

Babson College Gbv

This open access book presents contemporary perspectives on the role of a learning society from the lens of leading practitioners, experts from universities, governments, and industry leaders. The think pieces argue for a learning society as a major driver of change with far-reaching influence on learning to serve the needs of economies and societies. The book is a testimonial to the

importance of learning communities. It highlights the pivotal role that can be played by non-traditional actors such as city and urban planners, citizens, transport professionals, and technology companies. This collection seeks to contribute to the discourse on strengthening the fabric of a learning society crucial for future economic and social development, particularly in the aftermath of the coronavirus disease. The social sector is undergoing a major transformation. We are

witnessing an explosion in efforts to deliver social change, a burgeoning impact investing industry, and an unprecedented intergenerational transfer of wealth. Yet we live in a world of rapidly rising inequality, where social sector services are unable to keep up with societal need, and governments are stretched beyond their means. Alnoor Ebrahim addresses one of the fundamental dilemmas facing leaders as they navigate this uncertain terrain: performance

measurement. How can they track performance towards worthy goals such as reducing poverty, improving public health, or advancing human rights? What results can they reasonably measure and legitimately take credit for? This book tackles three core challenges of performance faced by social enterprises and nonprofit organizations alike: what to measure, what kinds of performance systems to build, and how to align multiple demands for accountability. It lays out four different types of

strategies for managers to consider—niche, integrated, emergent, and ecosystem—and details the types of performance measurement and accountability systems best suited to each. Finally, this book examines the roles of funders such as impact investors, philanthropic foundations, and international aid agencies, laying out how they can best enable meaningful performance measurement. This book examines three distinct contributions to the study of entrepreneurship.

Firstly, it contributes to both sociological and institutional theories of entrepreneurship and the entrepreneur.

Secondly, it presents a cross-national comparative framework for the multilevel analysis of

entrepreneurship. Finally, this book produces a key multilevel finding with regard to the importance of national gender beliefs for the likelihood of business creation among both men and women.

Young reporters need not spend years struggling in obscurity to land coveted

foreign assignments. In fact, technological advances and cost-cutting at major media companies have created unprecedented opportunities for enterprising journalists to succeed abroad as freelance correspondents--stringers--for newspapers, magazines, radio, television, wire services, and Internet outlets. *The World on a String: How to Become a Freelance Foreign Correspondent* is the step-by-step manual that describes how to: *choose your region wisely *select the right equipment *establish vital

editorial contacts at home and abroad *make ends meet while filing stories to various media *prepare for the risks of reporting from war zones *work effectively with distant editors Colorful anecdotes and practical advice from successful stringers around the world highlight the trials and triumphs of freelancing abroad, enabling you to assess and take control of your career in the competitive world of journalism.

This textbook provides students with real-world social marketing case studies from different countries and regions around the world, taking learners from classroom theory to practice. The primary objective is to clearly portray to students distinct, identifiable steps that are essential for successful social marketing campaigns. Core social marketing practices are applied to each case to

help students master social marketing principles and apply them to their own real world social marketing activities in order to affect positive social change. This textbook first provides the tools necessary to understand the effective application of social marketing, and then offers 24 case studies exemplifying effective social marketing efforts from all around the world. Specifically, Part I clearly and concisely explains the principles of social marketing in five chapters: • Upstream vs. downstream social marketing, SWOT, competition • Fundamentals of social marketing, ethics • Formative and Evaluative Research • Theories applied in social marketing • A historical perspective on social marketing Part II features

24 social marketing case studies that demonstrate the application of social marketing principles. All 24 cases follow a consistent structure that includes: • Background • Positioning • SWOT • Research • Objectives • The 4 P's • Target audience • Evaluation • Barriers and benefits • Discussion • Competition This format allows for students and professors to easily and effectively select individual cases and compare between cases. This textbook also allows instructors to encourage critical thinking by having students compare and contrast not only the cases themselves, but the applications used. In addition, teaching guides with answers to discussion questions, suggestions for activities inside and outside of the classroom and further

readings are available to assist professors in teaching from this book. Most medical researchers, whether clinical or non-clinical, receive some background in statistics as undergraduates. However, it is most often brief, a long time ago, and largely forgotten by the time it is needed. Furthermore, many introductory texts fall short of adequately explaining the underlying concepts of statistics, and often are divorced

This book is open access under a CC BY 4.0 license. Presenting rigorous and original research, this volume offers key insights into the historical, cultural, social, economic and political forces at play in the creation of world-class ICT innovations in Kenya.

