An award-winning scientist offers his unorthodox approach to childrearing: “Parentology is brilliant, jaw-droppingly funny, and full of wisdom_bound to change your thinking about parenting and its conventions” (Amy Chua, author of Battle Hymn of the Tiger Mother). If you’re like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You’ll be laughing and learning at the same time.

A funny, moving, and true story of an ordinary boy with an extraordinary face that's perfect for fans of Wonder—now available in the U.S. When Robert Hoge was born, he had a tumor the size of a tennis ball in the middle of his face and short, twisted legs. Surgeons removed the tumor and made him a new nose from one of his toes. Amazingly, he survived—with a face that would never be the same. Strangers stared at him. Kids called him names, and adults could be cruel, too. Everybody seemed to agree that he was “ugly.” But Robert refused to let his face define him. He played pranks, got into trouble, had adventures with his big family, and finally found a sport that was perfect for him to play. And Robert came face to face with the biggest decision of his life, he followed his heart. This poignant memoir about overcoming bullying and thriving with disabilities shows that what makes us “ugly” also makes us who we are. It features a reflective foil cover and black-and-white illustrations throughout.

Importing Into the United States provides wide-ranging information about the importing process and import requirements. We have made every effort to include essential requirements, but it is not possible for a book this size to cover all import laws and regulations. Also, this publication does not supersede or modify any provision of those laws and regulations. Legislative and administrative changes are always under consideration and can occur at any time. Quota limitations on commodities are also subject to change. Therefore, reliance solely on the information in this book may not meet the "reasonable care" standard required of importers.
