Not many refuse heaven. Fewer reject paradise. Certainly rare are those who would find themselves before a being of unknown power and point out the demerits of nirvana.One man does.When the aloof fourth son of a business mogul makes the decision to save a life at the cost of his own, he discovers that what awaits him at the end of his mortality is not eternal oblivion.He cannot help but be disappointed.When he realizes the world he's been brought to works like the old fantasy games he used to love, he begins to see the merits.If only he did not start out as the weakest thing in existence, and if only the world he was in was not populated with madness-inducing creatures and fates worse than death. "Decide for yourself, your fantasies and your Nightmares, your companions and your adversaries, your angels and your demons, your gods and your monsters. Alamir stretches to you a hand of a thousand possibilities -You only need take it."

Thomas Hardy Reappraised

We study quantum entanglements of baby universes which appear in non-perturbative corrections to the OSV formula for the entropy of extremal black holes in type IIA string theory compactified on the local Calabi-Yau manifold defined as a rank 2 vector bundle on an arbitrary genus G Riemann surface. This generalizes the result for G=1 in hep-th/0504221. Non-perturbative terms can be organized into a sum over contributions from baby universes, and the total wave-function is their coherent superposition in the third space. We find that half of the universes preserve one set of supercharges while the other half preserve a different set, making the total universe stable but non-BPS. The parent universe generates baby universes by brane/anti-brane pair creation, and baby universes are correlated by conservation of non-normalizable D-brane charges under the process. There are no other source of entanglement of baby universes, and all possible states are superposed with the equal weight.

Martyrologium Romanum

Robert Langdon is called upon to identify a mysterious symbol seared onto a dead man's chest. It belongs to the Illuminati, a secret brotherhood with a vendetta against the Catholic Church. Selected by the Modern Library as one of the 100 best nonfiction books of all time The Gnostic Gospels is a landmark study of the long-buried roots of Christianity, a work of luminous scholarship and wide popular appeal. First published in 1979 to critical acclaim, winning the National Book Award and the National Book Critics Circle Award, The Gnostic Gospels has continued to grow in reputation and influence over the past two decades. It is now widely recognized as one of the most brilliant and accessible histories of early Christian spirituality published in our time. In 1945 an Egyptian peasant unearthed what proved to be the Gnostic Gospels, thirteen papyrus volumes that expounded a radically different view of the life and teachings of Jesus Christ from that of the New Testament. In this spellbinding book, renowned religious scholar Elaine Pagels elucidates the mysteries and meanings of these sacred texts both in the world of the first Christians and in the context of Christianity today. With insight and passion, Pagels explores a remarkable range of recently discovered gospels, including the Gospel of Thomas and the Gospel of Mary Magdalene, to show how a variety of “Christianities” emerged at a time of extraordinary spiritual upheaval. Some Christians questioned the need for clergy and church doctrine, and taught that the divine could be discovered through spiritual search. Many others, like Buddhists and Hindus, sought enlightenment—and access to God—within. Such explorations raised questions: Was the resurrection to be understood symbolically and not literally? Was God to be envisioned only in masculine form, or feminine as well? Was martyrdom a necessary—or worthy—expression of faith? These early Christians dared to ask questions that orthodox Christians later suppressed—and their explorations led to profoundly different visions of Jesus and his message. Brilliant, provocative, and stunning in its implications, The Gnostic Gospels is a radical, eloquent reconsideration of the origins of the Christian faith.

A gruesome discovery at an old children's home lays bare terrible secret's from Norwich's past in the second gripping mystery for Dr Ruth Galloway. 'The setting is enticingly atmospheric. . . a really intelligent murder story' Independent Dr Ruth Galloway's forensic skills are called upon when builders, demolishing an old house in Norwich, uncover the bones of a child - minus the skull - beneath a doorway. Is it some ritual sacrifice or just plain straightforward murder? Ruth links up with DCI Harry Nelson to investigate. The house was once a children's home. Nelson traces the Catholic priest who used to run the place. He tells him that two children did go missing forty years before - a boy and a girl. They were never found. When carbon dating proves that the child's bones predate the home and relate to a time when the house was privately owned, Ruth is drawn ever more deeply into the case. But as spring turns into summer it becomes clear that someone is desperate to put her off the scent by frightening her to death...