Following the arrival of fiber-optic cables in 2009, Digital Kenya examines why the initial entrepreneurial spirit and digital revolution has begun to falter despite support from motivated entrepreneurs, international investors, policy experts and others. Written by engaged scholars and professionals in the field, the book offers 15 eye-opening chapters and 14 one-on-one conversations with entrepreneurs and investors to ask why establishing ICT start-ups on a continental and global scale remains a challenge on the “Silicon Savannah”. The authors present evidence-based recommendations to help Kenya to continue producing globally impactful ICT innovations that improve the lives

of those still waiting on the side-lines, and to inspire other nations to do the same.

This book is designed to present a state-of-the-art approach to the assessment and management of anxiety disorders. This text introduces and reviews the theoretical background underlying anxiety and stress psychopathology, addresses the issues faced by clinicians who assess individuals presenting with anxiety in different contexts, and reviews the management of and varied treatment approaches for individuals with anxiety disorders. Written by experts in the field, the book includes the most common demographics and challenges for physicians treating anxiety, including disorders in children, aging patients, personality

disorders, drug and non-drug treatment options, as well as anxiety in comorbid patients. Clinical Handbook of Anxiety Disorders is a valuable resource for psychiatrists, psychologists, students, counselors, psychiatric nurses, social workers, and all medical professionals working with patients struggling with anxiety and stress-related conditions.

Toward Acceptance

Developing countries need additional, cross-border capital channeled into their private sectors to generate employment and growth, reduce poverty, and meet the other Millennium Development Goals. Innovative financing mechanisms are necessary to make this happen. 'Innovative Financing for Development' is the first book on this subject that uses a market-based approach. It compiles pioneering

methods of raising development finance including securitization of future flow receivables, diaspora bonds, and GDP-indexed bonds. It also highlights the role of shadow sovereign ratings in facilitating access to international capital markets. It argues that poor countries, especially those in Sub-Saharan Africa, can potentially raise tens of billions of dollars annually through these instruments. The

chapters in the book focus on the structures of the various innovative financing mechanisms, their track records and potential for tapping international capital markets, the constraints limiting their use, and policy measures that governments and international institutions can implement to alleviate these constraints.

Youth violence: Sources and solutions in South Africa thoroughly and

carefully reviews the evidence for risk and protective factors that influence the likelihood of young people acting aggressively. Layers of understanding are built by viewing the problem from a multitude of perspectives, including the current situation in which South African youth are growing up, perspectives from developmental psychology, the influences of race, class and gender, and of the media. The book then

reviews the evidence for effective interventions in the contexts of young people's lives - their homes, their schools, their leisure activities, with gangs, in the criminal justice system, in cities and neighbourhoods, and with sexual offenders. In doing so, thoughtful suggestions are made for keeping an evidence-based perspective while (necessarily) adapting interventions for developing world contexts, such as South

Africa. Youth violence in South Africa: Sources and solutions is a valuable addition to the library of anyone who has ever wondered about youth violence, or wanted to do something about it.

Troilus and Cressida is a tragedy by William Shakespeare, believed to have been written in 1602. It was described by Frederick S. Boas as one of Shakespeare's problem plays. The play ends on a very bleak note with the death of

the noble Trojan Hector and destruction of the love between Troilus and Cressida. The work has in recent years "stimulated exceptionally lively critical debate". According to a 2018 World Bank report, Africa is the only region with more women than men choosing to become entrepreneurs - a phenomenon that is not the subject of adequate discussion. This book reveals the latest research-based

understanding of the entrepreneurial activities of women in sub-Saharan Africa. Specially invited subject experts present salient dimensions of entrepreneurship by African women, from environmental factors to motivations and influencers as well as financial and non-financial constraints, and highlight the significant role of cultural differences. This book provides a mixture of theoretical,

conceptual, and empirical research, and fills the knowledge gap by presenting a wide range of opportunities and challenges faced by sub-Saharan African women entrepreneurs. This book will help policy makers and academic researchers in understanding the role of institutions and entrepreneurship policy in building a thriving entrepreneurial ecosystem in the region. This book demonstrates a new,
interdisciplinary approach to life writing
about torture that situates torture firmly

within its socio-political context, as opposed to extending the long line of representations written in the idiom of the proverbial dark chamber. By dismantling the rhetorical divide that typically separates survivors' suffering from human rights workers' expertise, contributors engage with the personal, professional, and institutional dimensions of torture and redress. Essays in this volume consider torture from diverse locations — the Philippines, Argentina, Sudan, and Guantánamo, among others. From across the globe, contributors witness both individual pain and institutional complicity; the challenges of building communities of healing across linguistic and national divides; and the role of the law, art, writing, and teaching in representing and responding to torture.

