Risk management is a part of mainstream corporate life that touches all aspects of every type of organization. Auditors must focus firmly on risk: risk to the business, the executives, and the stakeholders. Auditing the Risk Management Process incorporates all the latest developments in risk management as it applies to auditors, including the new Committee of Sponsoring Organizations of the Treadway Commission (COSO) enterprise risk paper. Auditing the Risk Management Process includes original risk maps and process models developed by the author, explaining where and how topics fit within an overall audit framework, all the latest developments in risk management as it applies to auditors, and insight into how enterprise risk management affects the responsibilities of both internal and external auditors.

Focusing on auditing as a judgment process, this unique textbook helps readers strike the balance between understanding auditing theory and how an audit plays out in reality. The only textbook to provide complete coverage of both the International Auditing and Assurance Standards Board and the Public Company Accounting Oversight Board, Auditing reflects the contemporary evolution of the audit process. New additions to the book include expert updates on key topics, such as the audit of accounting estimates, group audit, and the Integrated Audit.

Supplemented by extra on-line resources, students using this established text will be well-equipped to be effective auditors and to understand the role of auditing in the business world.

This text has been written so that it is current with all issues inherent in accounting and auditing practice, particularly in public accounting firms including coverage of the creation of the Public Companies Accounting Oversight Board, the passage of the Sarbanes-Oxley Act, and all of the major pronouncements issued by the AICPA. The text is also designed to provide flexibility for instructors; the twelve chapters focus on the auditing process while the eight modules provide additional topics that can be taught at the instructors' discretion without interrupting the flow of the text.

Modern Auditing has become established as one of the leading textbooks for students taking university and professional courses in auditing. This extensively revised third edition continues to provide the reader with a comprehensive and integrated coverage of the latest developments in the environment and methodology of auditing. Aimed at introductory level courses in auditing at undergraduate, graduate and professional levels, it develops the auditing process in a logical and sequential manner enabling the reader to progressively consolidate their understanding of the concepts and process.
