

Atherectomy

High Quality Journal Notebook to Write In Lined paper Journal - Notebook - Diary with Lots of space to write in - 120 Pages of High Quality. High quality cover design with a Funny Message. GET YOURS TODAY! Write your daily affirmation (Gratitude, motivational, inspirational...) Great if You are Looking for Funny Gifts. AB9 You Can Use It as A Journal to Write In - As a Diary or as Notebook Great if You are Looking for Gifts As Notebooks and Journals Perfect Size Journal - Notebook - Diary: 6 x 9 Inches Perfect for Christmas Gifts Perfect for Birthday Gifts Lots of Space to Write In All Your Beautiful Ideas and Thoughts Great for Journaling Every Day Get Yours Today! We have other funny and beautiful journals/notebooks to write in for men and women of all ages. Please visit our author's page to find other journals and notebooks.

In this important new book, you'll get a full picture of vascular medicine today. The book covers all recent technological advances - including color-flow Doppler, duplex-graft surveillance, & intravascular ultrasound - & focuses on the interdisciplinary team approach as the key to patient care.

Surgery Recovery Funny Gifts - Post Surgery Survivor - After Surgery Gifts - Speedy Recovery Gag Notebook 120 Pages Wide Ruled 6x9 Inches

Index of New Information and Medical Research Bible

Cardiac Anesthesia

Restenosis after Intervention with New Mechanical Devices

Directional coronary atherectomy

Thoroughly updated with the most current clinical trials and the latest American College of Cardiology and American Heart Association guidelines, this pocket-sized handbook provides quick, easy access to clinical trial data that support or refute clinical interventions. Each chapter summarizes the pathophysiology of a disease and the guideline-recommended diagnostic tests and treatments, and presents synopses of the major clinical trials for all therapies. This edition includes a new preventive cardiology section, an index of trial acronyms, highlights of selected pivotal trials, and a new mini-section covering clinical reference formulas. This Second Edition is also available electronically for PDAs. See Media Products section for details.

Manage cardiovascular problems more effectively with the most comprehensive resource available! A trusted companion to Braunwald's Heart Disease, Cardiovascular Therapeutics, 4th Edition addresses pharmacological, interventional, and surgical management approaches for each type of cardiovascular disease. This practical and clinically focused cardiology reference offers a balanced, complete approach to all of the usual and unusual areas of cardiovascular disease and specific therapies in one concise volume, equipping you to make the best choices for every patient. Understand current approaches to treating and managing cardiovascular patients for long-term health, for complex problems, and for unusual cardiac events. Benefit from the substantial experience of Elliott M. Antman, MD, Marc S. Sabatine, MD, and a host of other respected authorities, who provide practical, evidence-based rationales for all of today's clinical therapies. Expand your knowledge beyond pharmacologic interventions with complete coverage of the most effective interventional and device therapies being used today. Easily reference Braunwald's Heart Disease, 9th Edition for further information on topics of interest. Make the best use of the latest genetic and molecular therapies as well as advanced therapies for heart failure. Cut right to the answers you need with an enhanced focus on clinically relevant information and a decreased emphasis on pathophysiology. Stay current with ACC/AHA/ESC guidelines and the best ways to implement them in clinical practice. Get an enhanced visual perspective with an all-new, full-color design throughout. Access the complete contents online and download images at www.expertconsult.com.

Held on February 21-23, 1992, in San Diego, California

Percutaneous Laser Atherectomy as an Adjunct to Balloon Angioplasty (with Or Without Stenting) for Peripheral Arterial Disease

A Physician's Guide

Principles and Practice

Meta-analysis of Randomized Trials of Percutaneous Transluminal Coronary Angioplasty Versus Atherectomy, Cutting Balloon Atherotomy, Or Laser Angioplasty
Interventional Cardiovascular Medicine

Clinical Cases in Coronary Rotational Atherectomy Complex Cases and Complications Springer

From the Foreword by Eric J. Topol In the past five years, interventional cardiology has entered a new era of evaluating percutaneous transcatheter technologies to treat coronary artery disease and prevent restenosis. Cardiologists attempting to follow this new and exciting field may easily be confused by the growth and expansion of new devices, the technical details relevant to each device and enthusiastic claims of success. This monograph is a comprehensive and objective assessment of restenosis from the perspective of these new technologies including stenting, atherectomy, rotational abrasion and lasers, written by innovators and pioneers. The international breadth of experience is reflected in the summary of experiences from both sides of the Atlantic, at times with conflicting observations and results which in itself is valuable, given the diverse experience to date. In addition to the lucid summaries of the early and late results of these new devices, important issues in the methodology of restenosis research are addressed, including limitations of quantitative coronary arteriography in evaluating the new devices and important advances in alternatives to arteriography such as intravascular imaging. As a whole, this monograph is exceptionally worthwhile owing to its complete, up-to-date, balanced and visionary elements. There is no question that the new coronary device era has ushered in some excitement, and some despair. This book serves a pivotal purpose by weaving so many new concepts together, establishing the groundwork for further development of mechanical approaches to limit restenosis. I heartily recommend this text to all interventional cardiologists interested in practical and research aspects of restenosis.