Winner of the 2010 Haskell Norman Prize for Outstanding Achievement in Psychoanalysis! Why is dreaming the mind's single most important psychoanalytic activity? This Art of Psychoanalysis offers a unique perspective on psychoanalysis that features a new way of conceptualizing the role of dreaming in human psychology. Thomas Ogden's thinking has been at the cutting edge of psychoanalysis for more than 25 years. In this volume, he builds on the work of Freud, Klein, Winnicott, and Bion and explores the idea that human psychopathology is a manifestation of a breakdown of the individual's capacity to dream his experience. The investigation into the role of the analyst in participating psychologically in the patient's dreaming is illustrated throughout with elegant and absorbing

accounts of clinical work, providing a fascinating insight into the analyst's experience. Subjects covered include: a new reading of the origins of object relations theory on holding and containing, being and dreaming on psychoanalytic writing. This engaging book succeeds in conveying not just a set of techniques but a way of being with patients that is humane and compassionate. It will be of great interest to psychoanalysts, psychotherapists and other mental health professionals.

"What Works in Girls Education" summarizes the extensive body of research on the state of girls education in the developing world today; the impact of educating girls on families, economies, and nations; and the most promising approaches to increasing girls enrollment and educational

quality.

Only a few years ago the endocannabinoid system was unknown. Today we are aware that endocannabinoids are involved in many of the functions of the mammalian body - in neuroprotection, appetite and suckling, pain, reproduction, anxiety, memory, bone formation etc. This volume presents an up-to-date picture of some of the major fields of endocannabinoid research. It summarizes the actions of the endocannabinoids on various physiological systems and opens new therapeutic windows to a large number of diseases. The first chapter, on the use of Cannabis in India, can be viewed as an expression of thanks to the herbal practitioners, who for centuries passed on the medical traditions associated with the drug.

The chapter on chemistry is a short summary of active plant, synthetic and endogenous cannabinoids being investigated today, many of which are mentioned later in the book.

Cannabidiol is an unusual cannabinoid - it does not bind to the known receptors and yet exerts a variety of effects. Hence a chapter is devoted to it. Further chapters deal with the endocannabinoid system and the endocannabinoids in a variety of conditions and physiological systems. The concluding chapter describes the research done on Sativex® , a standardized plant extract, shortly to be introduced in Canada as a drug for multiple sclerosis. The intended audience is drug researchers (medicinal chemists, pharmacologists, clinicians), neuroscientists, physiologists, and clinicians interested

in the effect of the endocannabinoid system in various physiological systems.

Global Corruption Report: Education

A challenge to prevailing ideas about innovation and a guide to identifying the best growth strategy for your community.

Across the world, cities and regions have wasted trillions of dollars on blindly copying the

Silicon Valley model of growth creation. Since the early years of the information age, we've been told that economic growth derives from harnessing technological innovation. To do this, places must create good education systems, partner with local research universities, and attract innovative hi-tech firms. We have lived with this system for decades, and the result is clear: a small number of regions and cities at the top of the high-tech industry but many more fighting a losing battle to retain economic dynamism. But are there other models that don't rely on a flourishing high-tech

industry? In *Innovation in Real Places*, Dan Breznitz argues that there are. The purveyors of the dominant ideas on innovation have a feeble understanding of the big picture on global production and innovation. They conflate innovation with invention and suffer from techno-fetishism. In their devotion to start-ups, they refuse to admit that the real obstacle to growth for most cities is the overwhelming power of the real hubs, which siphon up vast amounts of talent and money. Communities waste time, money, and energy pursuing this road to nowhere.

