"The life and times of Joseph Gale and the founding of Oregon's first Provisional Government."--P. [4] of cover.

Krakauer's page-turning bestseller explores a famed missing person mystery while unraveling the larger riddles it holds: the profound pull of the American wilderness on our imagination; the allure of high-risk activities to young men of a certain mind; the complex, charged bond between fathers and sons. "Terrifying... Eloquent... A heart-rending drama of human yearning." —New York Times In April 1992 a young man from a well-to-do family hitchhiked to Alaska and walked alone into the wilderness north of Mt. McKinley. He had given \$25,000 in savings to charity, abandoned his car and most of his possessions, burned all the cash in his wallet, and invented a new life for himself. Four months later, his decomposed body was found by a moose hunter. How Christopher Johnson McCandless came to die is the unforgettable story of *Into the Wild*. Immediately after graduating from college in 1991, McCandless had roamed through the West and Southwest on a vision quest like that of his heroes Jack London and John Muir. In the Mojave Desert he abandoned his car, stripped it of its license plates, and gave away all of his cash. He would give himself a new name, Alexander Supertramp, and, unencumbered by money and belongings, he would be free to wallow in the raw, unfiltered experiences that nature presented. Craving a blank spot on the map, he simply threw the maps away. Leaving behind his desperate parents and sister, he vanished into the wild. Jon Krakauer tells the story in a clarifying prism through which he reassembles the disquieting facts of McCandless's short life. Admitting an interest in obsession, he searches for the clues to the drives and desires that propelled McCandless. When McCandless's inevitable mistakes turn out to be irreversible and fatal, he becomes the stuff of tabloid headlines and is dismissed for his naïveté, pretensions, and hubris. He is said to have had a death wish but wanting to die is a very different thing from being drunk and looking over the edge. Krakauer brings McCandless's uncompromising pilgrimage out of the shadows, and the peril, adventures, and renunciation sought by this enigmatic young man are illuminated with a rare understanding--and not an ounce of sentimentality. Mesmerizing, heartbreaking, *Into the Wild* is a tour de force. The power and luminosity of Jon Krakauer's storytelling shine through every page.

Every race has a finish line. Where you go after you cross it is what matters most.

Claiming Her Innocence

Morgan's Hunter

They bring out the worst in each other until they're running for their lives... Morgan Taylor, D.C. socialite and wildlife biologist, leads a charmed life until everything changes with a phone call. Her research team has been found dead—slaughtered—in backcountry Montana. As the case grows cold, Morgan is determined to unravel the mystery behind her friends' gruesome deaths. Despite the dangers of a murderer still free, nothing will stand in her way, not even the bodyguard her father hires, L.A.'s top Close Protection Agent, Hunter Phillips. Sparks fly from the start when no-nonsense Hunter clashes with Morgan's strong-willed independence. Their endless search for answers proves hopeless—until Hunter discovers the truth.

She's funny, sweet, and she has a smile that lights up every room. I'm a tall, ripped ex-soldier... and I'm supposed to be her best friend. My new hobby? I like to imagine how it could be more but I know that the relationship is all in my head. I can't risk what we have for something intangible... I fantasize about her day and night. She's a walking, talking fantasy... and she's only a hair's breadth away. But one wrong move could take what I value most. And once she looks my way for just a second, I don't know how I could possibly let her go...

We are in the depths of an underground cavern. It is bad enough to be underground, but here we are all enveloped in black as well: the ceiling is black, so are the walls; they are made of blocks of coal. The floor is one great black looking-glass. It is a sort of pond, polished as steel. Over this polished surface glistens the reflection of a solitary light, the light of a safety-lamp shining through a wire net. A man guides himself over the pond in a narrow boat. By the doubtful light of the lamp he sees high pillars, which rise out of the depths below and reach to the very roof of the cavern-pillars slender, like the columns of a Moorish palace. These pillars are half white and half black; up to a certain point only are they coal black, beyond that they are light in color. What are these pillars?

An invaluable source of information, advice, and inspiration, this expanded second edition features new material on the planning and purchase of major appliances, garage designs and enhancements, plumbing and electrical wiring, energy-saving lighting options, home safety and security measures, and much more.

