"Part 1 of the book...deals with the geography of the region and with the biological, linguistic, and archaeological evidence concerning the origins of the Oceanians and their movements into and within the region. Part 2 describes the tools and techniques by which the recent (but not yet markedly Westernized) Oceanians satisfied their basic, pan-human needs, as qualified by their many different, culturally defined, perceptions of those needs...Finally, Part 3 focuses on the varieties of social structures within which those 'technical' activities took place." -from the Prologue

With advances in modern technology, many obstacles faced by the nations in Australia and the Pacific Realm have been greatly reduced. It has opened the door for this region to become a powerhouse in global affairs. Using vibrant photographs and a fact-filled narrative, this book investigates how the rest of the world has been affected by the scientific, technological, and economic development and growth of this region. Readers will study the area's natural resources and production while learning the past and present of their global relevance.

Hands Across the Pacific

The Australian-Pacific Indentured Labor Trade

From countries that are spread across archipelagos to micro-island nations of the Pacific Realm to the continent-country of Australia, the cultures that have emerged from this region are some of the world's most diverse. The many nations and ethnic groups that can be found in this area, also called Oceania, have each produced a unique culture. With fact-filled text and full-color photographs, this book takes readers on an adventure through the history and traditions of Australia and the Pacific Realm.

During the post-abolition period a trade in cheap and often cost-neutral labor flourished in the western Pacific. For more than forty years, it supplied tens of thousands of indentured laborers to the sugar industry of northeastern Australia. Violence and Colonial Dialogue tells the story of its impact on the people who were traded. From the beaches and shallows of the Pacific ' s frontiers to the plantations and settlements of Queensland and beyond, a collective tale of the pioneers of today ' s Australian South Sea Island community is told through an abundant and effective use of materials that characterize the colonial record, including police registers, court records, prison censuses, administrative reports, legislative debates, and oral histories. With a thematic focus on the physical violence that was central to the experience of people who were voluntarily or involuntarily recruited, the history that emerges is a powerful tale that is at once both tragic and triumphant. Violence and Colonial Dialogue also tells a more universal story of colonization. Set mostly in the British settler-colony of Queensland during the last forty years of the nineteenth century, it explores the brutality embedded in the structures of a colonial state, while attempting to recover the stories that such processes obscured.

Over the last forty years, surfing has emerged from its Pacific islands origins to become a global industry. Since its beginnings more than a thousand years ago, surfing's icon has been the surfboard—its essential instrument, the point of physical connection between human and nature, body and wave. To a surfer, a board is more than a piece of equipment; it is a symbol, a physical emblem of cultural, social, and emotional meanings. Based on research in three important surfing locations—Hawai’i, southern California, and southeastern Australia—this is the first book to trace the surfboard from regional craft tradition to its key role in the billion-dollar surfing business. The surfboard workshops of Hawai’i, California, and Australia are much more than sites of surfboard manufacturing. They are hives of creativity where legacies of rich cultural heritage and the local environment combine to produce unique, bold board designs customized to suit prevailing waves. The globalization and corporatization of surfing have presented small, independent board makers with many challenges stemming from the wide availability of cheap, mass-produced boards and the influx of new surfers. The authors follow the story of board makers who have survived these challenges and stayed true to their calling by keeping the mythology and creativity of board making alive. In addition, they explore the heritage of the craft, the secrets of custom board production, the role of local geography in shaping board styles, and the survival of hand-crafting skills. From the olo boards of ancient Hawaiian kahuna to the high-tech designs that represent the current state of the industry, Surfing Places, Surfboard Makers offers an entrée into the world of surfboard making that will find an eager audience among researchers and students of Pacific culture, history, geography, and economics, as well as surfing enthusiasts.

The authors have brought together a collection of works from specialists in Pacific History from across Australia and throughout the Pacific. The individual contributions were specifically written to meet the needs of senior history courses in Australia. Max Quanchi and Ron Adams are well-known educationists who have specialised in the pacific. They have extensively travelled and studied in the Pacific and have spent many years teaching history to secondary and fertiary students. The result is an authoritative text for all senior History and Australian Studies students who need to understand the Pacific region.

POSSESSING THE PACIFIC

Facilities Available in Hawaii, Australia and New Zealand for the Training of South Pacific Islands Personnel in Tuberculosis Work

Worldwide supplies of sugar and cotton were impacted dramatically as the U.S. Civil War dragged on. New areas of production entered these lucrative markets, particularly in the South Pacific, and plantation agriculture grew substantially in disparate areas such as Australia, Fiji, and Hawaii. The increase in production required an increase in labor: in the rush to fill the vacuum, freebooters and other slave trade in Melanesians and Polynesians that continued into the twentieth century. The White Pacific ranges over the broad expanse of Oceania to reconstruct the history of "blackbirding" (slave trading) in the region. It examines the role of U.S. citizens (many of them ex-slaveholders and ex-confederates) in the trade and its roots in Civil War dislocations. What unfolds is a dramatic tale of un free labor, conflicts between formal and informal empire, white supremacy, threats to sovereignty in Hawaii, the origins of a White Australian policy, and the rise of Japan as a Pacific power and putative protector. It also pieces together a wonderfully suggestive history of the African American presence in the Pacific. Based on deft archival research in Australia, New Zealand, Fiji, Hawaii, the United States, and Great Britain, The White Pacific tells the hidden story of race, labor, war, and intrigue that contributes significantly to the emerging intersectional histories of race and ethnicity.
