Early modern almanacs have received relatively little academic attention over the years, despite being the first true form of British mass media. While their major purpose was to provide annual information about the movements of the stars and the corresponding effects on Earth, most contained a range of other material, including advice on preventative and remedial medicine for humans and animals. Based on the most extensive research to date into the relationship between the popular press, early modern medical beliefs and practices, this study argues that these cheap, annual booklets played a major role in shaping contemporary medical beliefs and practices in early modern England. Beginning with an overview of printed vernacular medical literature, the book examines in depth the genre of almanacs, their authors, target and actual audiences. It discusses the various types of medical information and advice in almanacs, preventative and remedial medicine for humans, as well as ‘non-commercial’ and ‘commercial’ medicines promoted in almanacs, and the under-explored topic of animal health care.

Light on Life brings the insight and wisdom of Indian astrology to the Western reader. Jyotish, or Indian astrology, is an ancient and complex method of exploring the nature of time and space and its effect upon the individual. Formerly a closed book to the West, the subject has now been clarified and explained by Hart de Fouw and Dr. Robert Svoboda, two experts and long-term practitioners. In Light on Life they have created a complete and thorough handbook that can be appreciated and understood by those with very little knowledge of astrology.

This book explores an area of contemporary religion, spirituality and popular culture which has not so far been investigated in depth, the phenomenon of astrology in the modern west. Locating modern astrology historically and sociologically in its religious, New Age and millenarian contexts, Nicholas Campion considers astrology's relation to modernity and draws on extensive fieldwork and interviews with leading modern astrologers to present an invaluable contribution to our understanding of the origins and nature of New Age ideology. This book challenges the notion that astrology is either 'marginal' or a feature of postmodernism. Concluding that astrology is more popular than the usual figures suggest, Campion argues that modern astrology is largely shaped by New Age thought, influenced by the European Millenarian tradition, that it can be seen as an heir to classical Gnosticism and is part of the vernacular religion of the modern west.

Here is the best how-to guide for the intermediate astrologer on the art of astrological divination. Horary astrology is the best method for getting answers to questions of pressing personal concern: Will I ever have children? Should I buy that lakefront property? What happened to my car keys? When used wisely, horary acts like a trusted advisor to whom you can turn in times of trouble.

Keywords are essential for translating the meaning behind astrological symbols into everyday language. This book gives the best collection of keywords for the astrological Signs of the Zodiac found anywhere. Here you will find in-depth collections of the vocabulary needed to translate astrological symbols into the language of life. When seeking to learn and expand communication skills a Dictionary and a Thesaurus are essential. This book is both a Dictionary and a Thesaurus for the Signs of the Zodiac. Michael Munkasey has gone through many thousands of common American English words, selected those that best describe a particular Astrological Sign, and then arranged those words in an easy to use way. A common failing for people exposed to Astrology is to learn just a few basic meanings for an astrological symbol. A beginning student may feel comfortable with four or five words (keywords) associated with an astrological symbol - say the sign of Virgo. Using those four or five words and training the mind to be flexible, a student can give a passable interpretation for a meaning of Virgo. But, what if the student can draw from not just four or five Virgo words, but eight or ten? Access to an increased vocabulary allows richness and depth. How about then fifteen or sixteen words for Virgo to draw from? The ability to convey meaning increases with a good knowledge of keywords. This book offers a thorough keyword source for each of the Signs of the Zodiac. Use this book to expand your astrological vocabulary. Use this book as a reference for where particular words belong when describing a Sign of the Zodiac.

Fast & Accurate Answers to Real World Questions

It was a long time ago and few alive now remember what life was like in England in the years after World War II. Yes, the Luftwaffe and Vengeance weapons had made a fine mess in the south of the country, but during the war years the Yanks were there, millions of them, seducing the womenfolk, brawling in pubs, and, most importantly, spending their pay with local shopkeepers. May, 1945, the war ended and all the Americans left. Most went home, but a sizeable contingent set seducing the womenfolk, brawling in pubs and spending their pay with the surviving shopkeepers. The Americans were joined by contingents of English, French and Soviet troops. As a result, the surprising fact, long forgotten, is that after the war, conditions in England were even worse than they were in post-Third Reich Germany. Some in Britain rued winning the war, as deprivation became their fate. In London after the war books were so scarce that used vendors had long lists; the situation was impossible. Responding to the post WWII book shortage, Margaret Hone published this ultimate Astrology Text-Book. She was born in Birmingham, England, on October 2, 1892, at 2-13 am. Her ascendant was 27 Leo; her Sun was 9 Libra; her Moon was 13 Aquarius. Her midheaven was 15 Taurus. Of Ms Hone, James Holden wrote, English astrologer, educator, and author. She was a professional astrologer and private teacher for many years and later was Principa of the Astrological Lodge of London. Mrs. Hone was an advocate of the Equal House system of house division. She is best known in the U.S. for her two instruction manuals. This book is dedicated to Charles E.O. Carter, 1887-1968. Carter succeeded Alan Leo as head of the Astrological Lodge (1920-1952) and was First Principal of the Faculty of Astrological Studies, which he helped found in 1948. Hone succeeded Carter at FAS. She passed away on October 14, 1969. In his Preface high price was justified, that padding has been rigorously excluded. He goes on to praise the workmanship, the carefully worded definitions, as well as the fact that the book was complete and entire in itself. Save for ephemeris and tables of houses, this one book would suffice beginning as well as advanced students for some years. In addition, Hone also includes one of the earliest modern histories of astrology, short biographies of leading astrologers past and present, astrology practical side, Hone gives a thorough analysis of the principal house systems of the day (Equal, Campanus, Regiomontanus, Placidus), and even mentions C.G. Jung's recently developed Depth Psychology.

Why are there 7 days in a week and 12 months in a year? What do stars have to do with it? Long ago, people looked up at the night sky. They made up stories to explain the speckled dots of lights. The ancients divided up the year into weeks and days. They assigned "stars" to days and groups of stars to months. We may not know all their stories and beliefs, but we still tell time the same way. Inside this book are the reasons why.