Darwin made a powerful argument for evolution in the Origin of Species, based on all the evidence available to him. But a few things puzzled him. One was how inheritance works - he did not know about genes. This book concerns another of Darwin's Dilemmas, and the efforts of modern palaeontologists to solve it. What puzzled Darwin is that the most very ancient rocks, before the Cambrian, seemed to be barren, when he would expect them to be teeming with life. Darwin speculated that this was probably because the fossils had not been found yet. Decades of work by modern palaeontologists have indeed brought us amazing fossils from far beyond the Cambrian, from the depths of the Precambrian, so life was certainly around. Yet the fossils are enigmatic, and something does seem to happen around the Cambrian to speed up evolution drastically and produce many of the early forms of animals we know today. In this book, Martin Brasier, a leading palaeontologist working on early life, takes us into the deep, dark ages of the Precambrian to explore Darwin's Lost World. Decoding the evidence in these ancient rocks, piecing together the puzzle of what happened over 540 million years ago to drive what is known as the Cambrian Explosion, is very difficult. The world was vastly different then from the one we know now, and we are in terrain with few familiar landmarks. Brasier is a master storyteller, and combines the account of what we now know of the strange creatures of these ancient times with engaging and amusing anecdotes from his expeditions to Siberia, Outer Mongolia, Barbuda, and other places, giving a vivid impression of the people, places, and challenges involved in such work. He ends by presenting his own take on the Cambrian Explosion, based on the picture emerging from this very active field of research. A vital clue involves worms - burrowing worms are one of the key signs of the start of the Cambrian. This is fitting: Darwin was inordinately fond of worms.

Deals comprehensively and practically with effects, causes and behaviour of avalanches, protection of ski areas, highways and villages, and safety and rescue.

It is hoped that the following historical account of the discovery, partial utilization, and almost complete extermination of the great American bison may serve to cause the public to fully realize the folly of allowing all our most valuable and interesting American mammals to be wantonly destroyed in the same manner. The wild buffalo is practically gone forever, and in a few more years, when the whitened bones of the last bleaching skeleton shall have been picked up and shipped East for commercial uses, nothing will remain of him save his old, well-worn trails along the water-courses, a few museum specimens, and regret for his fate. If his untimely end fails even to point a moral that shall benefit the surviving species of mammals which are now being slaughtered in like manner, it will be sad indeed. Although *Bison americanus* is a true bison, according to scientific classification, and not a buffalo, the fact that more than sixty millions of people in this country unite in calling him a "buffalo," and know him by no other name, renders it quite unnecessary for me to apologize for following, in part, a harmless custom which has now become so universal that all the naturalists in the world could not change it if they would.

When an unexpected encounter with Darien Raventhorn causes worlds to collide it exposes the truth about Justice's real identity. It may not be out of place to explain how this book came to find its way into print. It was written for my little daughter, in the form of letters at various times, and not intended for publication, but many friends after reading them insisted that they should be published. One said: "You must not wait until you are dead before these letters are given to the world." As my desire is, by the grace of God, to live many years yet, I now present these letters to the reader, supplemented by others from old time friends who braved the perils and dangers of pioneer life; and as they are intended to be a part of the history of this great state, care has been taken to keep strictly to the truth. It is hoped that a line here and there will be appreciated by those who ride in palace cars as well as the old pioneers who came west in prairie schooners.

Don't get caught in the surge. Through a bullet hole in a wall, I watch a man bleed to death. Those responsible think their crime died with the victim, until I identify them. What's a girl to do when she's being hunted by murderers witness protection can't even stop? Run. My only refuge is a place I vowed to never go again. When it's do or die, an eight-year-old heartache suddenly seems trivial. Besides, he won't be there anyway. But he is. Turns out my old pain feels brand new the second his eyes meet mine. I can't leave. I can't stay. This snowy town that's supposed to be my shelter suddenly exposes me more than before. With no one else to lean on, Liam becomes my lifeline. Now we're both running for our lives, trying not to get swept away.
