This is my fourth book on the auto industry, and I have written it because this business is complicated, sophisticated, and ever-changing. Automotive retail is changing slowly, and one of the main reasons for that are the franchise laws. I want to urge you to operate as though franchise laws don't exist to protect you. Carvana is not going to be the end of the world. Also, OEM's such as Tesla, Rivian, and many more are going to go directly to the consumer, bypassing the dealer network altogether. At the end of the day, awesome customer service, whether in sales, service, or parts, will keep your customers coming back for more. Poor service and a cumbersome sales experience will drive them elsewh Valvoline, NAPA Parts, Pep Boys, etc.COVID-19 is already having a profound effect on consumer behavior and the way in which we buy and service cars. I predict that there will be two types of dealers after this pandemic abates--the first will change their business operations, adopting frictionless digital and showroom retail; the second will change. Unfortunately, the second type of dealer will be out of business. It is ultimately your choice whether to accept change. Consumers will continue to purchase cars. The only question is: Will they will be buying from you?

Where presidents or members of affluent families were previously seen, it is increasingly the case that car manufacturers are owned by banks and investment funds which have taken control of the entire economic life of these firms. This has significant impact on the terms of employment and layoffs, wages and precarious work, growing inequalities in income strata, compensation levels for executives, and the implementation of short-termist strategies across business operations. This book explores this increasing financialization - the predominance of the financial sector over the productive sector - in the automotive industry. In particular it is shown that the financial operations of these companies through leasing, insurance, loans, and other financial instruments is now much more profitable than the manufacturing aspects of the business, which was originally the raison d'être for these firms. The chapters demonstrate how there are great demands to increase the return to shareholders as a main concern, despite other metrics and/or other stakeholders. The work studies the impact of financialization at the world's five largest automakers which together represent almost 50% of car production, providing an exploratory analysis of profitability, shareholder composition, compensation to executives, workers' salaries, dividend payments to shareholders, and employment. Encouraging debate on contemporary economy, this book marks a significant addition to the literature on financialization, contemporary forms of capitalism, labour and economic sociology more broadly.

A married woman falls blindly in love with a handsome military officer. Happy families are all alike: every unhappy family is unhappy in its own way. States Leo Tolstoy in his great modern novel of an adulterous affair set against the backdrop of Moscow and St. Petersburg high society in the later half of the nineteenth century. A sophisticated woman who is respectably married to a government bureaucrat, Anna begins a passionate, all-consuming involvement with a rich army officer. Refusing to conduct a discreet affair, she scandalizes society by abandoning both her husband and her young son for Count Vronsky--with tragic consequences. Running parallel is the story of the courtship and marriage of Konstantin Levin (the melancholy nobleman who is Tolstoy's stand-in) and Princess Kitty Schcherbatsky.

Ant Anstead's Building a Special brings the Haynes story full circle, coming 61 years after the original Building a 750 Special was written by John Haynes, Haynes Publishing's founder, when he was still a schoolboy. This book is a TV tie-in, following the 12-part TV series Ant Anstead Master Mechanic, aired on Motor Trend, part of the Discover Network in the US and UK, following Ant Anstead's build of his own-design 'special' car, taking inspiration from the Alfa 158 - the first World Championship-winning F1 car, which raced from the 1930s until the 1950s. The 12-part TV series followed Ant's build of the car, from the first design ideas, through the construction, culminating in the debut of the car during the 2019 US Grand Prix weekend in Austin, Texas. The book follows Ant's personal build of the car, from the selection of the donor MG TD for the chassis, and Alfa Romeo Spider for the engine and gearbox, through modifying the chassis, building the suspension, steering, brakes, bodywork and interior, and putting all the components together to produce a finished one-off 'special.' Content includes: Introduction The history of specials Planning Donor car Chassis, suspension, steering, rear axle Engine, fuel system, cooling system, ancillaries, exhaust Gearbox Bodywork Braking system Cockpit Wiring Preparation and painting Testing Setting up and Making road legal.