Breznitz proposes that communities instead focus on where they fit in the four stages in the global production process. Some are at the highest end, and that is where the Clevelands, Sheffields, and Baltimores are being pushed toward. But that is bad advice. Success lies in understanding the changed structure of the global system of production and then using those insights to enable communities to recognize their own advantages, which in turn allows to them to foster surprising forms of specialized innovation. As he stresses, all

localities have certain advantages relative to at least one stage of the global production process, and the trick is in recognizing it. Leaders might think the answer lies in high-tech or high-end manufacturing, but more often than not, they're wrong. Innovation in Real Places is an essential corrective to a mythology of innovation and growth that too many places have bought into in recent years. Best of all, it has the potential to prod local leaders into pursuing realistic and regionally appropriate models for growth and innovation.

Entrepreneurship is a human universal. All over the world, and throughout history, people have created businesses. Yet, although women make up more than 50 percent of the world population, they own and manage significantly fewer businesses than men. Venture types and management styles vary across genders as well. Women entrepreneurship presents several distinctive characteristics that differentiate it from men entrepreneurship. But variations exist also across women entrepreneurs in various countries, and between women who are involved in

entrepreneurship and those who are not. Overall, the explanation for the behavior of women entrepreneurs and its distinctiveness is complex and multifaceted. Evidence to date suggests that reasons contributing to explaining these differences include demographic and socio-economic variables, subjective perceptions, and cultural factors and institutions, and that such differences have significant implications at the macro-economic level. Studying female entrepreneurship allows researchers to ask questions that shed light on the linkages

between entrepreneurship and wealth creation, employment choices and cognition, human capital accumulation and labor market structure, employment choice and family dynamics, business creation and peace, and many others. From a scientific point of view, the study of female entrepreneurship as a distinct area of inquiry informs us not only about women behavior, but also about entrepreneurial and human behaviors in general. All over the world, female entrepreneurship has become an important component of academic and

policy conversations around entrepreneurship. Still, there is much we don't yet understand. Taking stock of what has been learned so far, identifying the main gaps, and encourage scholars to push the frontier of knowledge in this area further are the goals of this work.

Der Tagungsband zum 10. Wissenschaftsforum Mobilität an der Universität Duisburg-Essen im Juni 2018 untersucht das Rahmenthema „Mobility in Times of Change: Past – Present –Future“ und fokussiert den Übergang von der alten (Auto-)Mobilität in eine neue Mobilität. Die

Autorinnen und Autoren geben nicht nur einen Rückblick auf die Themen des Mobilitätsforums in den vergangenen 10 Jahren, sondern wagen einen Ausblick auf die kommenden 10 Jahre. In den Plenumsvorträgen, Präsentationen und Posterbeiträgen wird somit der Bogen von der Mobilität Ende des 19 Jahrhunderts bis in die Zukunft geschlagen.

Facts, figures, and essays on women and poverty by Barbara Ehrenreich, Kirsten Gillibrand, LeBron James, and other high-profile contributors. Fifty years after President Lyndon B. Johnson called for a War on

Poverty and enlisted Sargent Shriver to oversee it, the most important social issue of our day is once again the dire economic straits of millions of Americans. One in three live in poverty or teeter on the brink—and seventy million are women and the children who depend on them. The fragile economic status of millions of American women is the shameful secret of the modern era—yet these women are also our greatest hope for change, and our nation's greatest undervalued asset. The Shriver Report: A Woman's Nation Pushes Back from the Brink asks—and

answers—big questions. Why are millions of women financially vulnerable when others have made such great progress? Why are millions of women struggling to make ends meet even though they are hard at work? What is it about our nation—government, business, family, and even women themselves—that drives women to the financial brink? And what is at stake? To forge a path forward, this book brings together a power-packed roster of big thinkers and talented contributors, in a volume that combines academic research, personal reflections, authentic

photojournalism, groundbreaking poll results, and insights from frontline workers; political, religious, and business leaders; and major celebrities—all focused on a single issue of national importance: women and the economy. “ A startling wake-up call for policymakers and anyone hoping to survive a culture that siphons wealth upward to a very powerful few. ” —Booklist Contributors include: Carol Gilligan, PhD * Barbara Ehrenreich * Beyoncé Knowles-Carter * LeBron James * Anne-Marie Slaughter * Kirsten Gillibrand * Hillary Rodham

