California state guidelines are intended to aid in the planning, monitoring, and improvement of educational programs and services for hearing impaired students. After an introduction, chapters have the following titles and sample subtopics: (1) "Identification and Assessment of Unique Educational Needs" (screening, definitions of hearing impaired, language assessment, manual communication assessment, academic assessment); (2)"Roles and Responsibilities of Providers of Instruction and Services" (special education teacher, regular teacher, parents, interpreters, career/vocational specialist, guidance counselor, adapted physical education specialist); and (3) "Organization and Support for Providing Instruction and Services" (special education and local plan area, curriculum, least restrictive environment, infant programs, attendance area and transportation, program options, aides, audiological services, physical environment, media centers, staff development, parent education). Included in seven appendixes and a glossary is such information as testing standards for the hearing impaired, a draft of certification standards for professionals, recommendations for classroom acoustics, a statewide directory of services, and definitions of terms concerning the hearing impaired. Teaching in Nursing, 4th Edition is the only nursing text to address all three components of education – teaching, curriculum, and evaluation. Comprehensive guidelines help you meet the day-to-day challenges of teaching, including curriculum development, the diversity of student learning styles, and developing and using classroom tests. This edition has been updated with information on the latest trends in education including new information on the use of simulations to facilitate learning, the latest on competency-based and concept-focused curricula, developing learner-centered courses, and more. Edited by expert nursing educators Diane M. Billings and Judith A. Halstead, Teaching in Nursing is a past winner of the AJN Book of the Year award, and is an excellent resource for nurses preparing to take the Certified Nurse Educator (CNE) Exam. The only nursing resource to cover teaching, curriculum, and evaluation of students – the three essential components of nursing education. Contributing authors are nationally recognized scholars in their fields of expertise. Models of teaching are used to demonstrate clinical teaching, teaching in interdisciplinary setting, how to evaluate students in the clinical setting, and how to adapt teaching for community-based practice. Teaching strategies promote critical thinking and active learning, including evaluation techniques, lesson planning, and constructing examinations. Evidence-based teaching boxes explain how to practice and apply evidence-based teaching, with implications for faculty development, administration, and the institution. End-of-chapter summaries let you draw conclusions based on the chapter content. Open-ended application questions at the end of each chapter are ideal for faculty-guided discussion and online education. Up-to-date research looks ahead to the needs of the future.

Digitization is the future of the Army. However, along with digitization come training and personnel implications. This report discusses training issues associated with digitization, specifically those that address a need to train and maintain backup along with digital skills. Backup skills are the individual and collective skills required when digital systems are degraded or unavailable. The study focused on the digital M1A2 Abrams Main Battle training program as an exemplar. Lessons learned about digital and backup training requirements should be applied in the M2A3 training program. The study investigated issues that are applicable to a wide range of digital applications and training conditions. The study examined individual and collective tasks that support tank operations and found both digital and backup tasks to be poorly defined, particularly in collective performance. A method for analysis is described and analytic results reported. The study also outlines the current state of training armor and infantry soldiers and the impact that increased digitization may have on training pipelines. The study employed a series of expert groups to define issues and formulate recommendations. These groups included users, developers, researchers, and trainers with a wide spectrum of experience and viewpoints. Expert group results are reported and include 15 primary issues and accompanying recommendations.

Today, and in the foreseeable future, military operations require U.S. personnel to work alongside multinational partners and among local populations. The DoD has placed a greater emphasis on transforming language and regional proficiency capabilities, which includes cultural awareness. This testimony summarizes recommendations on DoD's efforts to develop language skills and regional proficiency and the steps DoD has taken to implement these prior recommendations. Specific recommendations developed a strategic plan to guide its language and regional proficiency transformation efforts; and (2) obtained the information it needs to identify capability gaps and assess risk.

Nurses are already nurse managers. They must manage patient caseloads and care plans as well as supervise aides, technicians, and other care providers. But moving from this type of organic management to a defined nurse manager role is not a natural progression. Nurse managers must command a vast, diverse, and robust skill set, and those skills must first be defined, explained, and operationalized for success. In an environment that offers new managers little support, where do they turn? The Nurse Manager's Survival Guide (4th Ed.) provides an overview of a nurse manager's major roles and responsibilities—all the fundamentals needed for success in one easy-to-use, consolidated, practical reference. From tips on building the right team to budgeting basics, time-management tools, and advice on taking care of one's self (and their team), author Tina Marrelli supplies the resources nurse managers need to excel in day-to-day operations.

Although they may be fluent readers - indeed, many have very precocious reading skills - individuals with autism spectrum disorders often need support for comprehension. Comprehension difficulties in readers with ASD can be subtle, qualitative, and difficult to tease out. As a result, their substantial level of risk for reading comprehension problems is often overlooked or unaddressed, and many students struggle in silence. Further aggravating the situation is the fact that otherwise competent educational professionals is both general education and special education settings have limited training and experience helping readers with ASD. This is where Drawing a Blank comes in. Using a clearly stated and well-organized approach, this practical resource provides educational professionals and parents with the tools to improve comprehension for good decoders who have reading comprehension difficulties, as well as readers who struggle with both decoding and comprehension. In keeping with current standards, the book emphasizes the importance of using evidence-based and promising practices based on thorough assessment of student's needs.

Plusieurs personnes qui rencontrent des difficultés s'orienter vers l'emploi et des défis se trouvent des emplois et contribuent par la même occasion, au milieu de travail leur permettant ainsi d'accéder à une vie autonome. Cependant, beaucoup d'individus à haut potentiel ne peuvent encore accéder au marché du travail en raison de la conception erronée de leur environnement qui fait en sorte qu'ils sont considérés comme non employables. Ce document de référence tente de démontrer comment les personnes autistes peuvent performer et atteindre leurs objectifs à l'emploi et rencontrer les exigences du milieu de travail ou des employeurs. Décrivant les divers aspects du placement professionnel, ce document fournit des stratégies pour l'évaluation des travailleurs autistes, le réseautage pour l'obtention d'emploi et l'analyse de tâches pour un support individuel. Plusieurs histoires de cas démontrent différentes techniques permettant aux personnes autistes de devenir productives, fournissent des idées novatrices pour l'employabilité dans des industries ou manufactures, dans le domaine de l'imprimerie, des services postaux, de la vente et d'autres secteurs d'emploi.
