The central focus in defining what and who is deviant is the audience—members of the influential social collectivities that determine the outcome of this process. The discussion in this volume encompasses both the explanatory (or positivist) approach and the constructionist (or labeling) perspectives, thereby lending a broad and

In Ezra's first book, he learned about baseball, girls, cars, drinking, and a lot of hard physical labor, not necessarily in that order. America had not yet been pulled into the war in Europe, and we didn't yet know much about that strange little country across the Pacific, known as Japan. As we pick up the story in book two, Ezra is now in his early 20's, working hard for meager pay, and a long way from his family in Illinois and Indiana. He has been to a handful of states, now he thinks he would like to see the world. He enlists in the military and asks to go to the Philippines.