Textbook of Atherectomy

Rotational Atherectomy/ Ed. Ted Feldman, Mark Reisman

Atherectomy

900 Questions

This Symposium was Held on February 21-23, 1992, in San Diego, California

A Companion to Braunwald's Heart Disease

Setting a new standard in medical publishing the Atlas of Heart Diseases is a beautifully produced twelve volume series featuring the most outstanding collection of visual art ever collected on treating diseases of the heart. Each volume is dedicated to a popular area of cardiology, providing concentrated, complete coverage on every critical element of the topic.

An illustrated step-by-step procedures manual, this excellent atlas guides people through the majority of interventional procedures. The accompanying text discusses and comments on the procedures as well as provides answers to potential pitfalls or complications--all supplemented with detailed illustrations for enhanced understanding.

Atlas of Interventional Cardiology

Percutaneous Transluminal Coronary Rotational Atherectomy for Lesions of the Coronary Arteries

An Interventional Cardiology Board Review

Directional Coronary Atherectomy Catheter with Improved Lesion Crossability

Expert Insights Into Clinical Application and Use of the JETSTREAM System

Evidence-based Cardiology

The thoroughly updated Second Edition of this highly acclaimed text provides a concise yet comprehensive reference on the clinical and scientific principles of cardiovascular and thoracic anesthesia. The foremost authorities in cardiac anesthesia cover topics particular to this specialized field, such as extracorporeal circulation, transesophageal echocardiography, the physiology and pharmacology of anticoagulation, cardiac catheterization, invasive cardiology, and congenital heart disease. Ideal for residents, fellows, and practicing anesthesiologists, this important text provides comprehensive, practical guidance for all aspects of cardiac anesthesia.

This user-friendly review question book is geared to interventional cardiology board candidates either for initial certification or recertification. It contains 900 questions in the same proportion as the actual exam to ensure highly targeted, high-yield preparation. Answers with brief explanations and references are included. Indications for particular procedures—a major focus of the board exam—are integrated throughout the text, particularly in the context of ACC/AHA guidelines. More than 250 angiograms and other illustrations reinforce key concepts. Separate chapters cover ACC/AHA guidelines for percutaneous coronary intervention, chronic stable angina, acute coronary syndromes, and ST-elevation myocardial infarction. A chapter on test-taking is also included.

Angioplasty, Atherectomy, Fibrinolysis, Surgery, Lasers, Vascular Stents, Percutaneous Portacaval Shunts, Live Patient Demonstrations ; February 3 - 6, 1992, Miami Beach, Florida

Coronary Atherectomy in the New Millennium

Recanalization of Occluded Arteries by Mechanical Atherectomy

I Made It Through Atherectomy

TEC® Extraction Atherectomy Advanced Operators Workshop

Interventional Cardiology

Offers information on atherectomy, a procedure for opening coronary arteries blocked by plaque, provided by the American Heart Association. Discusses the steps involved in the procedure. This concise practical guide is designed to facilitate the clinical decision-making process in the management of rotational atherectomy procedures by reviewing a number of cases and defining the various diagnostic and management decisions open to clinicians. It will be well illustrated but concise, enabling the reader to obtain relevant information regarding both standard and unusual cases in a rapid, easy to digest format. Each case will also include a narrative description and patient management tips. Rotational atherectomy ('rotablator') is used to treat heavily calcified lesions within coronary arteries at the time of percutaneous coronary intervention (PCI). Lesions that are inadequately treated may not be dilatable by balloons; and stents that are implanted in such lesions are at high risk for acute stent thrombosis and stent failure. However, rotablator therapy is high risk and present unique challenges to the interventionalists.

Complications are generally uncommon. However, when they do occur, they tend to be disastrous. In this case book, we present a series of rotablator cases: basic, complex cases, difficult cases, complications and unusual situations. Although PCI operators all have some degree of experience with this therapy, each operator is unlikely to have significant experience given the cost of the device and the risk involved. Therefore, this book will provide interventionalists with a valuable compendium of cases which can help them in the management of patients whom they plan to treat with rotational atherectomy.

The Role of Directional Atherectomy

Cardiovascular Therapeutics

A Clinical Approach

Atherosclerosis and Atherectomy

Symposium : Papers

This book presents the state-of-the-art in endovascular surgical technology and applications. The editors, renowned endovascular pioneers, have assembled international experts to put together the primary reference on all aspects of endovascular techniques in the vascular or general surgery practice. Chapters discuss the components of an endovascular practice, facilities and equipment for endovascular intervention, endovascular instrumentation and devices, and specialized endovascular techniques.
