Nearly 40% of all U.S. businesses are women-owned, and by 2025 the Census Bureau projects it will rise to 55%. The trend is new, dating back just to the 1980s, but its impact is already felt. Not only are women achieving empowerment and bettering their lives in

many different ways, but the beneficial affect on the economic well-being of the entire country is also clear. Coughlin examines the fundamental problems that face women entrepreneurs globally; identifies, documents, and explains how they cope with and solve them; profiles the more successful entrepreneurs today and explains how they got where they are; and delineates the traits of the successful entrepreneur. Research-based, well written, with a useful list of organizations that offer help to owners and prospective owners of new businesses, plus real life accounts that get to the heart of what it takes to succeed as an entrepreneur, Coughlin's book is welcome, necessary reading for anyone fascinated by business--and eager to create a business of one's own.

Religion is a subject often overlooked or ignored by public historians. Whether they are worried about inadvertent proselytizing or fearful of contributing to America's ongoing culture wars, many heritage professionals steer clear of discussing religion's formative role in the past when they build collections, mount exhibits, and develop educational programming. Yet religious communities have long been active contributors to the nation's commemorative landscape. Exhibiting Evangelicalism provides the first account of the growth and development of historical museums created by white evangelical Christians in the United States over the twentieth and twenty-first centuries. Exploring the histories of the Museum of the Bible, the Billy Graham Center Museum, the Billy Sunday Home, and Park Street Church, Devin C. Manzullo-Thomas illustrates how these sites enabled religious leaders to develop a coherent identity for their fractious religious movement and to claim the centrality of evangelicalism to American history. In their zeal to craft a particular vision of the national past, evangelicals engaged with a variety of public history practices and techniques that made them major players in the field--including becoming early adopters of public history's experiential turn.

mathematics. The display included a very attractive and informative mural, about 13 feet long, sponsored by one of the largest computer manufacturing companies and presenting a brief survey of the history of mathematics. Entitled, "Men of Modern Mathematics," it gives an outline of the development of that science from approximately 1000 B. C. to the year of the exhibition. The first centuries of this time span are illustrated by pictures from the history of art and, in particular, architecture; the period since 1500 is illuminated by portraits of mathematicians, including brief descriptions of their lives and professional achievements. Close to eighty portraits are crowded into a space of about fourteen square feet; among them, only one is of a woman. Her face—mature, intelligent, neither pretty nor handsome—may suggest her love of science and creative gift, but certainly reveals a likeable personality and a genuine kindness of heart. It is the portrait of Emmy Noether (1882 - 1935), surrounded by the likenesses of such famous men as Joseph Liouville (1809-1882), Georg Cantor (1845-1918), and David Hilbert (1862 -1943). It is accompanied by the following text: Emmy Noether, daughter of the mathematician Max, was often called "Der Noether," as if she were a man.

Drawing on two waves of interviews with undocumented young adults, Enriquez investigates how immigration status creeps into the most personal aspects of everyday life, intersecting with gender to constrain family formation. The imprint of illegality remains, even upon obtaining DACA or permanent residency. Interweaving the perspectives of US citizen romantic partners and children, Enriquez illustrates the multigenerational punishment that limits the upward mobility of Latino families. *Of Love and Papers* sparks an intimate understanding of contemporary US immigration policies and their enduring consequences for immigrant families.

Fourteen years in the making, this is a chronicle of the nearly two-thousand-mile international line between the United States and Mexico. It is an historical account largely through the eyes and experiences of government agents, politicians, soldiers, revolutionaries, outlaws, Indians, engineers, immigrants, developers, illegal aliens, business people, and wayfarers looking for a job. It is essentially the untold story of lines drawn in water, sand, and blood, of an intrepid, durable people, of a civilization whose ebb and flow of history is as significant as any in the world. Award-winning historian Leon Metz takes the reader from America's early westward expansion to today's awesome border problems of water rights, pollution, immigration, illegal aliens, and the massive effort of two nations attempting to pull together for a common cause.

**A groundbreaking look at marriage, one of the most basic and universal of all human institutions, which reveals the emotional,**

**physical, economic, and sexual benefits that marriage brings to individuals and society as a whole. The Case for Marriage is a critically important intervention in the national debate about the future of family. Based on the authoritative research of family sociologist Linda J. Waite, journalist Maggie Gallagher, and a number of other scholars, this book's findings dramatically contradict the anti-marriage myths that have become the common sense of most Americans. Today a broad consensus holds that marriage is a bad deal for women, that divorce is better for children when parents are unhappy, and that marriage is essentially a private choice, not a public institution. Waite and Gallagher flatly contradict these assumptions, arguing instead that by a broad range of indices, marriage is actually better for you than being single or divorced- physically, materially, and spiritually. They contend that married people live longer, have better health, earn more money, accumulate more wealth, feel more fulfillment in their lives, enjoy more satisfying sexual relationships, and have happier and more successful children than those who remain single, cohabit, or get divorced. The Case for Marriage combines clearheaded analysis, penetrating cultural criticism, and practical advice for strengthening the institution of marriage, and provides clear, essential guidelines for reestablishing marriage as the foundation for a healthy and happy society. "A compelling defense of a sacred union. The Case for Marriage is well written and well argued, empirically rigorous and learned, practical and commonsensical." -- William J. *Agriculture Priorities and Allocations System (US Farm Service Agency Regulation) (FSA) (2018 Edition) The Law Library presents the complete text of the Agriculture Priorities and Allocations System (US Farm Service Agency Regulation) (FSA) (2018 Edition). Updated as of May 29, 2018 The Farm Service Agency (FSA) is establishing the regulation for the Agriculture Priorities and Allocations System (APAS). Food is a critical commodity essential to the national defense (including civil emergency preparedness and response). To avoid civilian hardship during national defense emergencies, it may be necessary to regulate the production, processing, storage, and wholesale distribution of food. Through the APAS rule, the U.S. Department of Agriculture (USDA) will respond to requests to place priority ratings on contracts or orders (establishing priority on which contracts or orders are filled first) for agriculture commodities up through the wholesale levels, including agriculture production equipment, and allocate resources, as specified in the Defense Production Act (DPA) of 1950, as amended, if the necessity arises. FSA is implementing this rule as a way to redirect the agriculture commodities and resources to areas of hardship or potential hardship due to national emergencies. In most cases, there is likely to be no economic impact in filling priority orders because it would generally just be changing the timing in which orders are completed. The definitive history of the marriage equality debate in the United States, praised by Library Journal as "beautifully and accessibly written. . . . An essential work." As a legal scholar who first argued in the early 1990s for a right to gay marriage, William N. Eskridge Jr. has been on the front lines of the debate over same-sex marriage for decades. In this book, Eskridge and his coauthor, Christopher R. Riano, offer a panoramic and definitive history of America's marriage equality debate. The authors explore the deeply religious, rabidly political, frequently administrative, and pervasively constitutional features of the debate and consider all angles of its dramatic history. While giving a full account of the legal and political issues, the authors never lose sight of the personal stories of the people involved, or of the central place the right to marry holds in a person's ability to enjoy the dignity of full citizenship. This is not a triumphalist or one-sided book but a thoughtful history of how the nation wrestled with an important question of moral and legal equality.