A Woman's Nation Pushes Back from the Brink

Since the adoption of the Universal Declaration of Human Rights of 1948, the discourse of human rights has expanded to include not just civil and political rights but economic, social, cultural, and, most recently, collective rights. Given their broad scope, human rights issues are useful touchstones in the humanities classroom and benefit from an interdisciplinary and cross-cultural pedagogy in which objects of study are situated in historical, legal, philosophical, literary, and rhetorical contexts. *Teaching Human Rights in Literary and Cultural Studies* is a sourcebook of inventive approaches and best practices for teachers looking to make human rights the focus of their undergraduate and graduate courses. Contributors first explore what it means to

be human and conceptual issues such as law and the state. Next, they approach human rights and related social-justice issues from the perspectives of particular geographic regions and historical eras, through the lens of genre, and in relation to specific rights violations--for example, storytelling and testimonio in Latin America or poetry created in the aftermath of the Armenian genocide. Essays then describe efforts to cultivate students' capacity for ethical reading practices and to deepen their understanding of the stakes and artistic dimensions of human rights representations, drawing on active learning and experimental class contexts. The final section, on resources, directs readers to further readings in history, criticism, theory, and literary and visual studies and provides a chronology of human rights legal documents. Borowitz creatively explores his theory of

Covenant, linking self to folk and God through the contemporary idiom of relationship.

Corruption and poor governance are acknowledged as major impediments to realizing the right to education and to reaching the Millennium Development Goal of universal primary education by 2015. Corruption not only distorts access to education, but affects the quality of education and the reliability of research findings. From corruption in the procurement of school resources and nepotism in the hiring of teachers, to the buying and selling of academic titles and the skewing of research results, major corruption risks can be identified at every level of the education and research systems. Conversely, education serves as a means to strengthen personal integrity and is a critical tool to address corruption effectively. The Global Corruption Report

(GCR) is Transparency International's flagship publication, bringing the expertise of the anti-corruption movement to bear on a specific corruption issue or sector. The Global Corruption Report on education consists of more than 70 articles commissioned from experts in the fields of corruption and education, from universities, think-tanks, business, civil society and international organisations. The Global Corruption Report on education and academic research will provide essential analysis for understanding the corruption risks in the sector and highlight the significant work that has already been done in the field to improve governance and educational outcomes. This will be an opportunity to pull together cutting edge knowledge on lessons learnt, innovative tools and solutions that exist in order to fight corruption in the education sector.

Troilus and Cressida Illustrated

Women accomplish nearly two-thirds of total work around the world (including household duties), comprise one-third of the formal labor force, but women receive one-tenth of the world's income and own only one-

hundredth of the world's property. Entrepreneurship is a vehicle for advancing the lives of women around the world. This book brings together 49 distinguished entrepreneurship scholars to provide a unique global vision of the wellbeing of women entrepreneurs necessary for fostering sustainable development and inclusive societies. Although gender inequality is an important issue, solutions leading to gender parity are far from reaching ideal levels in the formal workplace and globally. Meanwhile the number of women involved in entrepreneurship is growing exponentially because there are

more opportunities for women to own a business and be their own boss. This offers women the most desirable and flexible working conditions that better align with women's lifestyles and multiple family responsibilities. However, entrepreneurial activities are demanding and complex; compared to men, women face special challenges that deserve close attention. This book presents research and programs to effectively support women entrepreneurs in reaching levels of wellbeing required to ensure business sustainability and personal prosperity. Offering a diversity perspectives from

around the globe, The Wellbeing of Women in Entrepreneurship is of great interest to academics and practitioners working in teaching and research in disciplines including business management, entrepreneurship, organizational change, human centered management, human resources, sustainable development, and women's studies.

This book is an examination of the complex issues facing gay, lesbian, bisexual, and transgender persons on college campuses.

Hard-headed evidence on why the returns from investing in girls are so high that no nation or

family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns:

**Better outcomes in economic areas of growth and incomes
Reduced rates of infant and maternal mortality
Reduced rates of child marriage
Reduced rates of the incidence of HIV/AIDS and malaria
Increased agricultural productivity
Increased resilience to natural disasters
Women's empowerment**

What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

This book is about the

convergence of two problems: the ongoing realities of conflict and forced migration in Africa's Great Lakes region, and the crisis of citizenship and belonging. By bringing them together, the intention is to see how, combined, they can help point the way towards possible solutions. Based on 1,115 interviews conducted over 6 years in the region, the book points to ways in which refugees challenge the parameters of citizenship and belonging as they carve out spaces for inclusion in the localities in which they live. Yet with a policy environment that often leads to marginalisation, the book

highlights the need for policies that pull people into the centre rather than polarise and exclude; and that draw on, rather than negate, the creativity that refugees demonstrate in their quest to forge spaces of belonging.

