For more than twenty years, David Piscuskas and Juergen Riehm, principals of 1100 Architect, have worked toward a refined architecture that captures the spirit of early modernism and translates traditional sensibilities of harmony, composition, and precision into a contemporary context. The firm's designs do not adhere to any specific stylistic codes but do have a recognizable, yet understated architectural signature: an elegance of proportion, a subtle mix of colors, meticulous details and craftsmanship. Each project shown in

this volume, the first monograph on the work of 1100, exemplifies that signature. Presented with exquisite color photographs, working drawings, models, and sketches, the designs range from apartments and houses (many for clients in the worlds of art, fashion, and theater) to retail and art-related spaces, including the Robert Mapplethorpe Foundation, TSE, J.Crew, and Metro Pictures, all in New York. Paralleling the diverse visual material, the rich and layered text epitomizes the nature of Piscuskas and Riehm's partnership, simultaneously exploring the relationship between the architects and their architecture, the literal and the abstract,

to replace legacy enterprise telephone networks. This migration to a single network carrying voice and data is called convergence, and it's revolutionizing the world of telecommunications by slashing costs and empowering users. The technology of families driving this convergence is called VoIP, or Voice over IP. VoIP has advanced Internet-based telephony to a viable solution, piquing the interest of companies small and large. The primary reason for migrating to VoIP is cost, as it equalizes the costs of long distance calls, local calls, and e-mails to fractions of a penny per use. But the real enterprise turn-on is how VoIP empowers businesses to mold and customize telecom and datacom solutions using a single, cohesive

Developed from real-world experience by a senior developer, O'Reilly's Switching to VoIP provides solutions for the most common VoIP migration challenges. So if you're a network professional who is migrating from a traditional telephony system to a modern, feature-rich network, this book is a must-have. Graced by Waters

In this inspirational and humorous collection of essays, author John Dietsch sees his addiction to and passion for

fishing as a parable that can help us shift from compulsive thinking to mindfulness and a closer connection to God. From creating fishing scenes on the set of A River Runs Through It in Montana, to directing fly fishing shows in New Zealand and from exploring deep canyons in California to guiding in Colorado, John shares his experiences and asks the question: what are we really fishing for? Through John's journeys across the globe, we discover that the same pursuit in fishing—of what is elusive but attainable—can be applied to our own spiritual journey. In the end, Dietsch uncovers his own truth under the rocks of a childhood river, recognizing the loss of both his brothers as the path of acceptance and faith that is graced by waters.
