Perspectives on International Relations: Power, Institutions, and Ideas shows students new to the field how theories (perspectives) of international affairs—realism, liberalism, constructivism (identity), and critical theory—play a decisive role in explaining every-day debates about world affairs. Why, for example, do politicians and political scientists disagree about the causes of the ongoing conflict in Syria, even though they all have the same facts? Or, why do policymakers disagree about how to deal with North Korea when they are all equally well informed? The new Sixth Edition of this best-seller includes updates on Brexit, the rise of Donald Trump and other populist leaders, and continuing developments for ISIS, Syria, and Russia.

Democracy in India

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is meaningful for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering both top-down (politics, economics, diplomacy) and bottom-up (eyewitness accounts, lived experience).

This volume-in the Themes in Politics series-brings together the finest scholarly writing on several dimensions of India's democracy. It analyses India's experiment with democracy, its successes and failures. It also situates Indian democracy in the context of the basic principles of democratic theory as well as contemporary debates about the relationship between democracy with civil society, cultural diversity, and development. The volume addresses a crucial concern as to whether the state has contributed to the decline of democracy or whether democratic politics has undermined the state's capability to govern the city. It discusses the unique experience of negotiating cultural diversity through democratic institutional mechanisms.

Seminar paper from the year 2019 in the subject Politics - International Politics - Topic: European Union, grade: 2,7, University of Bamberg (International and European Politics), course: New Security and Challenges in the European Union, language: English, abstract: The topic of this term paper are the current EU's migration policies.

The international immigration movement has been one of the deliberations in the current challenges which shapes the economic, social and political structure of Europe, particularly since the 2015 Refugee Crisis. This challenge has been taking place through the process called "Arab Spring" by the growing migration flows due to political and economic instabilities existing in North African countries. The aim of this study was to investigate EU migration policy through securitization by using the securitization theory. The research question is the following: "How did the EU's migration policies transform into a security subject?" The term paper aims to answer this question systematically throughout the following sections. Migration is perceived as a "new threat object" that will be analyzed using the theory of securitization. This paper has been divided into five sections. The first section seeks to examine the changing nature of policy regulations through migration policies. The second section is the main analytical part. This section theoretically discusses the fundamental structure of securitization and the Copenhagen School. It indicates the impact of extraordinary measures taken by the EU and developments in Europe's ideological map in an effort to explain this theory. It also facilitates the concept of externalization by examining implementations on the border controls. The third section accentuates the framework for migration as a security object. The fourth section focuses on securitization of migration by addressing a parallel way of the supranational process. This section emphasizes that the transition of asylum seekers and immigrants across the Schengen border makes the coherent cooperation of the EU institutions and the member states necessary. Besides, immigration has become a fundamental property both at the national level and also the European Union level. So most importantly, it has been transformed into a subject of "high politics". Finally, the conclusion provides a summary of the results of the analysis undertaken in the other sections, and the research question will be answered.

This book aims to familiarize the reader with various dimensions and issues of governance in the globalized world. It is important to understand governance and

its effects on administration and development in the context of a globalized environment. This textbook deals with the concepts and dimensions of governance by highlighting the major debates in the contemporary times. It emphasizes on the paradigm shift from government to governance and how the role of the state has changed over the years. Different facets of governance, such as democratic decentralization, environmental governance and role of non-state actors have been thoroughly discussed. Further, it provides insights into various good governance initiatives introduced in India, including Right to Information Act (RTI), e-governance and Citizen's Charter. Key Features - Comprehensive coverage of major concepts and critical understanding of the challenges to governance with special reference to India - Written in a lucid, jargon-free language for students and readers with backgrounds other than political science - All chapters aided by boxes, diagrams and tables for better understanding of concepts and included model questions for self-evaluation - Contributions from academicians and professionals from different fields of study, such as history, administrations and political science to give a wider perspective on governance Remarkable developments have taken place in the domain of political theory in the present age of liberalisation and globalisation. The concept of the nation-state has undergone a major change on account of the irresistible erosion of sovereignty in the internal and external spheres and the emergence of the model of a transnational state. Different models of state may be seen in the countries of the Third World. It has put a question mark on the future of the nation-state. The basic tenets of liberalism have been challenged by Neo-liberalism and Communitarianism with the result that now it is on the retreat. In the post-World War II period, the New Fabians had revised the tenets of Fabianism, but in the post-Cold War era it has been replaced by the Third Way. The pluralists had attacked the classical theory of sovereignty, but the neo-pluralists have given a new shape to it. The theme of political legitimacy has been revisited. The old concept of citizenship requires to be reinterpreted in the contexts of civic republicanism, multi-culturalism and identity politics. It has happened with other themes as well which may be taken note of in the emergence of new topics like Neo-colonialism, Post-colonialism, Post-communism and the like. The task of a political scientist is to comprehend and critically describe the underlying principles of political behaviour in their empirical as well as normative dimensions. Inter-disciplinary focus has become so popular now that the implications of the themes of various social sciences have penetrated into the domain of each other. The discipline of political science has become a study of 'power' and of 'struggle' for its sake at any level -- local, regional, national and international. In the light of these salient features, university courses have been modernised, and the author has done well to cover them in this work so as to adequately meet the requirements of students offering this course at the degree and postgraduate levels and of candidates preparing for competitive examinations.