A scholar and media critic takes a provocative look at the portrayal of women in American popular culture from the 1950s to the present day and assesses the impact of such images on women's real lives

This open access book presents 18 case studies that explore current scientific and technological efforts to address global development issues, such as poverty, from a holistic and interdisciplinary point of view, putting actual impacts at the centre of its analysis. It illustrates the use of technologies for development in various fields of research, such as humanitarian action, medical and information and communication technology, disaster risk-reduction technologies, habitat and sustainable access to energy. The authors discuss how innovative technologies, such as

unmanned aerial vehicles for disaster risk reduction, crowdsourcing humanitarian data, online education and ICT-based medical technologies can have significant social impact. The book brings together the best papers of the 2016 International Conference on Technologies for Development at EPFL, Switzerland. The book explores how the gap between innovation in the global South and actual social impact can be bridged. It fosters exchange between engineers, other scientists, practitioners and policy makers active at the interface of innovation and technology and human, social, and economic development.

The one book you need to make a difference in the world. Social innovation and social entrepreneurship are rising forces. As the extent of the world's systemic challenges becomes

clear—from climate change to income inequality to food security to healthcare and beyond—more and more of the best and brightest will feel called to become innovators and entrepreneurs who develop and deploy solutions to the world's thorniest problems. But it won't be easy: social innovation is complicated. Solutions require the active collaboration of constituents across the worlds of government, business, and nonprofits. Social innovators and entrepreneurs need a handbook to guide them on the journey to changing the world. This is that guide. Contributions from a who's who of the smartest thinkers and most experienced practitioners in the field provide the knowledge you need to succeed as a social innovator. Topics cover the waterfront, including: High-

performance leadership as a driver of social change Design for extreme affordability Scaling social innovation Corporate decarbonization Social innovation and healthcare in the postpandemic world Donor-advised funds and impact investing Case studies from the field bring to life the challenges and opportunities social entrepreneurs and innovators face. *Frontiers in Social Innovation* is an essential volume for anyone who wants to use innovation and entrepreneurship to make the world a better place.

The Book on Ending Homelessness
Gender Issues in Entrepreneurship

?Social Innovation is becoming an increasingly important topic in our global society. Those organizations which are able to develop business solutions to the most urgent social and ecological challenges will be the leading companies of tomorrow. Social Innovation not only creates value for

society but will be a key driver for business success. Although the concept of Social Innovation is discussed globally the meaning and its impact on the development of new business strategies is still heavily on debate. This publication has the goal to give a comprehensive overview of different concepts in the very innovative field of Social Innovation, from a managerial as well as from a theoretical and

social perspective. Over 30 leading thinkers in the field of Innovation, Strategic Management and Organizational

Development give a well structured inside on the latest developments and progress in the field of Social Innovation.

Thereby the authors not only develop a comprehensive and unique analysis on the state-of-the art of social innovation but also give practical advice and information to business leaders on how to apply

the latest management thinking on Social Innovation to daily business decisions. This publication has the intention to become a milestone in the further development of the concept of Social Innovation as well as to further stimulate new business strategies necessary to overcome world most pressing social and ecological challenges.

Methods.

The Book on Ending Homelessness provides

insights for those in the industry, elected officials, policy makers, funders, public servants and the general public on the best ways to move from managing homelessness to ending homelessness. While ending homelessness may seem to be a whacky or even preposterous idea, Iain De Jong takes more than two decades of experience as an award winning industry leader to lay out how and why homelessness can be ended in very practical

ways. This book will provoke and teach, serving as both inspiration and an instruction manual for those serious about combatting one of the most important social issues of our time. The book will reshape how you think about homelessness, as well as how strategies like sheltering, street outreach and day services all play a role in ending homelessness when operated with a housing-focused lens and

the right service orientation. No doubt the book will reassure some that their thinking and actions regarding homelessness are bang on, while challenging others to think and respond differently in what they do and how they invest their money. Many of the ideas in the book elaborate upon ideas that Iain shares in his blog, keynote speeches and conference presentations, as well as the training series that Iain and his team

have been offering for the past decade. If you are involved in homelessness issues or concerned about homelessness, this book is essential reading. This volume, which includes essays by women scientists, researchers, journalists, and administrators, investigates how gender analysis can spark creativity in science and engineering.
